Elevoc Clear

Unrivaled noise cancellation for calls, music, and entertainment

Crowdfunding launching soon on indiegogo

The most powerful noise cancelling earbuds ever

ANC

Active Noise Cancellation for immersive sound

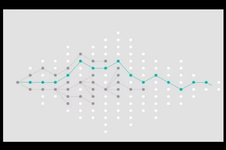

Elevoc Clear detects noise from your environment and adopts immediately. It can actively silence your surroundings, using dynamic drivers to emit reverse noise-cancelling sound waves. With just a tap, you can block out the noises and focus on the sound you want to hear.

ENC

Environmental Noise Cancellation for clear calls

Elevoc Clear's left and right earbuds feature 3 microphones and next-generation voice accelerometers. These pickups combined with Elevoc's leading Vocplus™ algorithm enable Elevoc Clear to deliver amazing voice capturing and processing, effectively suppressing background noise and elevating your voice.

Vocplus™ AI Solution

World's first deep learning-based algorithm for voice capturing

Award-winning noise cancelling technology

Vocplus™, our AI noise cancellation solution. Based on Deep Neural Network and Computational Auditory Scene Analysis, this technology captures human voices across 360 degrees by separating them from the surrounding noise in real time.
