

HIVE FLOW.

An agentless solution to manage
your home network.

Take control of your home network with HiveFlow.

Manage and protect your smart home

Connected IoT devices are becoming **increasingly widespread** in our homes. Yet smart TVs, cameras, switches, smart light bulbs, if not properly protected can be a vulnerability. All these devices can become **points of access** for attackers to breach privacy, steal data and identities. HiveFlow is an **agentless solution** that allows you to monitor and protect all your home devices, **keeping** you updated on what's happening within your network.

Achieve digital balance in the family

Children spend far **too much time online**, nowadays. Keeping an eye on children and teenagers' online experiences is a full-time task. Parents often lack **visibility into their kids' content** and can't manage the amount of time their kids spend with their devices. How to cope? With HiveFlow you have an **agentless solution** that allows you to set **usage rules**, create **healthy digital habits** for the entire family and protect your children from inappropriate content and **malware**.

HiveFlow.

Manage and protect every device on your home network

HAVE CONTROL

HiveFlow is the agentless solution to **supervise** your children's online activity. Thanks to its application control and web filtering features, control of your home network will **always be in your hands**.

BE PROTECTED

Protect all your devices (human and IoT) connected to your home network against **cyber threats**: device vulnerabilities, man-in-the-middle, phishing, malware, malicious apps and websites.

BE AWARE

Visualize every device connected to your home network to manage and protect them. With HiveFlow you can do it easily and **completely autonomously** thanks to a detailed inventory of devices and an advanced reporting system.

HiveFlow.

Parental Control

Make your home network a safe place

App control

With HiveFlow, **you decide** which application categories are accessible to your children. Do you want them to stay focused while doing homework? Block social media or games and let them focus **on the things that matter to them.**

Web content filtering

The internet can be a dangerous place, littered with inappropriate and unsafe content. With **web filtering**, you can block access to **specific categories of web content** such as adult content at your discretion.

HiveFlow.

Parental Control

Controlling your children has never been easier

Thanks to the **user time management** features, you can manage your children's online experience, **defining the times** for using apps and web browsing.

Digital wellness: decide how many hours your child can devote to the different apps per day.

Off time mode: makes it easy to schedule specific no internet times.

Pause mode: blocks the internet access of individual devices with a simple touch.

Sweet dreams: limits access to devices during nighttime hours.

HiveFlow.

Family Locator

**Be updated in real time
with your kids**

With HiveFlow's Family Locator, you can quickly know where your **children** are in real time.

Create virtual **geo-fences** around the places you would like to be notified about when **they enter or leave**.

Instantly check where all your family members are at the moment with pointers on the virtual map at a glance.

Get a **detailed location history** of all the places your kids' visit. **Check the location** of their phone and find out the date and time each place was visited.

HiveFlow.

Smart priority

We meet your digital needs

Get the most out of your home connection. Choose which services **you want to prioritize**, or let HiveFlow **optimize your Wi-Fi network** speed for you based on your family habits.

HiveFlow.

Secure your devices

The agentless solution
defending against cyber threats

- Protect human devices at **home network level**. Stop unwanted attempts to access your network that target vulnerabilities and configuration gaps.
- A **new leading-edge protection** service against known and zero-day threats and the targeted attacks.
- Protect **against malicious sources** associated with web attacks, phishing activity, web scanning, scraping and more.

HiveFlow.

Protect your smart home devices

Protecting your devices may be more important than you think

The IoT devices that fill our homes are constantly increasing: smart televisions, smart refrigerators, smart heating systems are connected to the home network yet they are exposed to the **same attacks** that compromise human devices. With HiveFlow, **you protect** every device in your smart home keeping **your home network safe** from threats.

HiveFlow.

Block web ads and trackers

Protect your privacy and improve your browsing performance

Many sites include **trackers that collect your information** as you browse and advertising content that makes **browsing annoying**. HiveFlow **blocks the tracking** of your browsing data and invasive advertising, **protecting your privacy** and increasing your browsing speed.

- ✓ Block annoying pop-ups, banners and video ads
- ✓ Block third-party trackers and protect your privacy
- ✓ Browse in complete safety by blocking malicious ads with malware, scams and cryptocurrency miners
- ✓ Improve webpage loading times and enjoy faster Internet browsing

HiveFlow.

Devices Visibility

**You cannot protect
what you cannot see**

HiveFlow **automatically identifies** new human and IoT devices connected to the **home network**, recognizing the type of device and recommending which profile to associate it with.

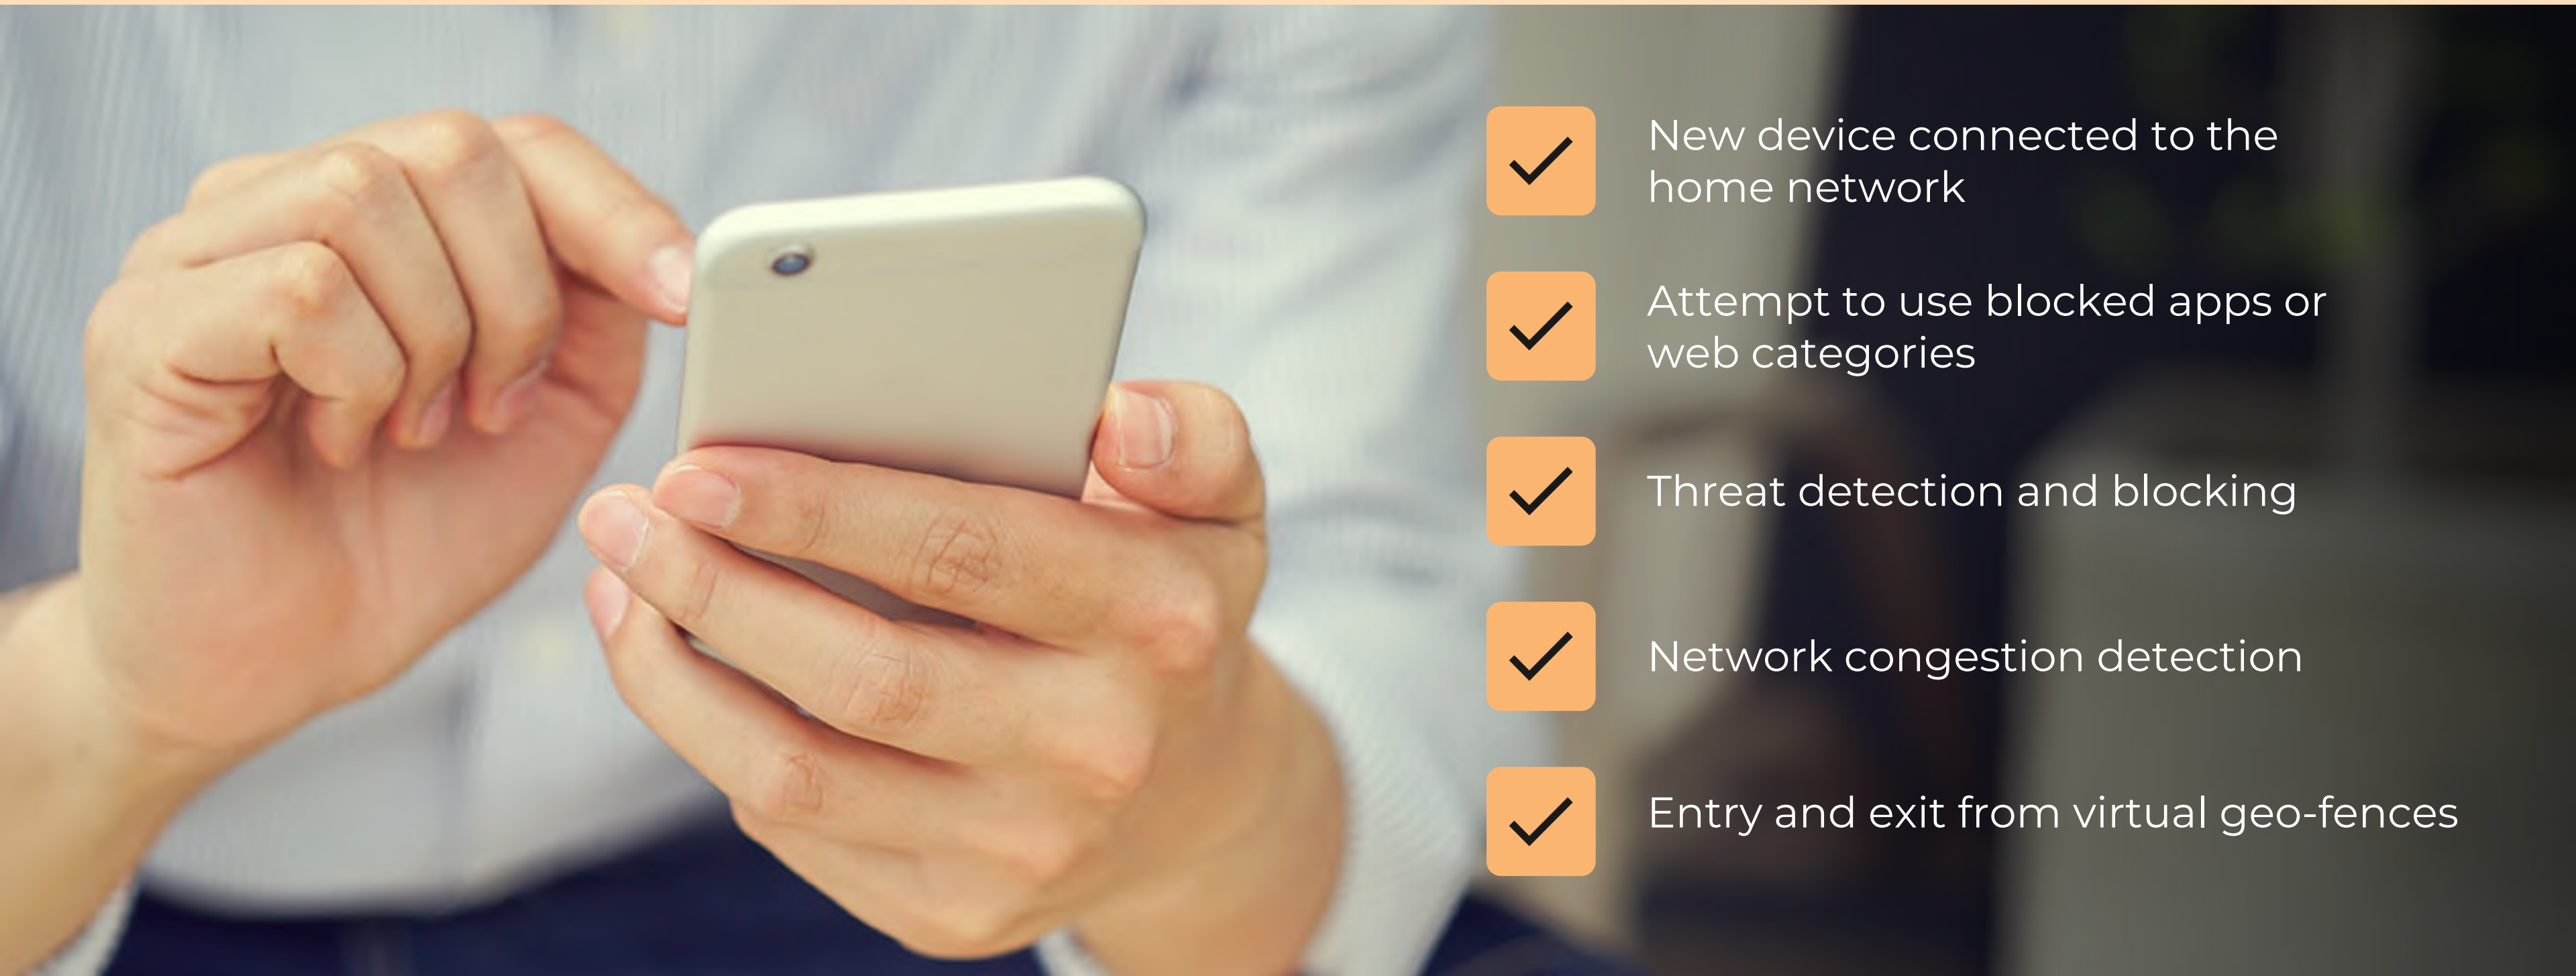

Thanks to our solution, you can manage every type of device and obtain a **detailed inventory** of those connected to your home network.

HiveFlow.

Multi channel notification

Timeliness is everything

Receive notifications **in real-time** through different communication channels such as **email, SMS and in-app notifications.**

- ✓ New device connected to the home network
- ✓ Attempt to use blocked apps or web categories
- ✓ Threat detection and blocking
- ✓ Network congestion detection
- ✓ Entry and exit from virtual geo-fences

HiveFlow.

Advanced report

Stay up-to-date with your family's activity

Thanks to HiveFlow, you can get an idea of your **family's digital usage** and monitor online activity.

- ✓ Usage time by app category
- ✓ Details on your children's browsing history
- ✓ Location history with details of the individual position of each child and the history of previously visited places
- ✓ Network performance reports.
