

# Delivering connectivity where it matters most

**mobilitie**  
a bai communications company

As connectivity becomes a more vital component of daily life — robust, secure, wireless connectivity is more important than ever before.

As the largest privately held wireless infrastructure provider in the U.S., Mobilitie, a BAI Communications company, designs, builds, deploys and operates high-capacity networks that help connect communities and drive innovation across the country. We partner with telecommunications carriers to design and build high-capacity wireless networks in congested environments to provide comprehensive and secure mobile coverage.

From marquee sports and live music venues to high-rise office buildings, major public transportation systems and

hubs, to high-end hotels, resorts and much more, we build state-of-the-art wireless and fiber networks to meet the connectivity demands of our on-demand world.

When people connect, great things happen. And where great things are happening, Mobilitie, is making it possible. Our wireless solutions deliver not only enhanced connectivity, but also limitless possibilities to improve the patron experience, deliver better city services, and achieve greater operational efficiency.

# Innovative solutions that lead from strategy to activation

## DAS

Our DAS infrastructure provides seamless and scalable support for high-bandwidth mobile applications. Eliminate dead spots and maintain signal strength for optimal coverage and capacity with DAS solutions tailored to your venue's architecture.

## Small cells

Our small cells provide low-profile, high-bandwidth coverage to improve connectivity across 5G, LTE and Wi-Fi deployments, and are designed to be upgradable to accommodate future wireless demand growth.

## Wi-Fi

Our Wi-Fi solutions satisfy the growing demand for flexible, high-speed and reliable wireless connectivity and include tools for location-based services, advertising and promotions, video broadcast and other sophisticated CRM applications and analytics.

## Private networks

Our private wireless networks keep your business agile and competitive, with wireless solutions; secure, private Wi-Fi and IP and dedicated bandwidth. Amplify your data-capturing capabilities and identify operational efficiencies with connectivity designed to support innovation.

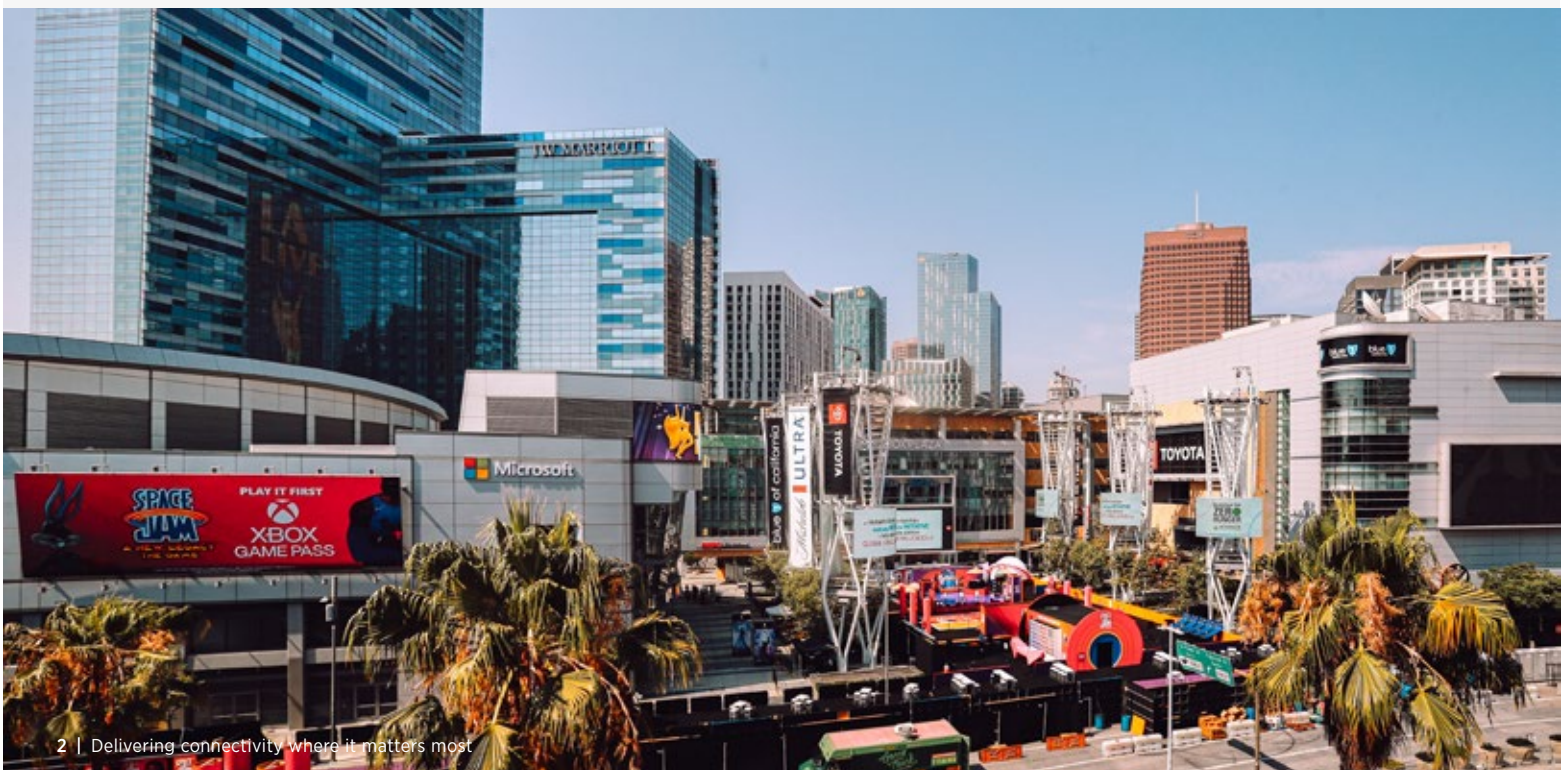

## Fiber

Our fiber solutions provide a fast and compelling networking experience and allow organizations to deliver the next generation of connectivity and edge computing services. In the Bay Area and beyond, our high-count fiber solution offers connectivity to more than 30 data centers with over 75 access points across our 160-mile core backbone.

## Communication towers

With over 300 tower sites spanning 14 states, we've built more towers in the U.S. than any other provider in the last decade. Work with our dedicated team of network planning experts, specialist RF engineers, and compliance and risk mitigation specialists, who ensure every aspect of transmission runs smoothly.

# Creating connections across markets

## **Sports and entertainment**

Leading professional sports across all major leagues and entertainment venues across the U.S. trust Mobilitie to provide high-speed wireless connectivity the moment fans enter the parking lot. We are proud to work with some of the biggest names in sports and entertainment to equip smart venues with best-in-class mobile coverage, allowing fans to seamlessly connect to Wi-Fi to access mobile tickets, share photos, videos and updates on social media and keep in touch with fellow fans or rivals.

## **Real estate**

We work with property owners and management companies to provide non-intrusive and concealed, wireless solutions that improve marketability of your property and build customer loyalty in your retail spaces, outlets, and high-rise office buildings.

## **Hospitality**

We've implemented solutions in some of the world's finest resorts, vacation destinations, and award-winning hotels—including some of the most well-known resort properties in Las Vegas. Regardless of the building size or layout, our unobtrusive, tailor-fit wireless network designs support ubiquitous coverage throughout your property.

## **Healthcare**

Our solutions allow healthcare facilities to differentiate themselves by enabling better access to important information as well as giving patients and visitors voice and data services. Our solutions provide strong reliable wireless connectivity throughout your hospital's campus—even in traditional dead zones such as stairwells, basements, labs, and parking garages.

## Creating connections across markets continued

### Higher education

Our infrastructure ensures students, faculty, and guests all receive solid and reliable connectivity for their campus activities by leveraging today's most advanced integrated indoor and outdoor networks. Across dorms, classrooms, athletic facilities, common areas, and parking structures, we develop solutions to ensure campus-wide wireless coverage.

### Government

With solutions specifically engineered for government authorities, we enable smart city infrastructure, smart digital services, and ubiquitous connectivity to enhance citizens' lives, enable the movement of people and goods, and help build the economies of the future.

### Transportation

Each day, millions of passengers depend on fast, reliable, and secure connectivity during their travel. We have extensive experience in deploying shared communications infrastructure along transit systems, advancing authorities' services and operations, and leveraging data as a strong, reliable, and proven partner for transportation and airport hubs.

### Military

With innovative 5G wireless technologies revolutionizing and transforming Department of Defense (DoD) operations, military personnel require ultra-fast, secure and resilient connectivity to meet their needs. With this in mind, we offer a range of cutting-edge wireless solutions that improve speed, coverage and capacity, which are increasingly vital to mission success for service members and their families. Military personnel trust us to deliver innovative, next-generation solutions they can count on when it matters most.

## Why Mobilitie

As world-leading neutral host providers of 5G and connected infrastructure, we look ahead to the technology requirements of tomorrow's mobile experience and build scalable networks that anticipate future demand. From flexible and on-time installations to Day 2 support, we collaborate closely with your teams to deliver on your connectivity needs from the initial design phase through to implementation and operation.

Our team of hands-on, on-the-ground experts has a proven track record of building networks in the most complex environments with flexible and innovative network infrastructure solutions.

We monitor all of our networks through our network operations center (NOC) 24/7/365 and ensure we stay ahead of tomorrow's capacity demands by proactively deploying the upgrades your system needs.

We combine our wealth of experience in delivering and maintaining large-scale operations with the agility needed to deliver innovative solutions that meet your business needs.
