

Product Guide

Who We Are

We are the original creators of the world's first contactless blood pressure and vital sign monitoring technology. Our core product Anura™ uses the camera on a mobile device to provide over 30 medical grade health and wellness measurements in just 30 seconds.

Founded in Toronto in 2015, our groundbreaking technology has been endorsed globally through peer-reviewed publications and clinical research collaborations.

We currently hold over 13 registered patents and employ more than 70 staff around the globe, including neuroscientists, machine learning and artificial intelligence experts, biomedical and software engineers, psychologists, physicians, and more.

What We Measure

Vitals

- Heart Rate
- Breathing
- Systolic Blood Pressure
- Diastolic Blood Pressure
- Irregular Heart Beat

Physiological

- Heart Rate Variability
- Cardiac Workload

Anura™ Lite

Anura™ is the world's first contactless wellness and vital sign monitoring solution. The application uses the camera on your mobile device to assess your general wellness, providing medical grade measurements using data gathered from a 30-second video selfie.

Anura™ Lite is available for free on Google Play and Apple App Store, with basic health and vital sign measurement features such as Heart Rate, Breathing, Heart Rate Variability, Mental Stress Index, Body Mass Index, Facial Skin Age, Waist-to-Height Ratio, Body Shape Index, and Overall Wellness Score.

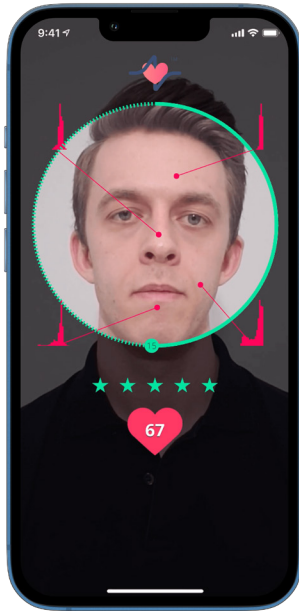

Anura™ Mobile Enterprise

The Anura™ Mobile Enterprise application provides a full set of 30+ health and vital sign measurement features. It allows customers to customize their Anura™ experience to match their organizational branding, select necessary measurement features, and more.

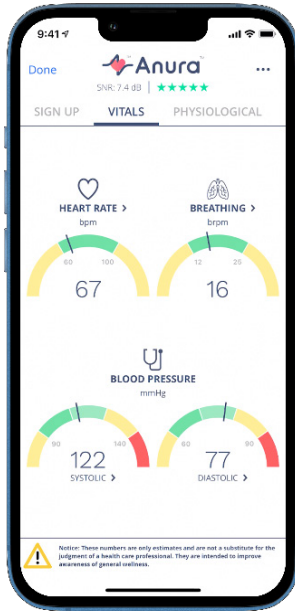

Key Features:

- Your customized app logo
- Multi-profile management
- Data aggregation
- Continuously growing list of measurement features and automatic algorithm optimization
- Easily integrated into your existing application

In the United States, this product is for Investigational Use Only. The performance characteristics of this product have not been established.

HISTORY

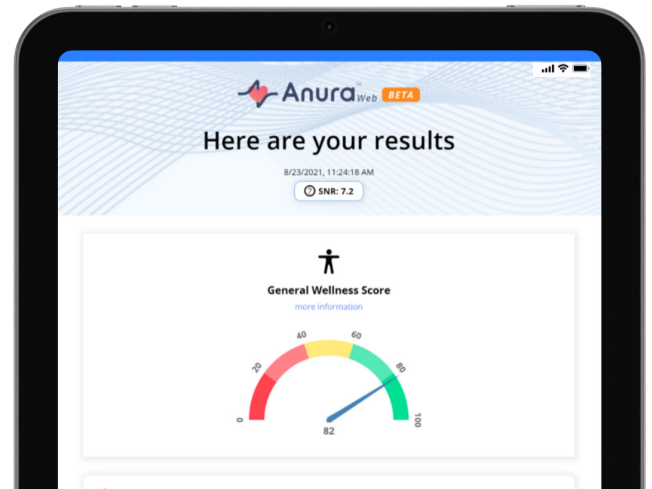

Anura™ Web Enterprise

What if you could do a 30-second health check using just your browser?

We also offer a web-based version of Anura™ health and vital sign monitoring technology.

Simply open a supported browser, complete a 30 second video selfie, and receive health data instantly.

- No software download needed
- Runs on any device with a supported web browser
- Easily integrated into existing health applications and softwares

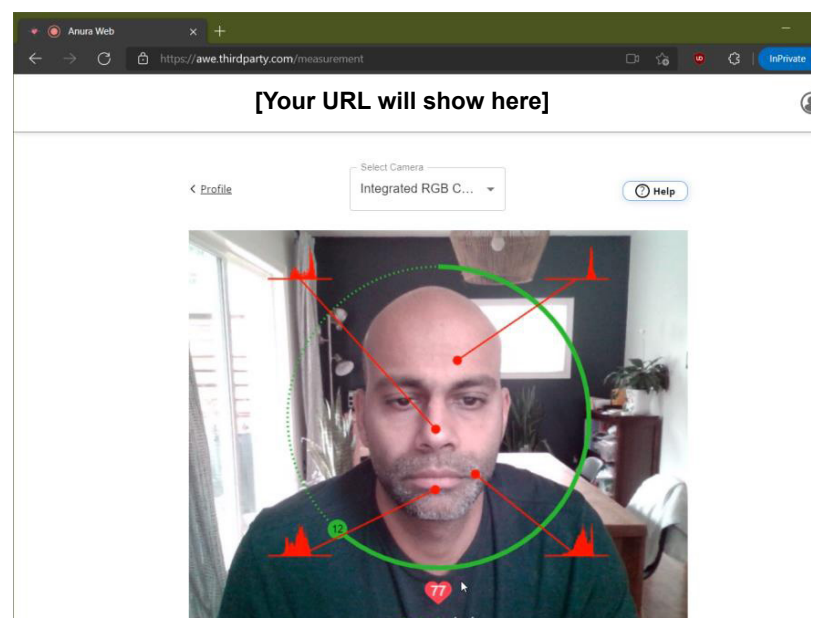

Anura™ Web Measurement Service

Our health and vital sign measurement technology can also be integrated into your current web application.

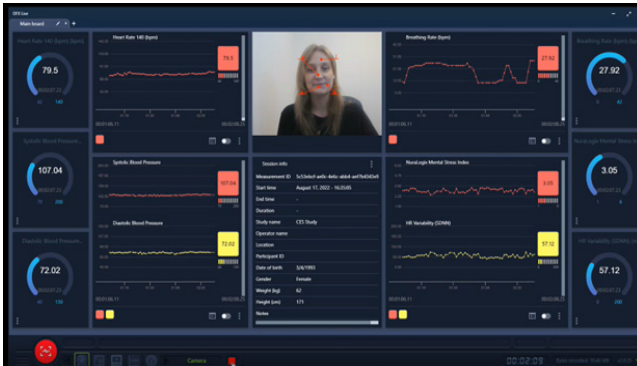

What does this mean?

With this integration, you are able to measure health and vital signs within your own website, using our technology. Your URL will show at the top of the page.

In the United States , this product is for Investigational Use Only. The performance characteristics of this product have not been established.

Anura™ Telehealth

Prefer to receive health data in real-time?
No problem.

Our Anura™ Telehealth application is a desktop platform that performs continuous health and vital sign measurements.

Key Features:

- Customizable interface, templates and reporting to accommodate different use cases
- Continuous real-time health and vital sign measurement

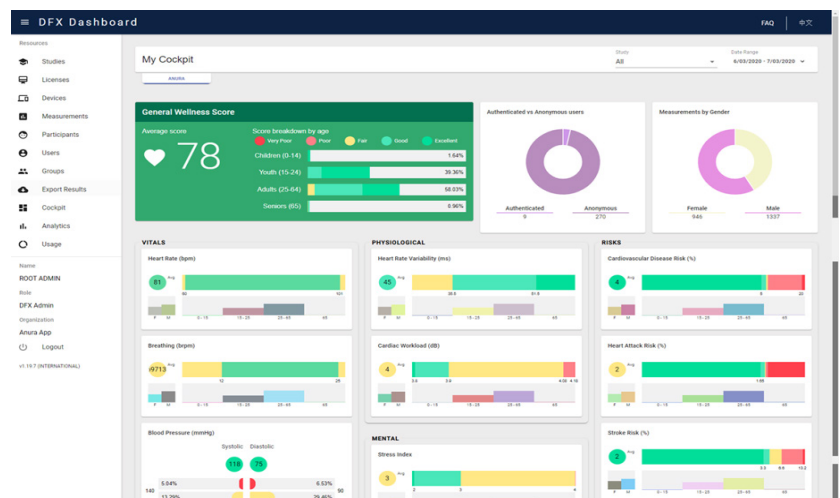

Dashboard

Subscribed organizations will receive free access to the corresponding dashboard.

This centralized hub allows administrators to easily manage group health data. Get organizational results, logs, storage, utilization levels and more, all in one centralized location.

Key Features:

- Easily generate a customized report and analysis
- Identify health trends with historical data
- Rich set of analytics and reporting tools

In the United States, this product is for Investigational Use Only. The performance characteristics of this product have not been established.
