- Auto Fill MS-Office docs

Reporting & Analytics

- Customized Report
- Business Analytics
- Identify business issues, trends and opportunities
- Scheduled report
- Power BI supported Dashboard

Work with AnyWork

Getting Setup is easy

Plan

Plan your **Digital Forms** and **Work Flows** Work as per your **existing process** without losing time for adapting to new processes

Design & Implementation

Designing is a Breeze with our **Drag and Drop Functionality** that Dramatically reduces the time and complexity for implementation

Full Customization Freedom

Full Freedom is what we guarantee.

Freedom to **design your own workflow**, choose the **input types**, **manage user roles** and **monitor the progress**

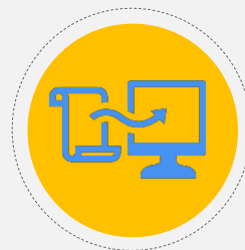

Data Integrity & Security

AnyWork ensures Data Integrity by letting you decide the **mandatory and Optional inputs** and their formats from the users.

User inputs, drop down menus, check boxes, all methods are supported to standardize data input for maximum integrity

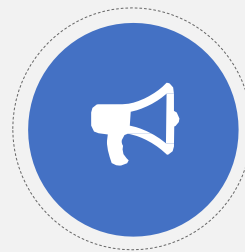

Data Security is guaranteed by being able to manage who can see what information in the single work flow.

Digitization

Digitization sits at the center of AnyWork tool. All documents can be converted to **machine readable formats** and stored with index for ease of Search through OCR.

Don't loose any data and keep track of history.

Announcements

Use AnyWork to reach all users with **Broadcast announcements** or customize the target group to receive any announcement.

Homepage Announcements can be configured with confirmation from **User acknowledged receipt**.

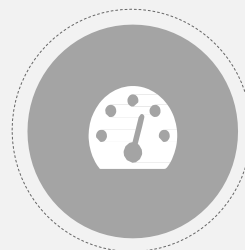

Multi Lingual

Add information in **more than one language** in the same work flow as needed.

Resource Utilization

With **insightful reports** provided on the work done, you can have valuable information on your **resource utilization and their performance levels**.

Monitoring and Dashboards

Management Dashboards can be customized to produce ready data at the click of a button.

Automated reports can be sent to designated Receivers to keep the major stakeholders updated with Work Order Progresses.

Reduce Errors and Time lost

User **Mistakes are eliminated** by internal checks that can be configured in the work flow.

Time lost can be monitored **and tasks can be reassigned** to other resources as per their utilizations

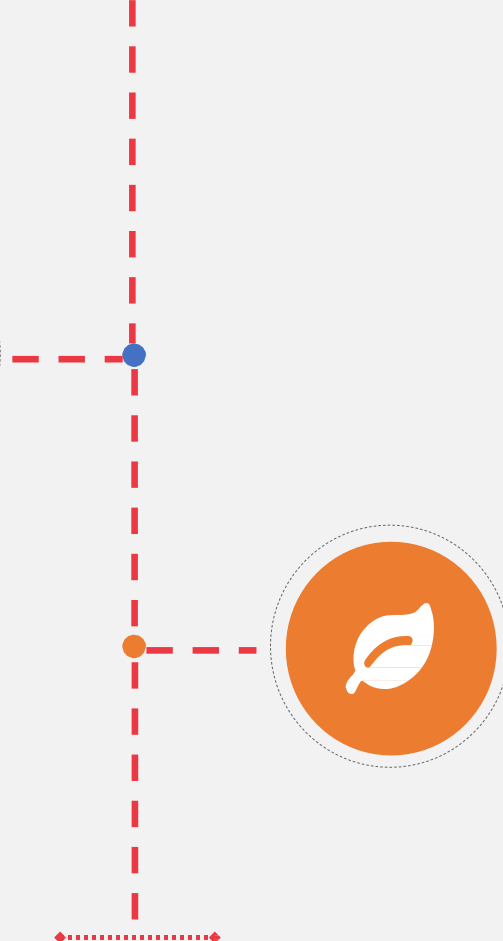

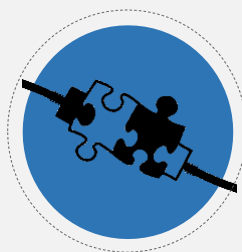

Internal & External Integration

Implement AnyWork on any existing data base that you have without losing time for data migration.

Instantly **make your legacy DBMS smart** by adding the AnyWork touch to the User Interface.

Use for AnyWork® The Choice is yours

Use AnyWork as a **full fledged ERP solution** with Integrated WFMS

Use AnyWork as a **Front end application** to instantly Automate and add Smart layer to your existing DBMS

Use AnyWork as a **Middleware** to link between different departments Management Information Systems
