Since 2013, we have been delivering creative solutions that untangle complex challenges and lead to innovation

Echoss Stamp & O2O

The Echoss Stamp and Echoss Platform provide an optimized infrastructure for engagement-focused mobile services. The Echoss Stamp is used in stamp promotion, stamp card, mobile voucher, ticket, and mobile payment services around the globe.

Echoss Fintech

The Echoss Fintech Platform is a tech framework that supports a wide variety of financial and fintech services. This includes microservices for financial institutions, Fintech SaaS, and payment service business models.

Echoss Big Data

The Echoss Platform processes between 9 and 12 million data points daily originating from services around the world. 12CM partners with companies to augment existing Echoss data and develop new business models based on data sampling and analysis.

Global brands and service providers harness the power of Echoss software to create powerful mobile services tailored to their needs.

Learn more about how to uncover new growth opportunities, develop and deploy innovative solutions, and deliver world-class customer experiences. Be a part of the innovation revolution that Echoss is leading!

Echoss Software is hosted in 7 different AWS Regions. 12CM is a proud Select Technology Partner of AWS.
