9-TYPE LIFE TAILORED
SMART OPERATING MODES

USER SET
This mode is to set the temperature / air volume / time as desired by the user.

TURBO DRY
It is a drying mode used after taking a bath.
The program is set to dry the hair of pet in just a short time.

GENTLE DRY
It is a drying mode used after taking a bath.
The program is set to dry the hair gently while minimizing stress.

COOL DRY
It is a drying mode used after taking a bath. The program is set to dry hair at low temperature in summer. Best for pets that feel a lot of heat.

NEW CARE
It is a care mode used if you are unable to walk the pet due to health or environmental problems. This program is set for pets to receive care comfortably.

WALKING CARE
It is a care mode used after outdoor activities. The program is set with a strong wind to shake off the dust from the pet's body and receive care.

WARM HOUSE
This function makes the inside of the dry room warm and cozy. This mode is for cold winter or older pets.

COOL HOUSE
This function makes the inside of the dry room cool and comfortable. This mode is for hot summer months or for pets that feel a lot of heat.

SELF-CLEANING
This mode sterilizes the inside of the dry room with UV-C LED and warm air.

⚠ WARNING Please make sure to take the pet out of the dry room and close the door to prevent UV-C from being directly irradiated to the eyes or skin.
