

GCF Certification: The mark of quality, reliable and secure mobile devices

MWC Barcelona 2021

This GCF document is confidential information and subject to copyright protection

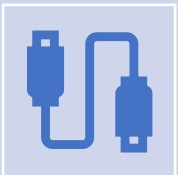

Interoperability matters - and will improve your product, service and bottom line.

Over 150 manufacturers and networks rely on GCF Certification to ensure mobile devices are interoperable with networks and services.

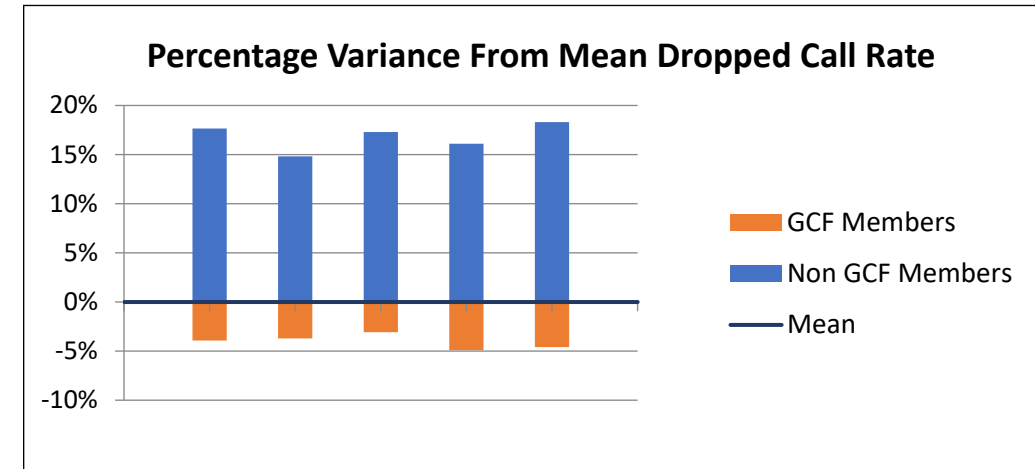

GCF Certification demonstrates compliance to key industry standards: 3GPP, GSMA eSIM/RSP, oneM2M.

GCF Certified devices have 20% lower dropped call rates compared to non-GCF Certified devices.

Quality, reliable and secure communications are essential for the successful roll out mobile services and Internet of Things (IoT) solutions across industry and society.

GCF Certification is trusted and used by major brands

Networks

Manufacturers

Over 330 member companies are part of GCF. For the full list please see our website.

Major brands certify a wide range of products...

- Smartphones
- Modules
- Chipsets

- GCF Certification covers:
 - 3GPP (5G / 4G LTE / 3G UTRA / 2G GSM / NB-IoT / Cat M1)
 - 3GPP frequency bands used by GCF's Operator members.
 - Internet of Things (IoT) Security
 - oneM2M
 - eSIM RSP for consumer devices.

Over 700 products per year - representing sales of billions of units – are GCF Certified

Ready to certify with GCF?

GCF certification for confidence in interoperability

Join our growing community...

- [Join GCF today](#) to ensure your products and services meet the high standards of quality, reliability and security expected by today's consumers and industrial users.
