

Creates a New Paradigm

COCONUT SILO PROFILE 2021

Innovative logistics and transportation services connecting developing countries near the equator

Coconut Silo

Coconut Silo Co., Ltd., is a startup working to solve problems in the ASEAN market and create a new paradigm for freight transportation.

Coconut Silo Co., Ltd. aims to improve inefficiencies in the freight transportation market, with the goal of eventually creating an advanced market through efficient matching of shippers/carriers/car owners.

The company has been paying close attention to the explosive growth of the Vietnamese logistics industry.

Vietnam's freight transportation market has been growing rapidly every year due to the continuous growth of the country's manufacturing industry.

Creating a new era in the logistics industry from this trend--this is the value of Coconut Silo.

We will open up a new future with great potential in the ASE-AN market through constant growth and innovation.

Message from the CEO

Innovation is inevitable in preparing for the new future which is rapidly approaching amid the ongoing changes in the world.

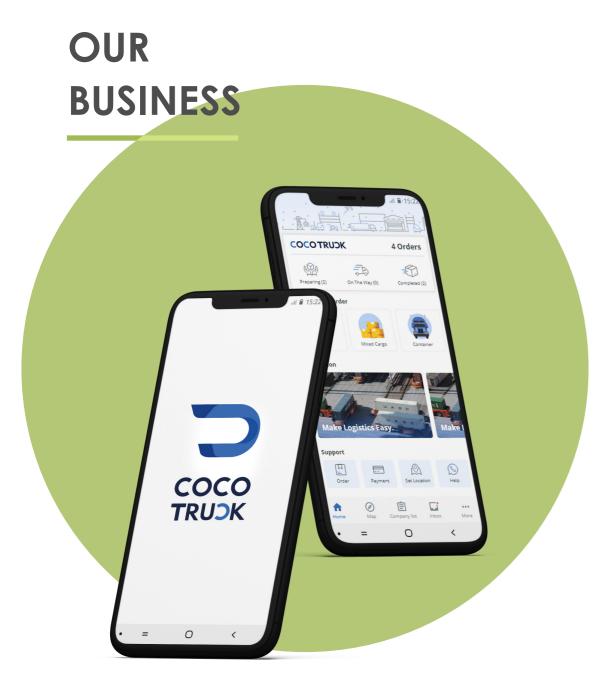

Coconut Silo is promoting a proactive response to the growing market and securing a strategic position by developing a mobility business targeting developing ASEAN countries.

Just like the potential of a coconut, which is known as the subtropical energy source, the new future created by Coconut Silo will contribute to a new transformation and the broadening of the horizons of the startup market.

*ASEAN: Association of Southeast Asian Nations

Kim Seung-yong, CEO of Coconut Silo Co., Ltd.

COCONUT SILO

COCO TRUCK

Faster and Reliable Logistics Platform

MAKE LOGISTICS EASY!

COCONUT SILO

Vietnamese manufacturers are incurring huge costs due to inefficiencies in logistics. By using COCO TRUCK, you can lower your logistics costs and increase efficiency.

It is easy to request transportation, and you can check the logistics flow at a glance. In addition to truck information, it enables companies to reduce transportation costs through optimal route guidance algorithms and trace algorithms.

Inefficient Vietnamese logistics transport market

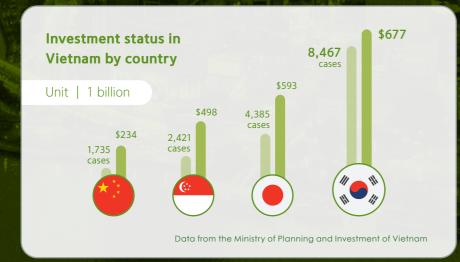

Customers in Vietnam's logistics and transportation markets communicate via email or phone.

Until transport matching is achieved, inefficiency costs will continue to be shared among shippers/carriers/car owners due to increased waiting time.

Continued growth in Vietnam's manufacturing industry

Vietnam's manufacturing industry continues to grow, and thanks to this, growth in the logistics industry is explosive as well.

In addition, as foreign investment in Vietnam is steadily increasing, this growth is predicted to continue for the time being.

OUR BUSINESS

Big data based features

- Automatic price proposals based on transaction data
- Al-based smart trace system
- Minimization of empty-transfer rate through matchback algorithm
- · Efficient resource management through FMS

Shipper PC Web / Mobile App

We provide customized solutions to both corporate and individual customers. We can transport cargo at a reasonable price through customized solutions for shippers based on the type, value and location of the cargo.

Carrier PC Web / Mobile App

We provide the best solution to carriers.

We provide not only truck dispatching, but also an integrated fleet management system (FMS).

Car owners PC Web / Mobile App

We provide an easy and convenient solution through the car owner app.

We provide an optimal route through matching algorithms that enable additional income generation.

DIFFERENTIATION

East to Transit

We improve inefficiencies to create an advanced logistics market.

Price Competitiveness

We lower fixed shipping costs for shippers by setting reasonable prices through an analysis of 27 pricing factors.

Realtime Location

Based on real-time location information, we can track cargo and efficiently manage the resources of shippers/carriers.

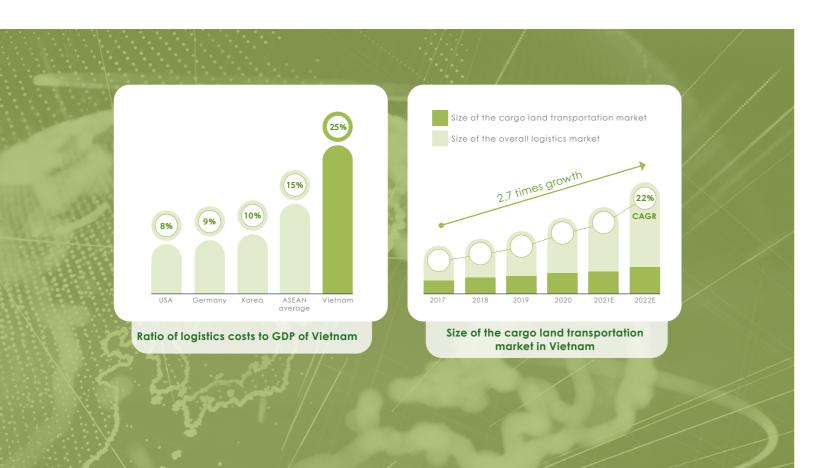

3rd Party Services

Based on the introduction of third-party programs such as insurance, oil refining and maintenance, all types of customers can save about 25% on fixed costs.

We will open a new way.

Applying a high value-added business model through Korean and foreign companies in Vietnam & cross-border

- \cdot Vietnam's logistics industry accounts for 20-25% of GDP and is growing at an average annual rate of 12%. $^{\rm 1)}$
- In addition, the size of the Vietnamese cargo land transportation market is growing at an average annual rate of 22%, having expanded by 2.7 times over five years. 2)
- The policy of "Plan for the development and enhancement of Vietnam's logistics industry (Decision No.200/QD-TTg)" came into effect.
