

A background network diagram consisting of various nodes and connecting lines. Nodes are represented by circles of different sizes and colors: some are solid blue, some are solid grey, and some are hollow white with a grey center. Lines connect these nodes, forming a complex web. Some nodes are highlighted with a thick blue border. The overall style is clean and technical.

TeC IoT Marketplace – Taking advantage of every prospect to connect more!

The Internet of Things, or IoT, alludes to the billions of physical devices throughout the world that are currently associated with the internet, all gathering and sharing information. On account of the advent of super-cheap microchips and the ubiquity of wireless / remote organizations and networks, it's feasible to turn anything, from something as little as a pill to something as large as a plane, into a part of the IoT. Integrating these several objects and adding sensors to them adds a level of digital intelligence to devices that would be generally imbecilic, empowering them to communicate real-time data without any actual involvement of human beings. The Internet of Things is making the fabric of the world around us smarter and more responsive, merging the digital and physical universes.

TeC IoT Marketplace has been designed and developed depicting endless prospects of e-commerce for multiple Businesses. TeC IoT Marketplace, with the emphasis on IoT technology, has limitless potential. With the integration of diverse platforms (Payments, logistics, Messaging) – TeC IoT Marketplace is of great importance to Merchants who are consistently seeking ways to promote their products and services through numerous channels. Our IoT marketplace emphasizes IoT devices, gathering and assembling Data for the clients (making informed marketing and financial decision) and leads to a smoother and seamless user experience. It offers a wide variety of IoT products, and users can select the best IOT solutions according to their specifications and requirements.

Product is designed to provide end-to-end Order Management which offers automation and integration – across each advancement of the order journey. This allows brands to deliver consistent customer experiences at scale across every single channel. TeC IoT Marketplace is a platform where multiple merchants can be registered and managed. Along with multiple merchants, multiple product

categories feature is also one of the key benefits offered by IoT Marketplace. Fundamental aspects of a successful marketplace are effective trust and secure progressions. The inclusion of fintech in TeC IoT Marketplace is paving ways for consumers to easily track, manage and facilitate their finance in a secure possible way. TeC IoT Marketplace offers to import a bulk of merchants from our wallet platforms and also allows integration with 3rd party wallet platforms.

The screenshot displays the TeC IoT Marketplace interface. At the top, there is a navigation bar with categories: PERSONAL, BUSINESS, AGRICULTURE, HEALTH, and SMART CITY. A search bar is located on the right. Below the navigation, the main content area is divided into several sections:

- Categories:** A list of categories including Mobility, Internet, TV Bundles, Home Phone, Security, and Health.
- Price:** A price range filter from \$50 to \$500 with a 'Filter' button.
- Brand:** A list of brands with checkboxes: Apple (checked), Samsung, Huawei, and Nokia.
- Search Item:** A search bar with the placeholder text 'Search item here...'.
- Products & Services:** A section featuring three product cards:
 - SMARTPHONES:** 'Get up to \$760 off the latest iPhone devices with Bring-It-Back™. Starting at \$1599.00'.
 - SMARTPHONES:** 'Get up to \$760 off the latest iPhone devices with Bring-It-Back™. Starting at \$1599.00'.
 - SMART AGRICULTURE:** 'Waspnote Plug & Sense! Smart Agriculture RC1. Starting at \$1599.00'.
- Smart Phone for your Business:** A banner with the text 'Buy and sell thousands of products'.

The screenshot shows the 'My Account' page, which is organized into several sections:

- My Account:** The main heading for the user's profile page.
- Contact Information:** Includes a profile picture placeholder, name 'Jon Doe', email 'jondooo@yopmail.com', and phone number '971558201099'. An 'Edit' link is provided.
- Company Information:** Includes a company icon placeholder and an 'Edit' link.
- Address Book:** Shows the 'Default Shipping Address' for 'Jon Doe' at 'tesy ert, 121232 United Arab Emirates' with phone number 'T: 32242423232'. An 'Edit' link is provided.
- Login Information:** Shows the email 'jondooo@yopmail.com' and a 'Change Password' link.

Why TeC IoT Marketplace?

- **IOT**

Our IOT marketplace emphasizes on IOT devices, gathering and assembling Data for the clients (making informed marketing and financial decision), and leads to a smoother and seamless user experience. It offers a wide variety of IOT products, and users can select the best IOT solutions according to their specifications and requirements.
- **End to End Order Management**

Marketplace provides end-to-end Order Management which offers automation and integration – across each advancement of the order journey. This allows brands to deliver consistent customer experiences at scale across every single channel. This efficient domain manages complete workflow from sales, purchasing, and delivery tracks all sales receivables and purchase payables.

- **Multiple Merchants**

Without a doubt, it's always been easy to make a store and trade products to customers because the exchange of goods and services will be held between the two entities - merchant and customers. Marketplace is an e-commerce platform where multiple merchants can be registered and managed. The registered merchants will accomplish all standard features required to run a marketplace including product inventory, request/order shipment, payments, and so on.

- **Multiple Product Categories**

Marketplace offers multiple product categories where products are organized in a specific way. An online catalog provides product categories along with their details. Within those categories, granular specifics like color, style, pattern are depicted for the consumer to be directed to the right product.

- **Fintech**

The e-commerce and financial services industry are a long way from being customer-friendly, inherently. Be that as it may, with the contribution of Fintech, the adaptability and accessibility of TeC IoT Marketplaces had boosted. Fundamental aspects of a successful marketplace are effective trust and secure progressions. The inclusion of fintech in TeC IoT Marketplace is paving ways for consumers to easily track, manage and facilitate their finance in a secure possible way.

- **Integration with Mobile Wallets**

Currently, Marketplace incorporates Ericson wallet platform but it can be integrated with any specified 3rd party wallet platforms according to the requirements of our clients.

- **Easy Merchant Onboarding for Wallet Merchants**

TeC IoT Marketplace offers to import a bulk of merchants from our wallet platforms. It eases the way for them to register on our marketplace platform through a pre-fill registration process. Although, Social Media registration process is also available for merchant registration.

- **Escrow Management**

TeC IoT Marketplace encompasses Escrow, a financial management system which includes multiple partner accounts in a secure system. It incorporates a new digitalized transaction system in Marketplace which involves 3rd party financial service industry. It resolves all financial concerns by transparent transaction system.

TeC IoT Marketplace – It's not a concept, it's a Network!

E&S's new TeC IoT Marketplace is redefined accessibility. Allowing all types of users to make payments and purchase through its platform – IoT Marketplace is the real problem solver. Various delivery and fulfillment methods are backed by a uniform payment method at the backend. Business processes allow all types of customers to complete orders based on their convenience. Whether it's Automated and rule-based Account Management, Payment Disbursements, or Profit Management – TeC IoT Marketplace's got it all!
