

 ROYOLE

 FlexPai

Say goodbye to broken screens
Unfold the next decade

World's first commercial foldable smartphone

FlexPai = Smartphone + Tablet

 Flexible+

Say goodbye to broken screens

Royole's 2nd Generation, Ultrathin, Cicada Wing™, Fully Flexible Display. FlexPai's screen is virtually unbreakable and extremely durable passing tests where the screen has been bent over 200,000 times. Its screen provides fantastic color range, high contrast, wide angle, and high-resolution for outstanding picture quality.

Flexible Screens, Beautiful Viewing Options

FlexPai's unique Water OS provides unparalleled viewing flexibility. The 7.8" fully flexible display can be arranged as split screens depending if the display is folded or expanded. FlexPai has the following aspect ratios: 4:3, 16:9 and 18:9.

Always Take A Selfie

In Dual View Camera Mode, the object of your photo is visible from each screen when folded. Whether it's a selfie, portrait or candid photo, you can use FlexPai's screens to make sure the pose is perfect before the image is captured. No need for multiple shots by getting it right the first time.

Power at Your Fingertips

Using the most recent Qualcomm Snapdragon 855 Mobile Platform; 45% faster CPU and 20% faster GPU, powered by new architecture improvements and leading 7nm process technology. Smarter, faster and more secure experiences delivered by the 4th generation on-device AI engine. Upgradable to support 5G.

Anywhere, Anytime, Large Screen

Office

Increase productivity, view files, or open multiple apps, all on a 7.8" full color display.

Gaming

Get lost in your game with FlexPai's large, brilliant, high resolution display.

Entertainment

Large screen, high resolution & contrast, and portability, let you enjoy your content, anywhere.
