

# Company Advantage

---

## 01

### Complete industrial chain

From chip to final product, all manufactured within the mainland of China, the production process is controllable, when in mass production, the lower product cost of the industry could be reached.

## 03

### High performance and stable operation

Fast satellite acquisition, integrated design, low profile, light weight, no moving parts, low later maintenance cost.

## 02

### Strong R&D capability

Mature phased array technology, R&D team with over 10 years of practical product development capability, mastering core self-developed MMIC chip, which adopts Cmos and GaAs.

## 04

### Excellent after-sale service

2 year product warranty, professional technical training, 24 hour online trouble shooting, remote and on-site professional guidance.
