WE BUILD YOUR DIGITAL FUTURE

Your Pain Points

Market

Huge pressure to create digital answers to the rise of **new players and technologies**

Organizational

IT and **development team spread thin** across all organizational stakeholders

MVP or feature development is awarded **limited budget** resources

Complex IT sourcing process, HR often not aware of **technical requirements**

Technical

Ever **faster development** of new tech stacks, frameworks and platforms

Increasing requirements in security, stability and compliance aspects

How We Can Help

We are part of the company builder Truventuro, and know what the **latest trends** are

We **provide development resources** exactly when and where they are needed

We assemble **lean and cost-efficient teams**, utilizing nearshore development where possible

We are **tech experts** who already have or recruit the team for you

We monitor latest developments and **upskill or extend our team** to meet the current demands

We **know how to handle these requirements** for example in the banking world

WE BUILD FOR YOU AND WITH YOU

Our approach is tailored around the most pressing needs in product development

Quick MVP

We use an iterative development process and quickly discuss first results with you in an MVP phase

Project realization or team augmentation

We can manage and deliver projects, or complement your existing team with individual development resources

Tech Lead & PM Guidance

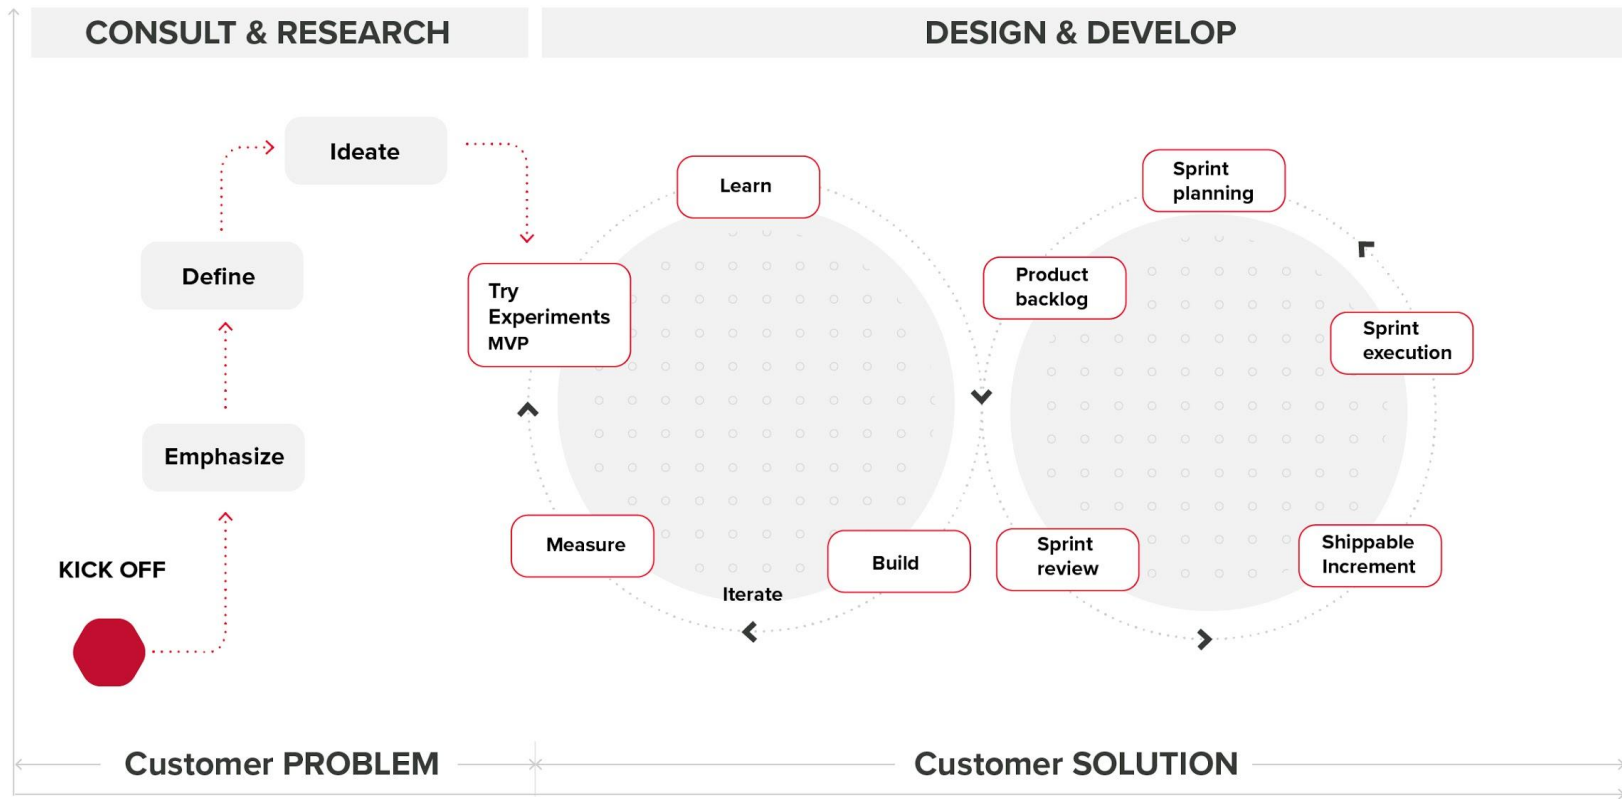

We have experienced Tech Leads who support your product owner throughout the development

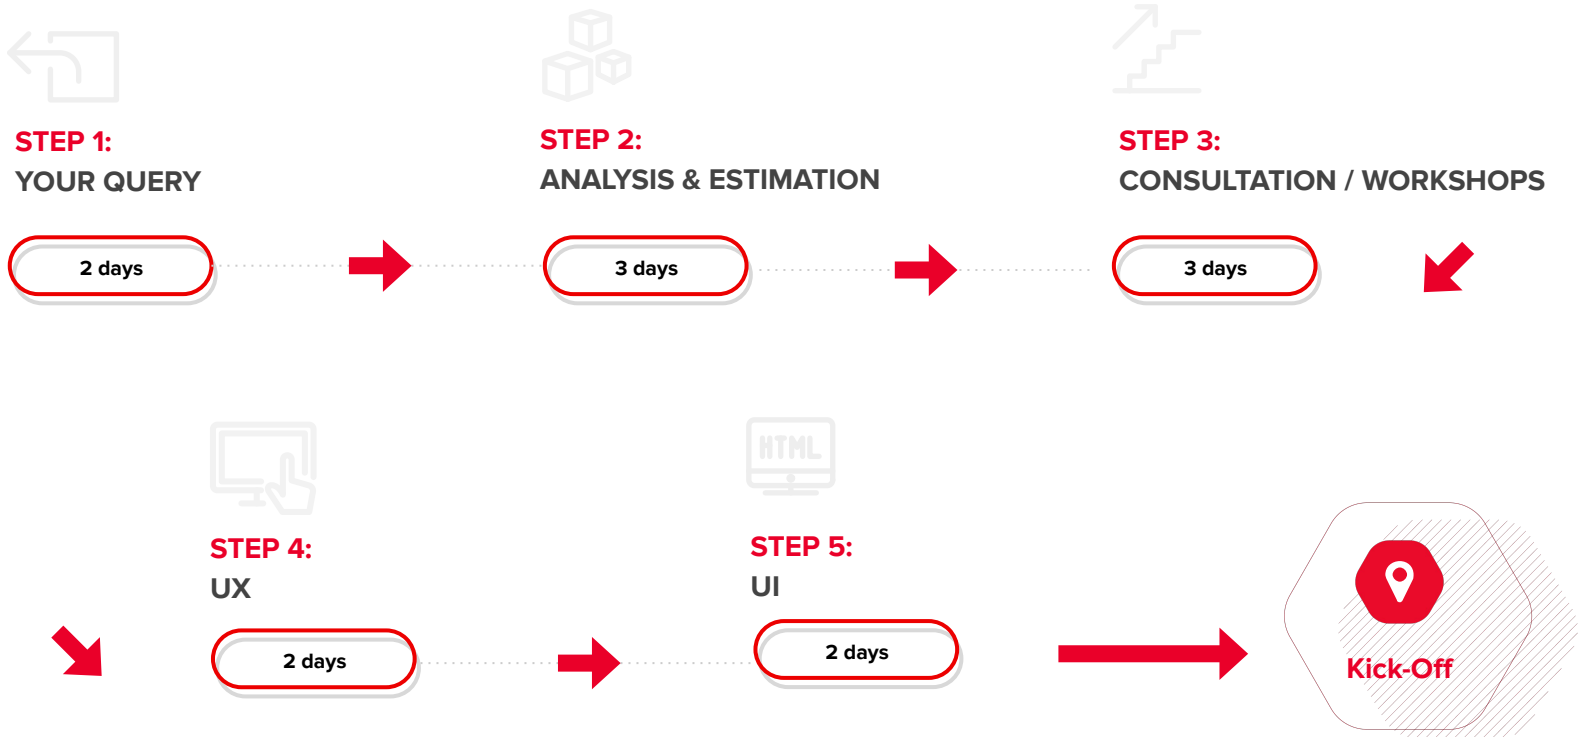

Agile & Scrum

We work in an agile way to maximize project efficiency and utilize only the resources needed in each sprint

OUR BUILDING PROCESS IN SPRINTS

WE ARE READY FOR KICK-OFF IN **12** DAYS

WE KNOW WHAT IT TAKES

Our experience in software development means we are well positioned to solve your challenges

FINTECH

Our mission is to build an integrated world. Working with Visa and Rambus, we were given the task of creating unified payment platform and an e-commerce solution to optimize the payment process and improve the customer experience.

Platforms: mobile, web

HEALTHCARE

Telemedicine is a direction in the development of medical science that is constantly growing in importance. We had the opportunity to participate in the creation of the ALVE platform, which connects the patient with the physiotherapist in real time.

Platforms: web

DIGITAL TRANSFORMATION

We develop an after-sales platform to improve the communication with Porsche customers and maintain the best possible cooperation between Porsche, subsidiaries, importeurs, and approx. 800 Porsche Centers.

Platforms: web

PORSCHE

VISA / Rambus

Global

At Concise Software, our mission is to build an integrated world. Working with Visa and Rambus, we were given the task of creating unified payment platform and an e-commerce solution to optimize the payment process and improve the customer experience. We enabled VISA / Rambus to implement an e-commerce solution to allow online payment combined with a loyalty program.

We were responsible for:

- / Mobile app frontend
- / Web frontend
- / Maintenance

Tech stack:

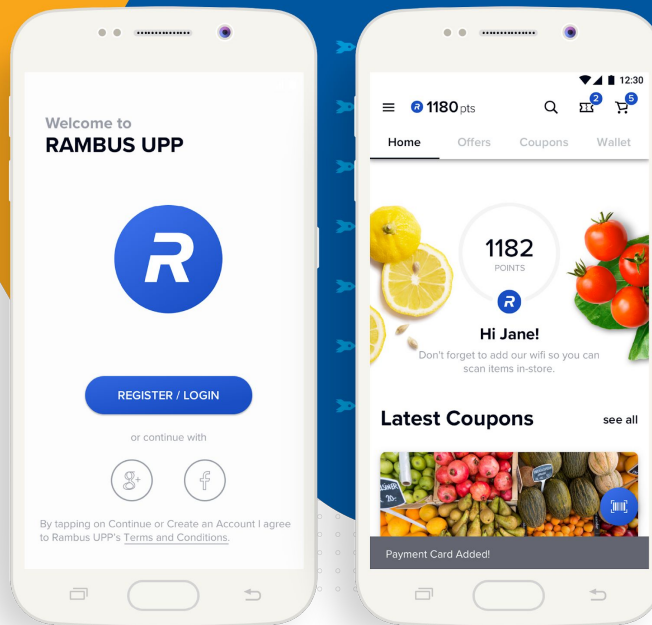

- / iOS / Android / Angular / React

Key features:

- / In-app check out
- / Loyalty programs
- / Digitized payments
- / Gifts and coupons
- / Reduced check out time

VISA Rambus

FINTECH

Santander eVoting

Poland

We helped Santander to create a coherent solution for banking in the form of a front-end application running in Bank hosting environment. The blockchain-based e-voting platform is the National Depository for Securities' response to the growing needs of the capital market, especially in the area of post-trading services.

We were responsible for:

- / Web frontend
- / Web backend

Tech stack:

- / Angular / IBM Hyperledger
- / OpenShift

Key features:

- / Online availability
- / Automation
- / Data security
- / Remote, secure voting
- / Integration

MacBook Pro

Neufund Platform

Global

Neufund is a community-owned fundraising platform. It acts as a bridge between the investment world and the blockchain space. Using legal and technical infrastructure, startups and established companies alike can legally issue a new type of asset we call tokenized equity.

We were responsible for:

- / Web frontend
- / Web backend

Tech stack:

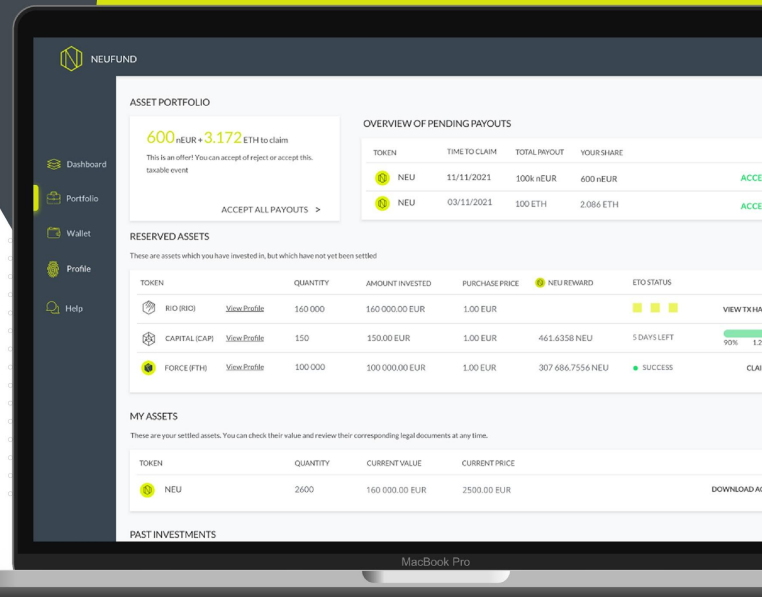

- / React.js / node.js
- / Solidity / Smart Contracts

Key features:

- / Equity Tokens
- / Stable coin
- / Proceeds distribution
- / On-chain governance
- / Standard KYC

Alve

Germany

Telemedicine is a direction in the development of medical science that is constantly growing in importance. By consulting a specialist online, some services will become more accessible for people from all over the world.

We had the opportunity to participate in the creation of the ALVE platform, which connects the patient with the physiotherapist in real time.

We were responsible for:

- / Web frontend
- / Web backend
- / Hosting

Tech stack:

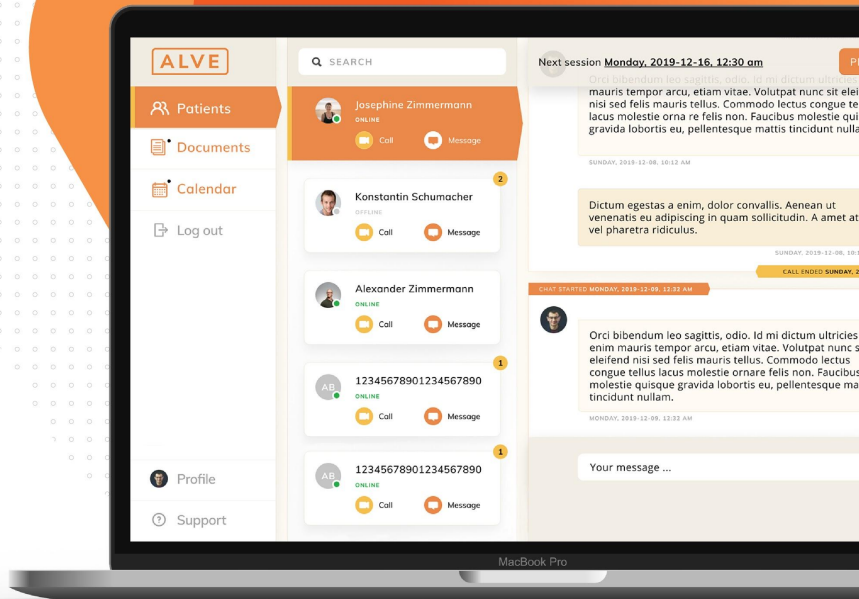

- / React.js / node.js / AWS /
- TypeScript

Key features:

- / Video chat
- / Interactive communication
- / Calendar and reminders
- / Integrated payments
- / Sensors and motion analysis
- / Data storage

ALVE

HEALTHCARE

TCup

United Kingdom

TCup is a tool which enables us to gather in one place all the information about our general well-being - in the context of health, happiness and success in our private and professional life. The user can then reflect on how well he or she is living and whether there is anything he or she can change for the better.

TCup is not only a repository of information, it is also a solution which makes it possible to react quickly to changes in the sense of happiness: not only of individuals, but also of entire teams. So the program can be a support not only for individual users, but also for people managing teams.

We were responsible for:

/ Mobile app frontend

Tech stack:

/ iOS

Key features:

/ Smart Journal

/ Statistics

/ Friends network / contacts

/ Dashboard

HEALTHCARE

Porsche | Service Core Processes

Global

We used our experience to work with Porsche to develop an after-sales platform to improve the communication with their customers ("Sales Core Processes" Tool). Our role was to deliver worldwide platform with up-to-date procedures, to unify the standard of cooperation between Porsche and their business partners.

We were responsible for:

- / Web frontend
- / Web backend
- / Hosting

Tech stack:

- / Wordpress CMS / AWS /

Business KPI's:

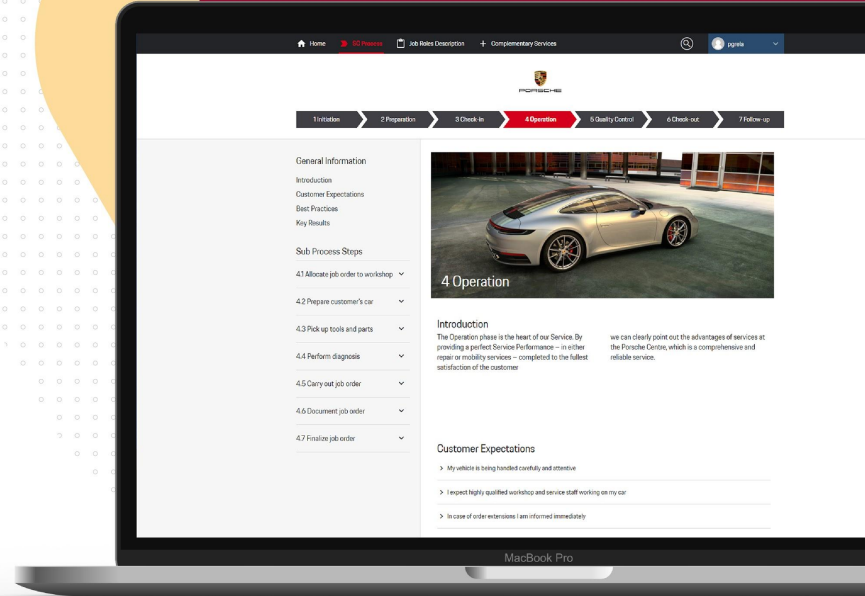

- / 3000 users added on web platform
- / 19 market released since projects has started

Key features:

- / Company knowledge base
- / After-sales procedures database

DIGITAL TRANSFORMATION

Oply / Examotive

Germany, United Kingdom

In partnership with Examotive, Oply is an enabler and operator of intelligent mobility solutions for the modern world. No need to privately own the vehicle anymore – the right car is always one click away from you. Our team has been working on mobile applications for Android and iOS platforms.

We were responsible for:

- / Mobile app frontend
- / Mobile app development (Android, iOS)

Tech stack:

- / Swift / Kotlin

Key features:

- / Users verification
- / Car booking
- / Parking booking system
- / Remote car management
- / Integrated payments
- / App integration with advanced refuelling system

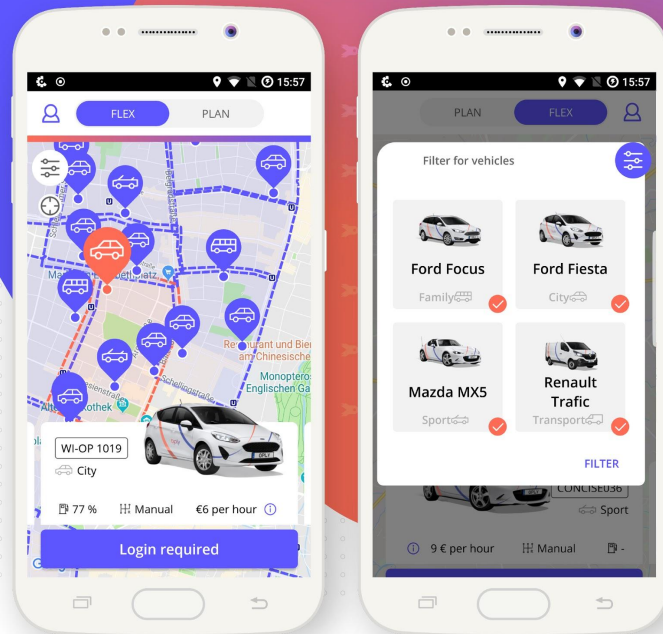

AUTOMOTIVE

Berliner Zeitung

FleetNews

DIE WELT

HappyCar

Global

The automotive market has changed over the years. Not only have cars changed, but also the way we use them. Renting a vehicle for a short period of time or for an extended period of time is now easier than ever thanks to new technologies and services embedded on the internet. Huge advancements are also due to the presence of services like HappyCar, which allow you to search and rent cars online.

We were responsible for:

- / Web frontend
- / Web backend

Tech stack:

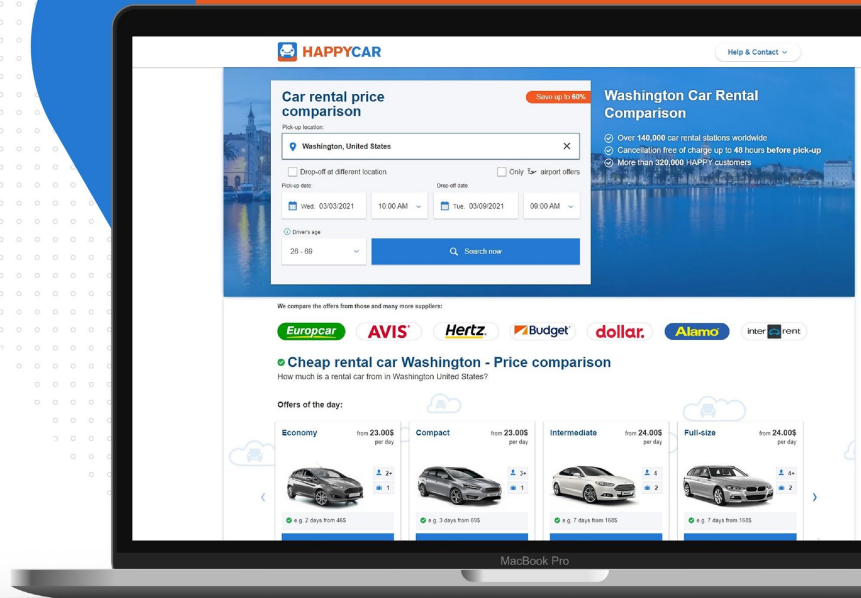

- / Vue.js / node.js /

Key features:

- / Car price comparison
- / Status of the selected offer
- / Searching for offers according to expectations
- / Filtering the results
- / Reservation confirmation
