

# About BICS

## Facts & figures

BICS is at the heart of the communications ecosystem, enabling the global mobility of people, applications and things wherever they are.

For more than 20 years, we have been bridging telecommunications services and the needs of enterprises, delivering optimized performance across all geographies, thanks to our owned global network, and unmatched relationships with hundreds of operators. We enable businesses to accelerate digitalization strategies by tapping into the power of cloud and global connectivity.
