

# GL.iNet Express Wi-Fi (XWF) Hardware Solution

E-MAIL [sales@gl-inet.com](mailto:sales@gl-inet.com) | WEBSITE [www.gl-inet.com](http://www.gl-inet.com)

The Express Wi-Fi (XWF) platform is a set of cloud based services provided by Facebook to help Partners run a sustainable pre-paid Wi-Fi business. GL.iNet provides a wide range of XWF certified devices with affordable prices and user-friendly device cloud management.

## Benefits of XWF certified GL.iNet devices

### Easy Deployment

XWF certified GL.iNet devices can be deployed on a user-friendly device management cloud with a variety of customizable features.

### Simple To Manage Network and Data Usage

With just a few clicks, you can use the GL.iNet GoodCloud platform to manage and optimize your network and the powerful tools made by Facebook to monetize user Wi-Fi usage.

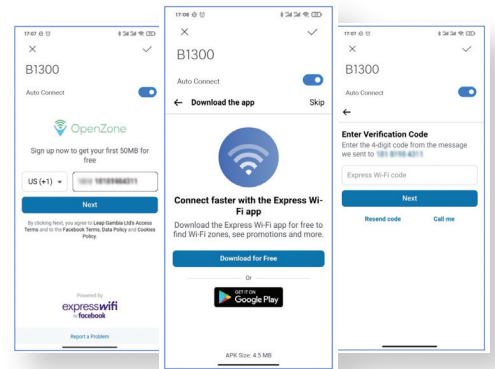

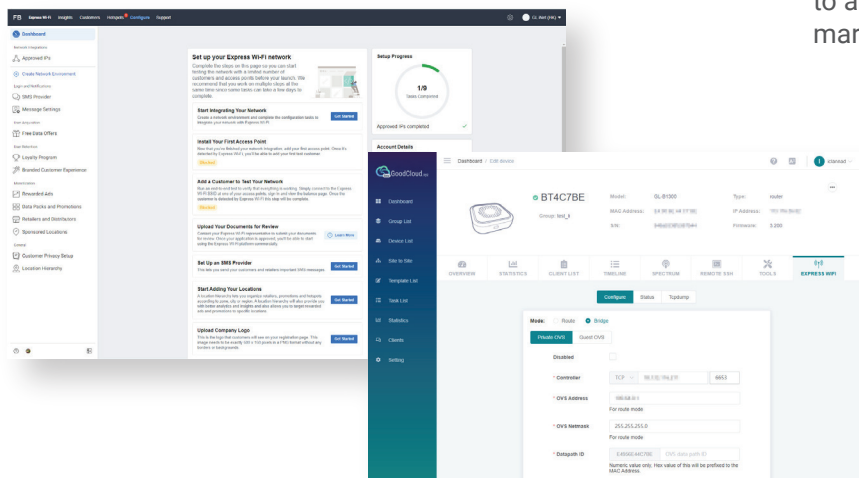

### Affordability

GL.iNet provides a wide range of XWF certified devices with affordable prices for enterprise projects and business large or small.

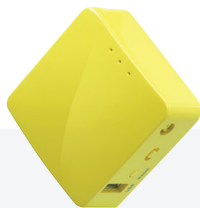

### New Business Opportunities

GL.iNet XWF hardware solution unlocks new markets, maximizing customer value, increasing revenue returns, creating better employee and customer engagement while allowing you to access new customers and verticals markets.
