TRACKER SET
PHL-1000K (RC)
PACH-100N (AR)

App 🔍 **PHEW TRACKER**

Bluetooth Tracon 11P ~

1. Precautions before use (2p)

Regarding the Bluetooth communication distance

**When using indoors by connecting APP ↔ PHEW®TRACKER**

There is no problem with communication in one space. (Living room)

There is a ``wall'' between the space and the ``door''. (Communication disturbance)

It is recommended to use it in a specific space.In the case of Bluetooth communication, it is a communication standard optimized for short distance.

Reference

-Substances with low probability of interference: wood, glass, and most plastics

-Substances with medium probability of interference: water, brick, marble

-Materials with high possibility of interference: gypsum, concrete, bullet-proof glass

(inner walls of buildings)-Substances that cannot be communicated: Metal

(apartment door, door material of general house)
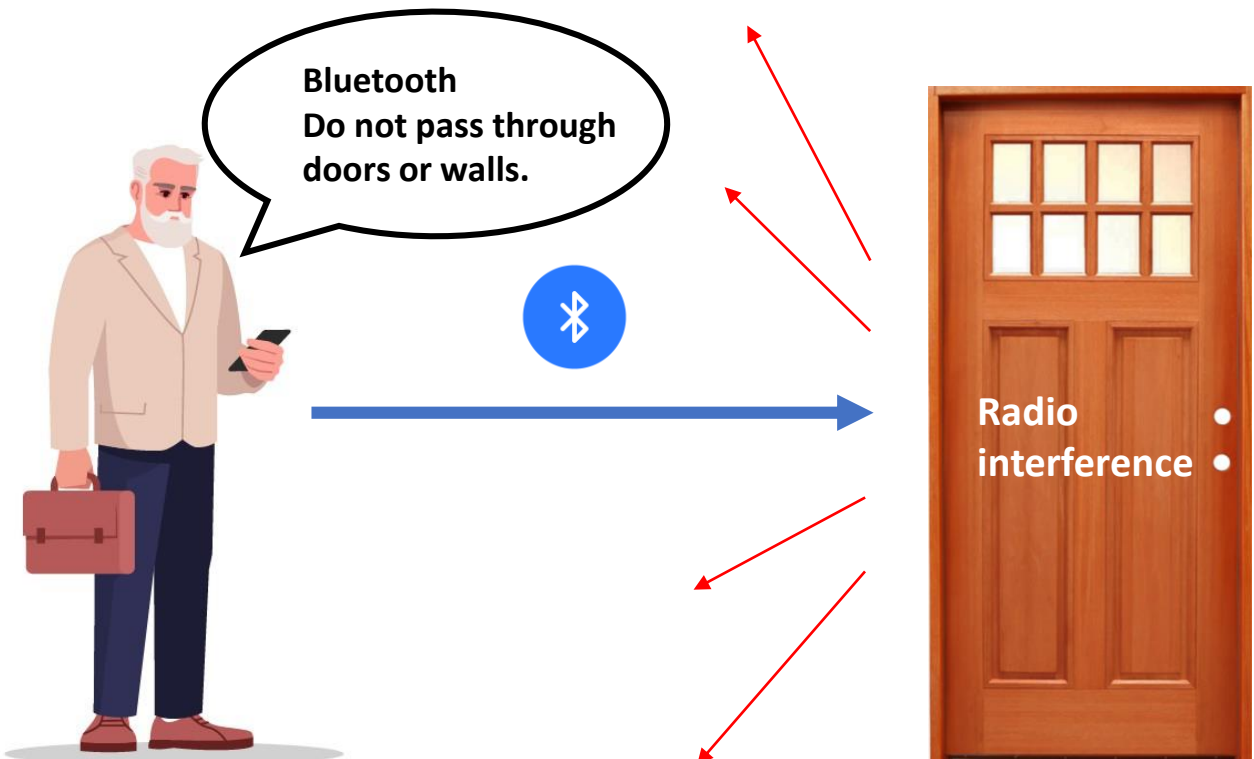

If the space you want to live or use is a two-story house,Communication between the second floor and the first floor may not work well.

Use in a spacious living room,

**private office space**

in your own room

Living room or Use in the room
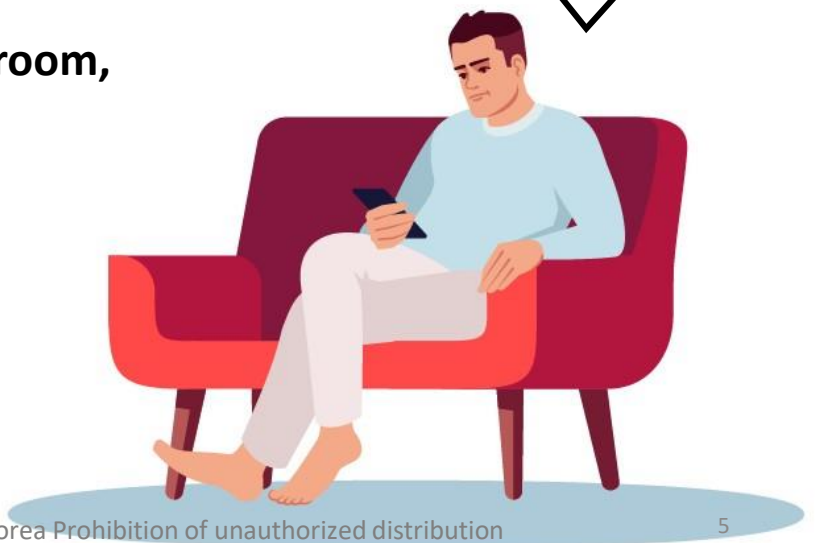

One-room type, convenient in the room

Monthly mansion, studio, detached house, apartment

Own
Use in space

If you don't like the exit melody, set the mute mode

2. How to Use AR Tracker and Problems (1)

Let's call the smartphone → PHEW® Tracker.
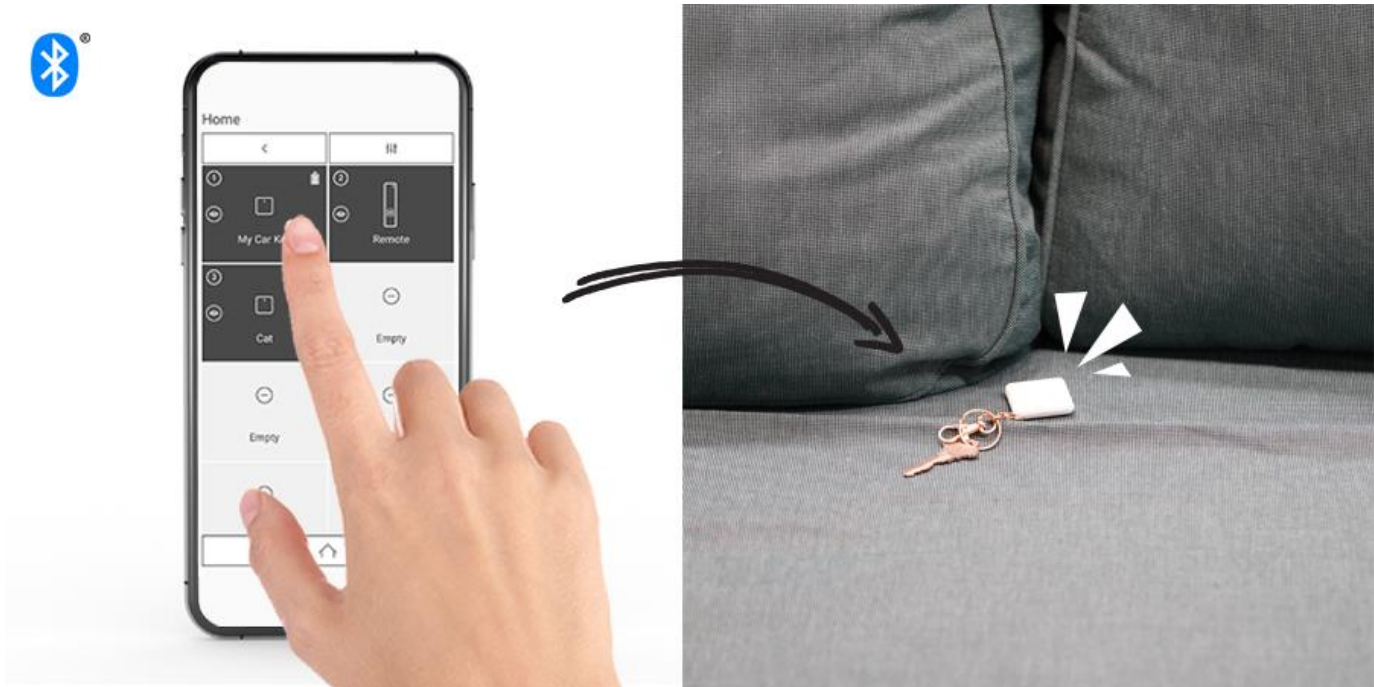

When the smartphone and the ↔ PHEW® tracker are within a communication distance

You can listen to the melody (buzzer sound) by calling Applications → PHEW® Tracker.

If communication between the Pew® tracker and the smartphone is interrupted,

within 10 seconds The melody set as a red alarm on the application screen occurs,

You can recognize the loss.

※ A place with a good view without obstacles, about 10-50m from about 10-50m on a flat ground

★ I really don't know how to do it! Inquiry by e-mail

2. How to Use AR Tracker and Problems (2)

From PHEW® Tracker → Find your smartphone.

When you are in a hurry to go outside!

Your smartphone goes unnoticed! In that case, don't rush

Double-click the PHEW® Tracker button twice.

We will tell you where your smartphone is ringing.

The melody lasts about 3 minutes,

The sound stops when you touch the blue flashing slot.

The melody of the smartphone can be changed in the settings,Volume can be adjusted.

Please check on the settings screen
