

Robustel Cloud Manager Service (RCMS) is a modular IoT cloud software platform compatible with all Robustel products. RCMS is designed from the ground-up to empower Robustel customers to build their IoT Solution (s) in a manner that is scalable, cost effective and can evolve quickly with the market. Designed to work hand-in-hand with RobustOS, RCMS unlocks the true potential of Robustel products giving customers the ultimate range of monitoring, management and control functions.

Monitor

The RobustLink APP inside RCMS gives you visibility of your entire Robustel device fleet in a single location from anywhere in the world. View device status, signal strength, data usage and WAN details for any device connected to the touch of a button.

Manage

Use the RobustLink APP inside RCMS to access your devices remotely to change configuration parameters or send device commands through remote Command Line Interface (CLI) access. Maintain your fleet through Over-the-Air (OTA) updates for Firmware, APPS and Configuration files in bulk or for a single device.

Control

Use the RobustVPN App inside RCMS to create a virtual LAN for your devices that can be accessed securely from anywhere in the world using the preconfigured desktop VPN client.

PRODUCT CATALOGUE

NOTE:Specifications are subject to change without notice.

Smart
Metering

Recommend product: M1200, R3000, R3000 Lite, R1500

The industrial level oriented product design enables the M1200 to provide 24h/7D online communication for remote data collection in harsh environments with intense weather of electromagnetic interference. Compatible with 3rd party cloud platforms and onboard intelligent applications like Modbus TCP to RTU conversion, remote management, configuration, and OTA firmware updates simplify the integration, installation, operation and maintenance of any wireless IoT solution.

Water
Management

Recommend product: R3000 Lite, R2000, M1200, R1500

The R3000 Lite Dual-SIM router in combination with 3G/4G coverage provides a reliable and continuous communication solution for real time monitoring. The rugged design provides reliability in environments with extreme temperature and humidity. Programming the R3000 with an always-on wireless connection and RCMS VPN ensures 24/7 access to critical data when you need it.

Recommend product: R5020, R2110, R2000, R1520

Robustel's 3G/4G routers are commonly used to provide Passenger WiFi solutions for vehicles ranging from a taxi to a high speed train. Robustel's ability to deliver 802.11ac WiFi and LTE CAT6 communications in an industrial package provides the perfect platform from which to build fast and very cost-effective Passenger WiFi systems.

Passenger
WiFi

Recommend product: R3000, R3000 Quad, R1520, R1510

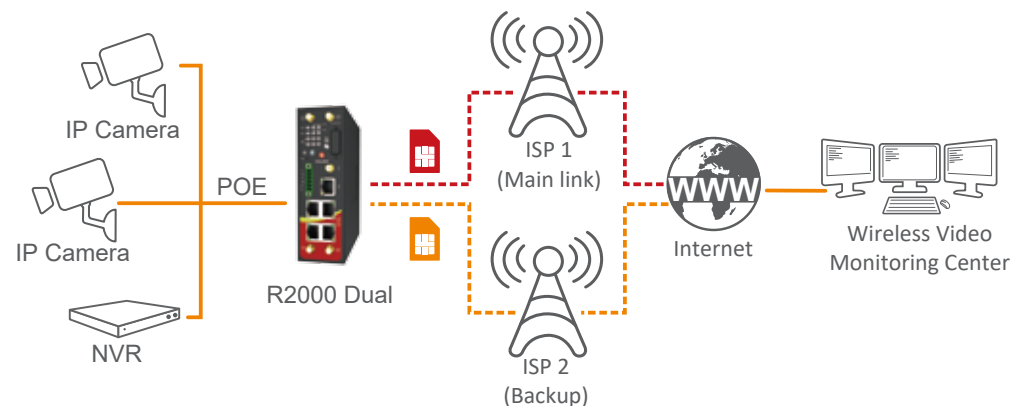

Industrial
Automation

CCTV

Recommend product: R2000 Dual, R2000, R3000 Quad, R2110

The R2000 Dual provides solid 4G/LTE connectivity with dual module failover to maximize upload bandwidth and network availability for video surveillance systems, and through POE, users can use RCMS cloud to control the ON/OFF of remote cameras.

Self-service
Kiosk

Recommend product: R2000, M1200, R1510, R1520, R2110

R2000 Ethernet VPN router combined with advanced 4G LTE technology provides wide band cellular communication and secure VPN tunnels for remote on-site Kiosks. A fully open SDK with Java support makes the R2000 a great choice for custom application for finance and vending.

		Model		Cellular	SIM	Cellular Antenna	Ethernet	Serial	CAN	Voice	USB	I/O	MicroSD	GNSS	POE	LED Indicators	Wi-Fi	Power Supply Input Range	Mounting	Dimension Weight	Operating Temperature	Approval	Software	Firmware Upgrade
