Real Time collaborative editing for group projects

Group chat
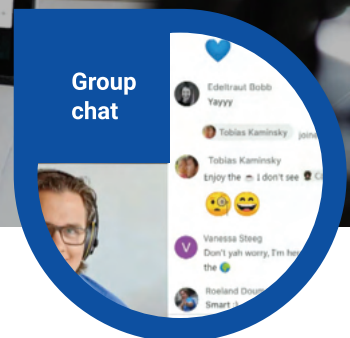

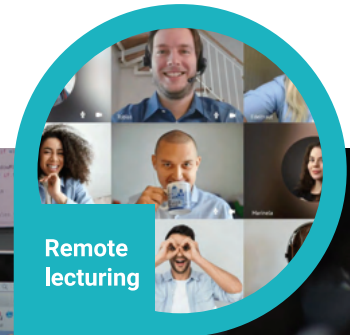

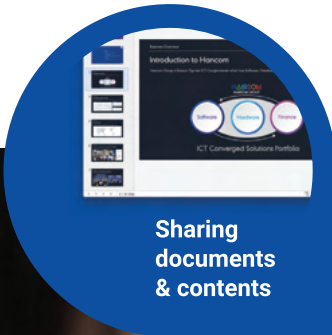

Reference case

Meet Institute's scalability requirement

In 2014, students at the TU Berlin had 10GB of storage assigned, growing to 30GB quota for students and 100GB for staff in 2017. The TU Berlin's 22,000 users are storing 70TB of data and changing over 80,000 files out of a total of over 100 million every day. Hancom Works handles such numbers with ease as evident at universities around the globe.

Scale globally

Global Scale delivers a true globally scalable solution for deployments with hundreds of millions of users, giving unprecedented control over the locality of data and delivering dramatic cost reduction.
