Tec Marketplace - A revolutionary e-commerce conception by Evamp & Saanga

TeC Marketplace has been designed and developed depicting endless prospects of e-commerce for multiple Businesses. TeC Marketplace, with the emphasis on financial technology has limitless potential. With the integration of diverse platforms (Payments, logistics, Messaging) – TeC Marketplace is of great importance to Merchants who are consistently seeking ways to promote their products and services through numerous channels.

Product is designed to provide end-to-end Order Management which offers automation and integration – across each advancement of the order journey. This allows brands to deliver consistent customer experiences at scale across every single channel. Marketplace is a platform where multiple merchants can be registered and managed. Along with multiple merchants, multiple product categories feature is also one of the key benefits offered by Marketplace. Fundamental aspects of a successful marketplace are effective trust and secure progressions. The inclusion of fintech in TeC Marketplace is paving ways for consumers to easily track, manage and facilitate their finance in a secure possible way. TeC Marketplace offers to import a bulk of merchants from our wallet platforms and also allows integration with 3rd party wallet platforms.

Why TeC Marketplace?

- **End to End Order Management**

Marketplace provides end-to-end Order Management which offers automation and integration – across each advancement of the order journey. This allows brands to deliver consistent customer experiences at scale across every single channel. This efficient domain manages complete workflow from sales, purchasing, and delivery tracks all sales receivables and purchase payables.

- **Multiple Merchants**

Without a doubt, it's always been easy to make a store and trade products to customers because the exchange of goods and services will be held between the two entities - merchant and customers. Marketplace is an e-commerce platform where multiple merchants can be registered and managed. The registered merchants will accomplish all standard features required to run a marketplace including product inventory, request/order shipment, payments, and so on.

- **Multiple Product Categories**

Marketplace offers multiple product categories where products are organized in a specific way. An online catalog provides product categories along with their details. Within those categories, granular specifics like color, style, pattern are depicted for the consumer to be directed to the right product.

- **Fintech**

The e-commerce and financial services industry are a long way from being customer-friendly, inherently. Be that as it may, with the contribution of Fintech, the adaptability and accessibility of TeC Marketplaces had boosted. Fundamental aspects of a successful marketplace are effective trust and secure progressions. Inclusion of fintech in TeC Marketplace is paving ways for consumers to easily track, manage and facilitate their finance in a secure possible way.

- **Integration with Mobile Wallets**

Currently Marketplace incorporates Ericson wallet platform but it can be integrated with any specified 3rd party wallet platforms according to the requirements of our clients.

- **Easy Merchant Onboarding for Wallet Merchants**

TeC Marketplace offers importing a bulk of merchants from our wallet platforms. It eases the way for them to register on our marketplace platform through a pre-fill registration process. Although, Social Media registration process is also available for merchant registration.

- **Escrow Management**

TeC Marketplace encompasses Escrow, a financial management system which includes multiple partner accounts in a secure system. It incorporates a new digitalized transaction system in Marketplace which involves 3rd party financial service industry. It resolves all financial concerns by transparent transaction system.

TeC Marketplace - better than best

E&S's new TeC Marketplace is redefined accessibility. Allowing all types of users to make payments and purchase through its platform – Marketplace is the real problem solver. Various delivery and fulfillment methods are backed by a uniform payment method at the backend. Business processes allow all types of customers to complete orders based on their convenience. Whether it's Automated and rule-based Account Management, Payment Disbursements, or Profit Management – Marketplace's got it all!
