

# **VOYAGER™** Global SIM Management Platform

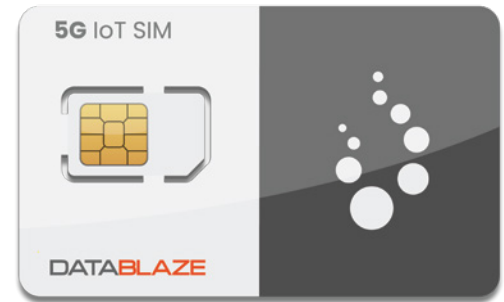

**Connect your business  
through wireless IoT  
connectivity and optimize  
your costs from one central  
data and device  
management platform.**

## Worldwide Coverage

Providing the largest network of IoT connectivity available. Datablaze provides 4G/LTE, 5G, Cat-M, & NB-IoT data plans.

**600+**  
Global Operators

**190+**  
Countries

## Platform Features

### Live Dashboard

Get a real-time, intelligent view of all your connected IoT devices in a user-friendly layout. View monthly data usage, top data users and estimated charges for SIM subscribers.

### Connectivity Management

In one platform, activate or terminate SIM card subscriptions. Troubleshoot data connections or change data plans on a single connection or a batch of connections.

### Optimize Data

Voyager gives all the tools to manage, troubleshoot, and optimize your data connections. Intelligent analytics and automation give the ability to optimize your data plans with little effort.

### Multi-Carrier Capable

One platform to manage any combination of carriers. Datablaze partners with global tier-1 wireless carriers.

### Customization & Integration

A full API suite and our experienced in-house team of IoT developers can help take your custom IoT deployment from concept to market.

### Transparent Billing

Accurate and simple reporting allows better downstream billing and cost management across deployments.
