World Best
Smart Communication
solution Voice AI Things™

Technology Inc.™
AI IOT 5G DIGITAL DATA COMPANY

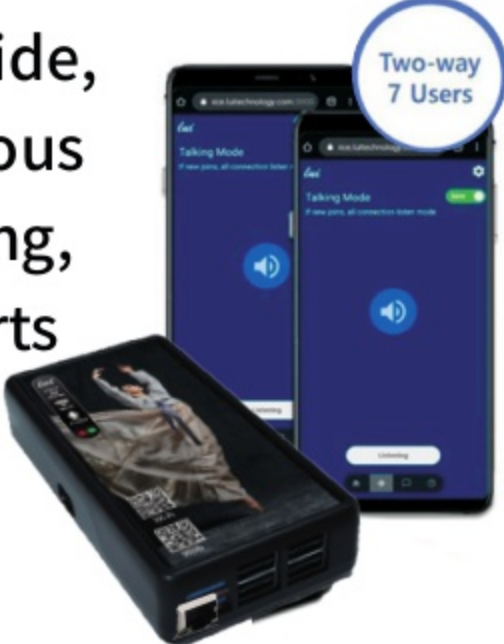

01. WHY

The FM receiver, which is an essential item used in conferences and workshops, has many problems, such frequency collision and return, battery recharging, and recycle reuse due to technical limitations. It is a **premium product** that improves the satisfaction of attendees with **patented technology**.

No **APP** / No **Receiver** / No **Wi-Fi** AP

Business meeting, Tour guide,
Cultural event, Simultaneous
interpretation broadcasting,
Work-study, Leisure, Sports

02. SOLUTION

It provides the highest quality **HD-quality live audio** service through the smart phone of the participant with **only a smart phone Wi-Fi connection**, and all the contents sent and received are **provided as digital files** through the smart phone of the participant.

Anywhere on the web and apps
without a receiver
