Music Listening

Solve a problem!

That could not be solved with Noise cancelling earphone

Easy communication

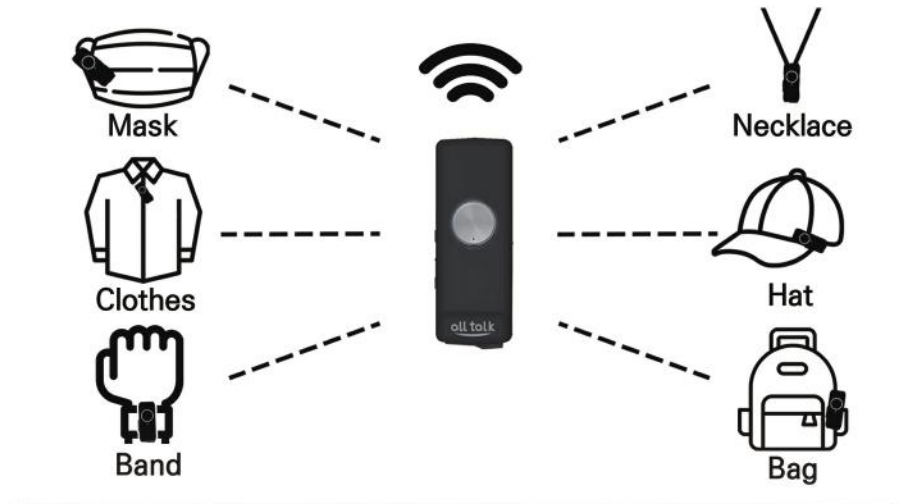

without noise in noise environment

Use it in a place like this

Small and light, it can be attached anywhere

Noise cancelling voice transmission

Bluetooth Microphone also usable

Noise Canceling

To hear the voice clearly
in a noisy environment

Fixed an issue that caused each other's
voices to be difficult to hear
when talking in a noisy environment.

Silent Voice Delivery

To avoid having to speak
multiple times due to the
ambient noise audible
when talking on the phone

It delivers clear voice in situations such as
important business calls, customer
contacts, and lectures.

Wireless Smart Mic

To transmit only voice
under any adverse conditions

It can be used conveniently instead of
a line and heavy microphone for event
venues, lectures, and recreation.

AllTalk Hub

Small and light, easy to use

As it is 16.5g, it can be easily attached
and used anywhere, such as masks,
clothes, hard hats, and necklaces.

AllTalk Hub analyzes the sound and passes through a clear voice with no noise.
Have a clean conversation in any noise environment
with a noiseless transceiver

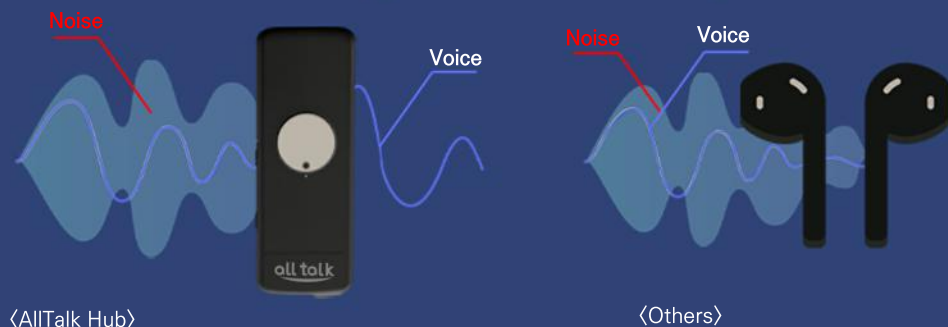

Super – Slim, Super – Light

Alltalk Hub weighs 13.8g and is **easy to use with clips**

Noise-cancelling earphones **have limitations** in blocking noise and voice separation.

Original noise-cancelling earphones block all sounds, so you can't hear the voice clearly.

AllTalk Hub is easy to communicate because it blocks only the noise from the sound and passes the voice!

Due to Covid-19, masks have become mandatory and the inconvenience of communication has increased

Comfortable communication with Alltalk Hub

Communication difficulties due to various disturbances around us can be solved now
