Loss prevention function

Register My Hero

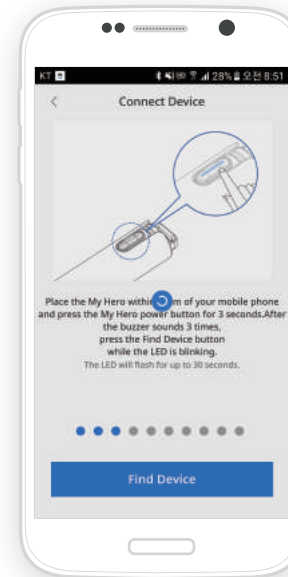

① Login

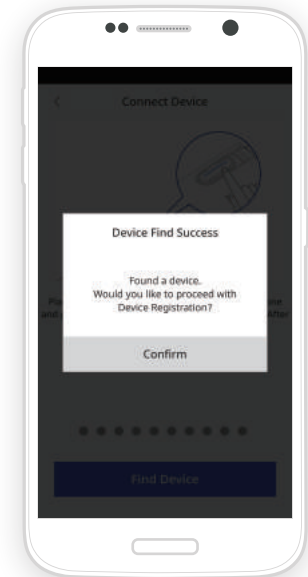

② Select 'To register a device'

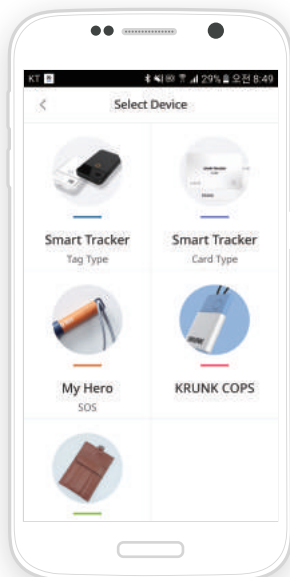

⑤ Find a device

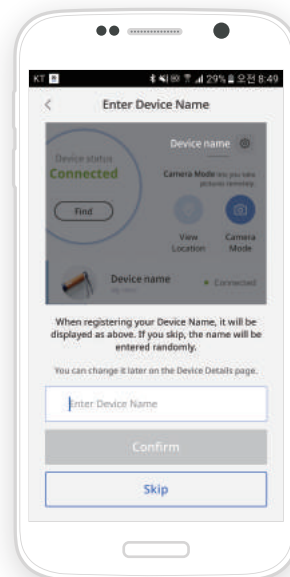

⑥ Device Find Complete

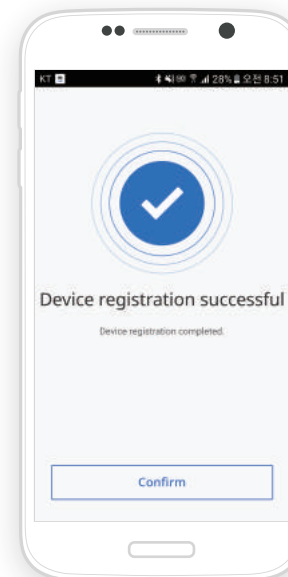

③ Select My Hero

④ Enter Device Name

⑦ Device registration complete

🔴 Delete My Hero, Set up page → Select and delete the bottom 'Delete Device' button

- ※ If you continue to fail to register your device, please contact the service center.
- ※ Keepit designs and specifications can be changed without notice to improve quality.
- ※ For more information, see the EHI homepage.(www.ehisoft.co.kr)
- ※ Set the smart phone 'bluetooth' function to 'ON' to register and use the device.
- ※ Smartphone must have GPS and Internet connectivity enabled before you can use the SOS Emergency Message Service normally.
- ※ The device is affected by the communications and Internet environment, and depending on your environment, SMS may not be sent 100%.

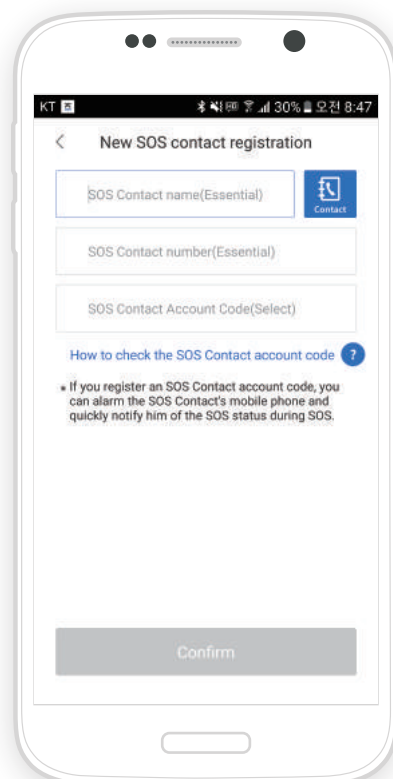

Manage SOS Contact

Device settings → Manage SOS Contact → 'New SOS contact registration'.

To register a new acquaintance, you can enter the name of the person to whom you want to receive the SOS, the phone number, and the SOS Contact account code. It can be called up from the address book of a mobile phone.

If the person you want to register has installed Keepit App, enter the SOS Contact account code.

Not only SOS messages, but also the Keepit App. can alert to danger with a warning pop-up.

Registering a phone number to send an SOS will send an emergency SOS message to the acquaintance when the instrument cover is removed.

Send SOS Message

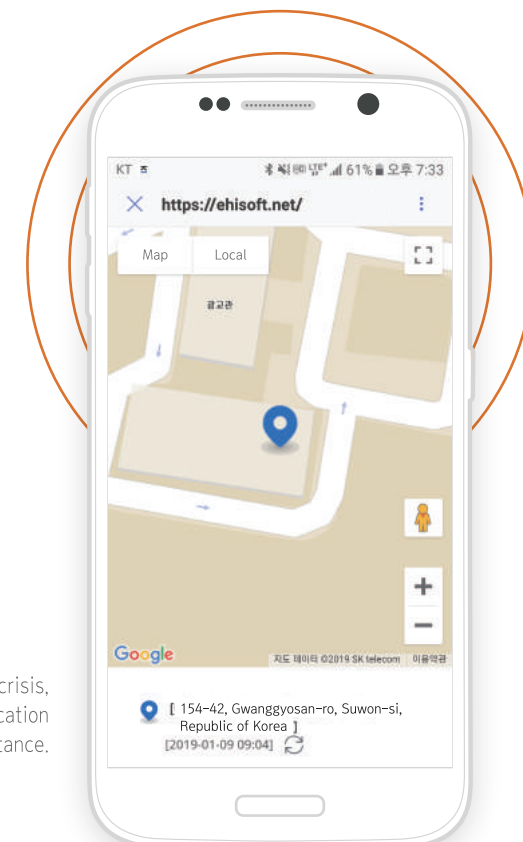

When the body case of the device is pulled out, the product will operate and sirens will sound on the product and cell phone.

If you have registered an acquaintance to send SOS, an SOS message is sent as soon as you pull it.

Messages contain current location information, pre-registered messages.

Text message content can be modified on the Manage SOS Contact → Message Content

※When operating the product, the sirens from the product and mobile phone can be turned on/off in the Device settings.

If you remove the product cover in case of a crisis, you can automatically send the current location information to the registered acquaintance.

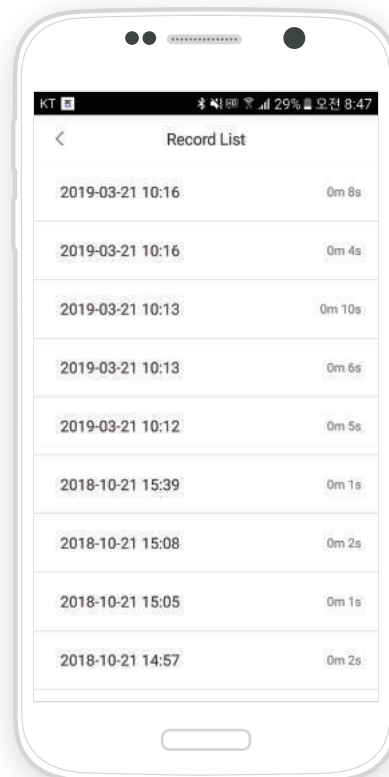

Automatic Recording

You can view the recording list on the Device Settings → Record List.

If the device is operated, a recording function is performed on the mobile phone for up to three minutes until the cover is closed to shut down.

The recorded files can be used as evidence material and can be stored or transferred to others through "export recording files."

※The automatic recording function can be turned on/off in the device settings.

The saved recording file is kept for three months, but is not preserved when you delete the app's internal data, delete the app, or log in to another mobile phone.

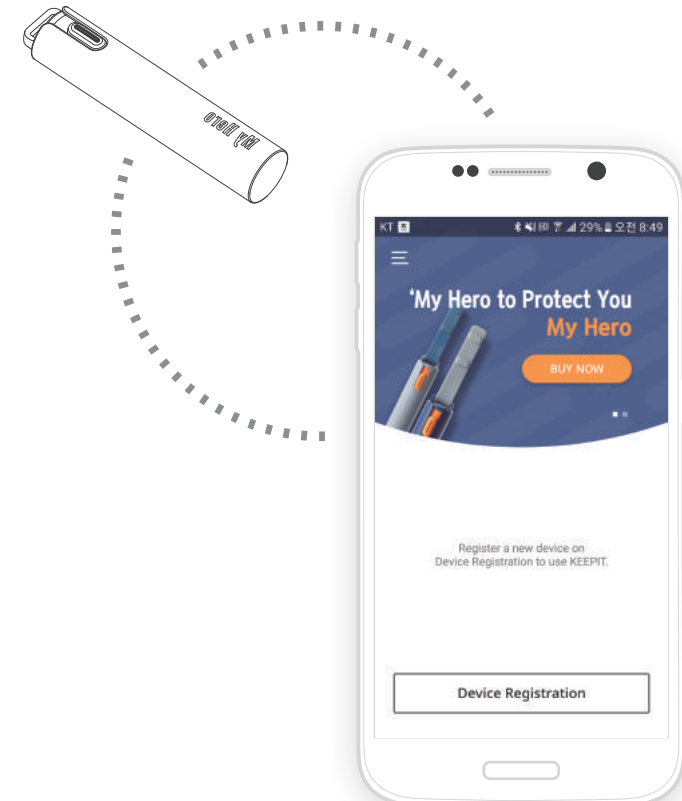

Loss prevention function

My Hero and mobile phone communicate via Bluetooth(20 ~ 30m).

If the connection is lost, an alarm sounds on the device and cell phone to confirm the loss of the device, and the location of the device's loss can be checked through the phone. (Device Main → 'View Location', map out the last disconnected location.)

※If My Hero and the mobile phone are connected, they can find each other.

Cell phone alarm sounds when power button of My Hero is pressed twice fast
Keepit App's main → My Hero buzzer sounds when 'Finding Device' is selected

Q&A

Q. Do you have monthly fees or terms?

A. No, there are no separate terms or monthly fees,
All customers are available regardless of their smartphone provider.

Q. Can I prevent an audible alarm from occurring in My Hero?

A. Yes, you can mute it in the Keepit App.

Q. How many acquaintances can I contact?

A. Up to 3 people can be set in Keepit App.

Q. How do I know if it's normal to use in an emergency?

A. If normal operation occurs, the green LED will illuminate.
If the Bluetooth connection is lost, the red LED will illuminate.

Q. Does the My Hero device itself produce an alarm?

A. Yes, if you pull out My Hero's body case in an emergency,
The instrument will emit a 90db alarm.

Q. Can I locate GPS only when I turn it on?

A. Yes, the GSP of the smart phone must be turned on before it can be located.

Q. How can I check voice recording?

A. In an emergency, if you take out My Hero's body case, you can record your smartphone.
It is automatically activated and recorded for 3 minutes.
The recorded voice can be checked through the Keepit App.

Q. How does it work?

A. The smartphone and My Hero are paired (connected) in a low power Bluetooth manner.
※If the smartphone is turned off, the Bluetooth connection will be lost, so message and location information cannot be transmitted.

Q. How long is the battery used?

A. Normally available for 4 to 5 months. If the battery is below 20%, the app will notify you when to replace it. It also comes with two extra batteries for one additional use.

Q. Are there any types of smartphones that cannot be paired?

A. Bluetooth 4.1 communication works only on smartphones with Android 4.4 or higher and IOS 8.0 and above.

Q. Can I transfer it to someone else?

A. Yes, you can transfer the device after deleting it from the Keepit App.
(App. 'Device management' → 'Edit' in the upper right corner → Select MY HERO and then 'Delete')

Q. Is it possible to change the contents of text messages?

A. Emergency messages can be freely changed within 40 bytes to the desired text (address, emergency details, etc.).

Q. Is it available overseas?

A. It can be used overseas, but it requires roaming service.
If you are not roaming, only an audible alarm will occur in My Hero.

Q. What are the rules of the A/S and warranty period?

A. If there is no customer room, we will exchange it for 6 months.
