THE COMPONENTS OF ID.ABONENT SOFTWARE SUITE

server software

**smartphone app
(iOS and Android)**

This solution makes it possible to conduct automated identification and registration of one or more of the following in accordance with the requirements of the Service Provider and the national legislation in mere minutes:

☑ contract   ☑ inventoried equipment   ☑ other services

Upon conclusion, the contract is instantly received by the Subscriber and the Service Provider

SOLUTIONS APPLIED

THE SUITE IS INTEGRATED WITH THE FOLLOWING SAAS SOLUTIONS:

ABBYY — high-accuracy conversion of passport pictures into text values, which are used in further data processing.

VisionLabs MACHINES CAN SEE — user identification through the comparison of the image from a video stream to the provided document photo.
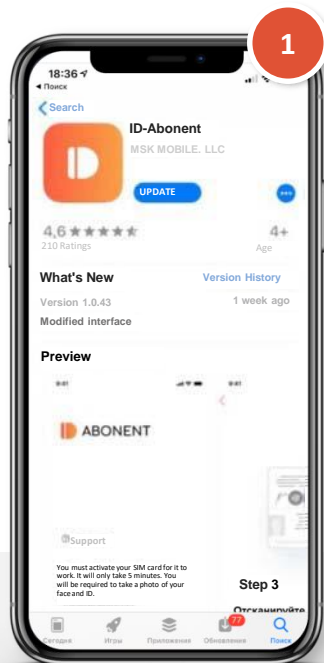

ADDITIONAL SERVICES:

- passport validation (only for the Russian Federation).
- passport authentication.
- other services on demand.
