

Hong Kong Science and Technology Parks Corporation

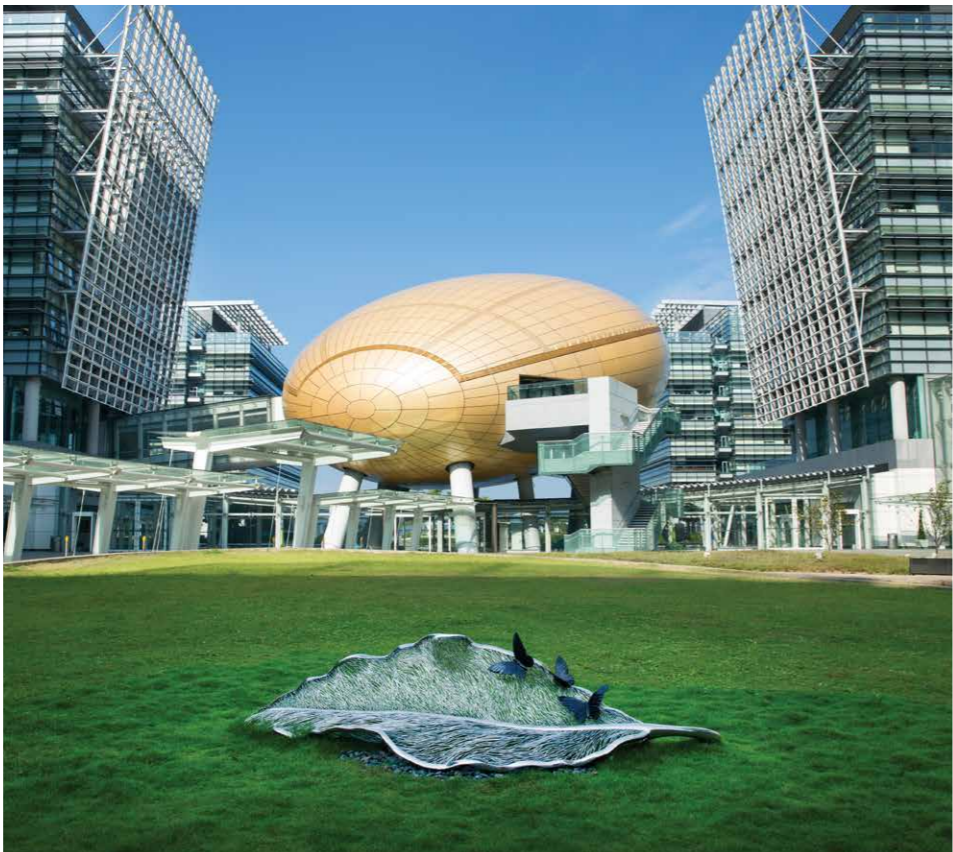

Turning What Ifs into What's Next for Hong Kong

Innovation That Shapes Our Future

A Vibrant Ecosystem

Hong Kong Science and Technology Parks Corporation (HKSTP) is committed to connect stakeholders to build a vibrant innovation and technology ecosystem and provide value added services to help technology companies to conduct R&D at Science Park, enrich their product and branding design at InnoCenter, and enter into advanced manufacturing at our Industrial Estates.

Our focus is to “connect the dots” and drive for concerted efforts amongst innovators, investors, universities, R&D institutions, regulators, as well as corporate and industrial partners to leverage on Hong Kong’s world class talent pool, unique R&D environment, excellent IP protection and legal framework, and access to the huge Mainland China market to build strong business momentum and shape our future.

Science Park – Home to **620+** tech companies and **12,000+** talents

From Lab to Market

We help innovators connect with research partners to accelerate their development, and collaborate with business partners to catalyse the commercialization of innovative products and solutions across 5 technology clusters and 3 application platforms of Smart City, Healthy Ageing and Robotics. In addition to investing in 6 state of the art shared labs for our ecosystem to use, Science Park also provides the perfect “living lab” environment where technologies are tested out, and demonstrated to potential customers through the “Technologies from Science Park” programme that facilitate large enterprises to adopt home grown innovations. Our team will also be bringing our tech companies on roadshows to different cities within Mainland China, as well as participating in international tradeshows and competitions to expand business opportunities.

Driving for re-industrialisation to propel economic diversification

From Classroom to Boardroom

To prepare our young talents for a future that is shaped by technology, we encourage them to embrace STEM education through robotic and science workshops for cross-disciplinary technology applications, inspire them through internship and entrepreneurs sharing, as well as hackathons that challenge their creative minds and let them gain a taste of being a technopreneur. Our award winning Incubation Programmes helped over 700 young technopreneurs realize their dreams, and we are seeing increasing investment interests in their inventions. Just for the past year of 2015-16, our incubatees were able to attract over HK\$320 million investments.

Nurture talents and future CEOs

Attain international recognition

Strategically positioned to help you succeed

Hong Kong – Where Business Goes to Grow

From large multinational companies like SAE and Arrows, to leading research organisations like Karolinska Institutet, to innovative small medium sized companies like Aircraft Medical and the numerous start-ups who wants to explore the Asian market, Hong Kong provides the perfect environment for them to springboard to greater success.

- ✓ Soft landing support for quick set up
- ✓ Robust legal and intellectual property protection
- ✓ Low and simple tax regime
- ✓ Pool of tech talents resources
- ✓ World class ICT and business infrastructure
