

The biggest, fast growing, experienced Polish manufacturer offering a wide range of smartphones, rugged phones, feature phones, & laptops.

Our devices are available in 15 European countries. We believe that the cutting-edge products should be available to everyone. Thoughtful solutions, functionality and economics together with great design, pure Android and the most up-to-date solutions make our devices being sought by clients.

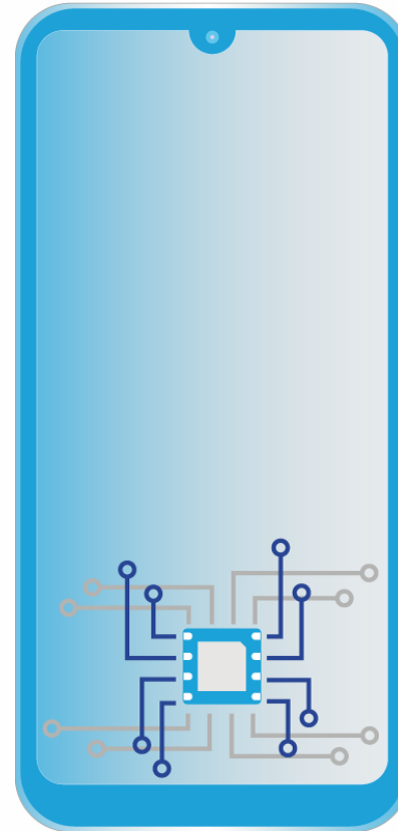

SIM EVOLUTION

Over the last 25 years sim card has evolved changing from the size of the payment card to the size of the nanoSIM and finally embedded micro chip.

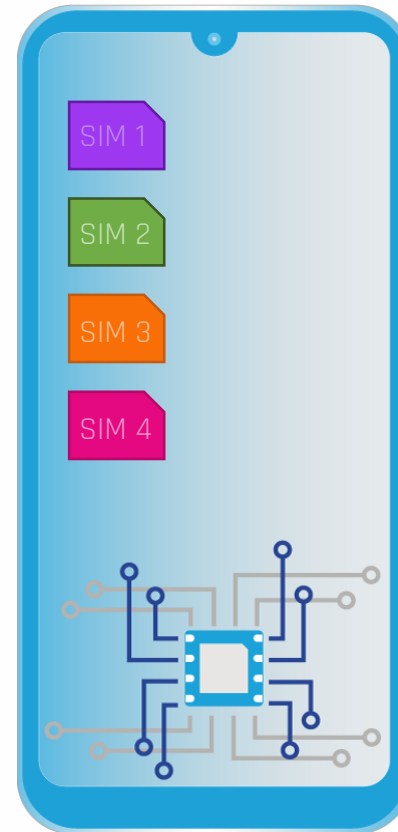

WHAT IS e-SIM?

embedded-SIM
is an equivalent of
traditional SIM card,
integrated into the
mother board of your
device

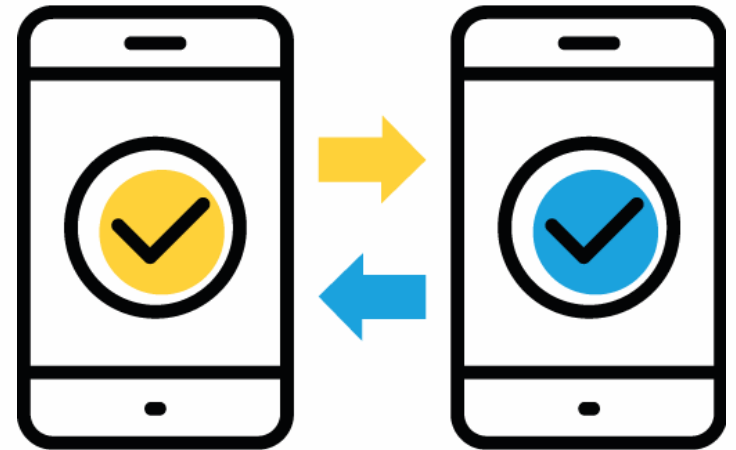

MULTIPLE PROFILES

eSIM devices can store
multiple SIM profiles,
so you can easily
switch between them
on a single device.

KEY ADVANTAGES FOR **END-USER**

- ✓ Choose operator dynamically
- ✓ Freely and easily activate and deactivate your profile
- ✓ Add local SIM while roaming
- ✓ Switch between different devices

KEY ADVANTAGES FOR OPERATORS

- ✓ Digitalized relations with customer
- ✓ Faster adaptation of new offers
- ✓ Service via customized app
- ✓ More devices to contract
- ✓ New business models – B2B, B2C, IoT
