http://bit.ly/qwertycase\_en

### Company Introduction

We "D.I. Electronics" researches assistive technology for the visually impaired and blind.

Our Product "Qwertycase" is World's first smartphone-patchable wireless keyboard for the visually impaired and blind.

We developed this Wireless keyboard for four years and made many prototypes to make the most user-friendly input device.

And finally, we have created an innovative this product.

### Product Details

#### QwertyCase Patch, SE

\*Our Product "Qwertycase" is World's first smartphone-patchable wireless keyboard that helps the visually impaired or blind use smartphones.

The three important features of our product are text input, phone dialing and smartphone control when blind people use smartphone.

If visually imapiored people use QwertyCase, the input speed increases dramatically, and there is no mistake in dialing the phone.

The advantages of our products are easy to learn and good portability.

## DYNAIR KOREA CO., LTD.

JD Solution

### Company Introduction

We provide a directional speaker that transmits sound only in a certain section and does not generate sound outside of the use section, which can be used as a personal speaker without physical contact such as earphones and space separation through sound.

It is no longer limited to listening to music. It can inform people through sound, provide enjoyment, and present a variety of experiences to users.

### Product Details

#### SOUNDIC

- Delivers clear sound to the target area (people)
- Virtually zero echoes and no sound leakage
- Capable delivering sound (sound source) and data

#### DIXXEN

- Clearly delivers high-pressure sound far away
- Can be used in environments with high reverberation and low audibility
- Can be connected to various devices (video, radar, etc) and perform intelligent analysis

## PHILKO INTERNATIONAL. INC

<http://www.philko.net/>

[sales@philko.net](mailto:sales@philko.net)

[https://twitter.com/Philko\\_official](https://twitter.com/Philko_official)

### Company Introduction

We Philko is the leading company in South Korea selling mobile phone cases and accessories for export to the worldwide market.

Since 1994, we have been well known as a reliable company supplying good quality products at a reasonable price.

Since 2020, Philko has operated the BTS music theme and TinyTAN licenses from HYBE for worldwide sales

### Product Details

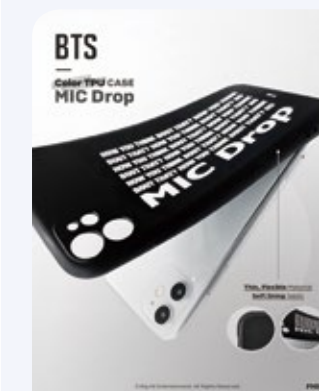

#### BTS DNA Theme\_Glitter AirPods Case – Universe

##### [Full Protection]

Made from PC material for perfect fit & fully protect from daily scratches, drops, and damages.

##### [Visible Front LED & Unobstructed Charging]

Visible LED shows you the status of charging and No need to take off the case while charging.

#### MIC Drop\_Color TPU\_BLACK

##### [User-friendly design]

Easy to install and remove. Made from TPU material that is safe, flexible, lightweight and comfortable grip.

##### [Ultra Thin]

it's only 1.5mm Ultra Thin Case gives a great grip

#### TinyTAN\_Card Snap case\_Magic Door Purple

##### [Card Holder]

Stores one card in the back of the case but still slim enough.

[Slim Fit] Single PC layer with perfect grip & protection

## SSenStone

+82-2-569-9668

www.ssenstone.com

davidshlee@ssenstone.com

SSenStone Inc.

### Company Introduction

We aim to lead the innovation of authentication on cybersecurity by providing a One-Time Authentication Code (OTAC) to keep users safe from hacking and leakage. OTAC algorithm generates a single dynamic code that both identifies and authenticates the user without a network connection. OTAC technology enables uni-directional authentication even in off-the-net environment, authentication code not to duplicate, and sufficient to identify a user which allows to be applied in various industries and product that requires authentication or identification process. SSenStone provides two products in the market, OTAC with its core technology/business development and 'swIDch Auth SDK'. 'swIDch Auth SDK' includes FIDO, mOTP and OTAC log-in which can deal with various methods for its performance.

### Product Details

#### OTAC (One-Time Authentication Code)

OTAC (One-Time Authentication Code) generates random dynamic code that authenticates (and identifies) in networkless environment. OTAC can be utilized in various industries and products that requires for authentication and identification.

#### swIDch Auth SDK

swIDch Auth SDK includes FIDO, mOTP and OTAC log-in services. The product in SDK format, provides each technology services to clients that can be utilized in either developing or developed process to apply. FIDO certified features allows in any biometric authentication services, mOTP feature can be utilized in 2nd authentication process. OTAC log-in services can transform the existing Tokenization infrastructure to much simpler and lighter structure. The package can be purchased in different levels of price model depending on the numbers of Mobile App.

## Yura Co., Ltd.

+82-70-7878-7006

www.cadvizor.com

phoony@yura.co.kr

### Company Introduction

Yura is a global top company that has been supplying automotive wiring harnesses since 1993.

Currently, it is a specialized company that develops and supplies electric parts for famous automobiles and aircraft such as Hyundai Motor Company and Jaguar Land Rover.

Auto parts alone are recording \$4.05billion in sales, and through this MWC visit, I would like to work with electronics and harness manufacturers in North America, Europe and Asia.

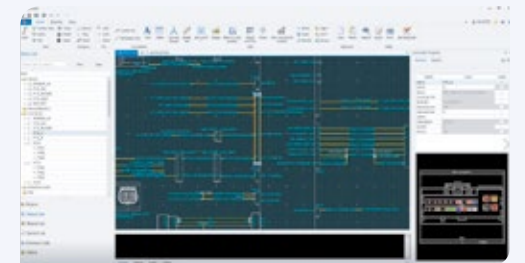

CADvizer, developed through many experiences, would like to introduce to our customers how they make significant improvements in design, verification, quality, and delivery.

Main reference

Hyundai Motor Company, PLG, J2J, Hyundai Auto Ever, Hyeonse NTI, Taehyun System, Dongnam New Tech, Ichen, S-Tech System, Meritz Engineering, Kukje Machinery, Bumyang Electronics, etc...

ECAD market

- Total market (TAM): \$700 million (Main markets: North America, APAC, EU)
- Adjacent market (SAM): KRW 304 billion (Main markets: Korea, China, Japan)
- Secured market (SOM): KRW 40 billion (Main markets: domestic large companies and SMEs, automobiles, aircraft, semiconductors, etc.)

### Product Details

#### CADVIZOR

CADvizer Logic

- Wire and Net designs can be designed more than 46% faster than the existing method.
- Trace management function for design errors (DRC Check)
- Provides various reports on Connector, Wire, Option, and Symbol

CADvizer MFG

- Product layout and assembly design can be designed more than 52% faster by linking with logic.
- Optimized output and MBOM provided through modular BOM patent technology

CADvizer Simulation

- Topology: Optimal cost, weight, path analysis simulation of the system
- Voltage Drop, Short Current Simulation

CADvizer Dataportal

- Over 2 million free parts library updated weekly
