

# IMQA

## Mobile Performance Management Solution

IMQA analyzes the root causes of various failures, which may be difficult to resolve through crash reports alone. Analyze your mobile app's performance in a user orientated environment.

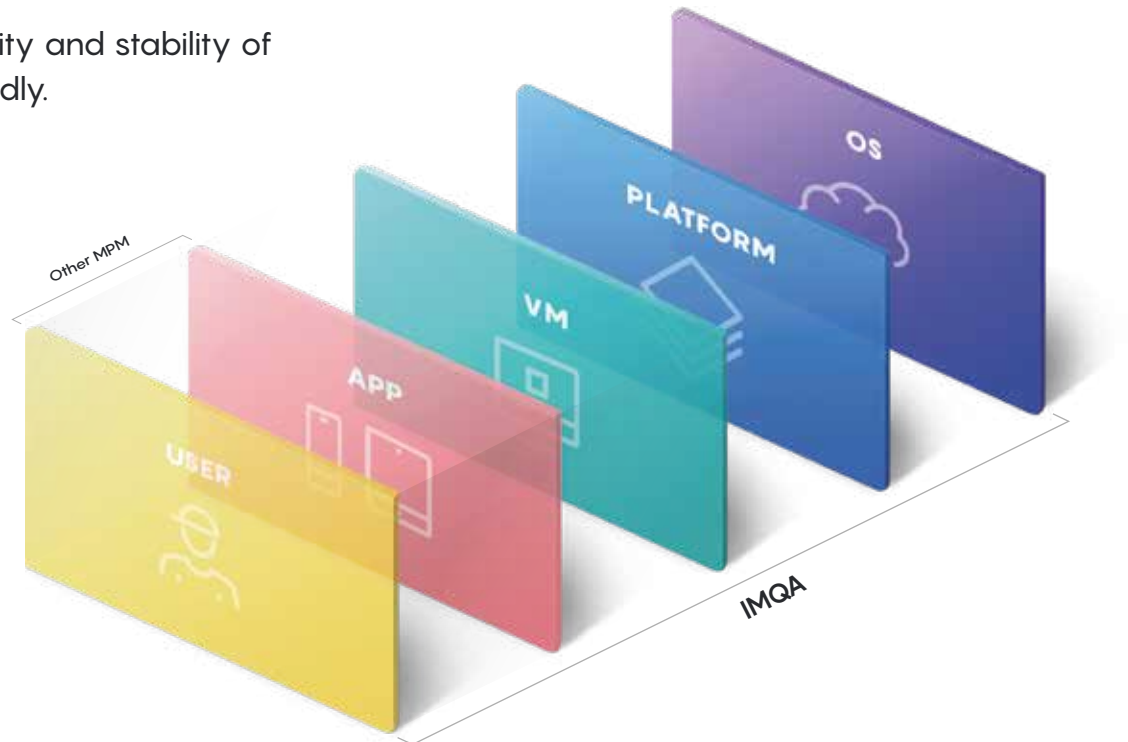

# Mobile Performance Management Solution Analyze Across All Layers of Mobile

IMQA MPM can track all layers and single details of your mobile apps.

- Crash with other services
- Resource Usage Analysis
- Relate with Users Environment
- Issue Diagnosis Code Level

Improve the quality and stability of mobile apps rapidly.

## User Environment-oriented Performance Analysis

You can discover the root cause of failures through linked analysis of various indicators, such as User Activity, screens, processes, analysis of the operating system version, and regions and types of devices used.

## Resource Usage Analysis

IMQA MPM pinpoints which fields are using a large amount CPU, memory, network, Native/WebView UI rendering, and other such resources.

## Issue Diagnosis and Code Level Analysis

IMQA MPM compares the root cause of the failures with the stack information to analyze the resource usage and overall correlation, allowing it to define the cause of the mobile application's problems clearly.

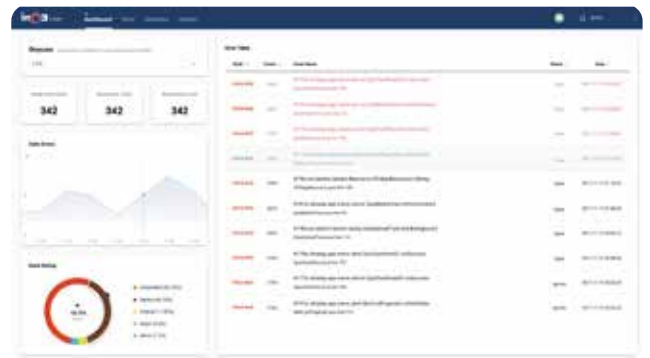

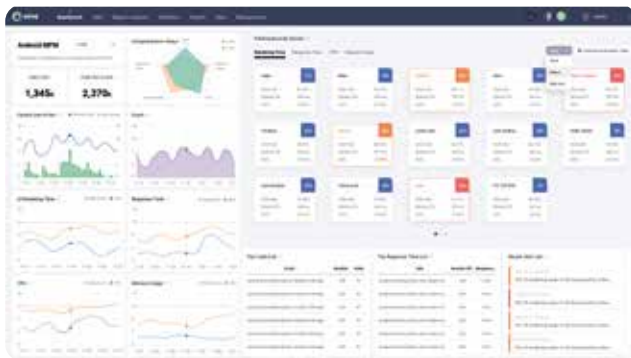

## Statistics and Reports

Print analysis reports in any period format, whether it be as a daily report, a weekly report, or even a monthly report.

IMQA = MPM (Mobile Performance Management) + Crash Report (Analyze Issues)

# Have you concerned about your mobile app's performance?

IMQA is a **Mobile Performance Management Solution** that enhances the quality of End to End by handling pre-launch status, error collection, and user monitoring.

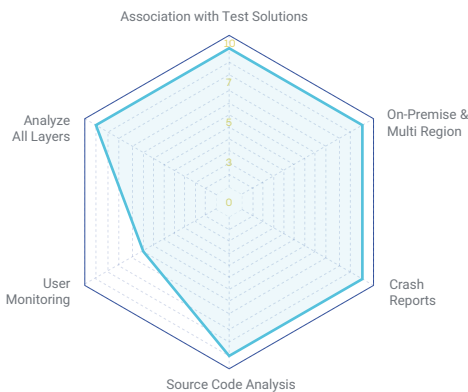

IMQA is the first MPM on a source code level analysis in the world. Enhance the quality of your service through monitoring all layers of mobile platforms. In addition, analysis of various perspectives about the causes of problems and solve them immediately.

Determine the cause of problems and tracking the relation with resource usage immediately when the mobile app has closed unexpectedly. IMQA Crash is not confined to collection of data in specific markets and regions, unlike other solutions. (Supported SaaS and On-Premise)

## Competitiveness

**N Solution**  
Server and some performance monitoring

**A Solution**  
End to End server statistics and analyze reports

**S Solution**  
Crash report and source code debugging

Once implemented, IMQA will make a clear difference.

# Monitor your apps with IMQA tailored corporate infrastructure environments in real time.

Concentrate on your business.

We provide optimal monitoring solutions for managers of various divisions.

- Operate mobile apps works stably  
Service Admin
- Quantified performance basis  
Project Manager
- Analyze the causes of failure and solve the problems rapidly  
Developer
- Consider customer's satisfaction  
Customer Admin

Customers who have chosen us and trusted.
