Arm New Reality Series

Exploring the Future of Consumer Technology via cutting edge mobile technologies with Arm partners

Feedback and Simulation

- Technology and neuroplasticity? In this episode, host Poppy Crum discusses how technology changes us as we engage with it. We see these principles put into action with Florio, a company using mobile devices and VR to improve the lives of children and adults with autism.

Data Empowerment

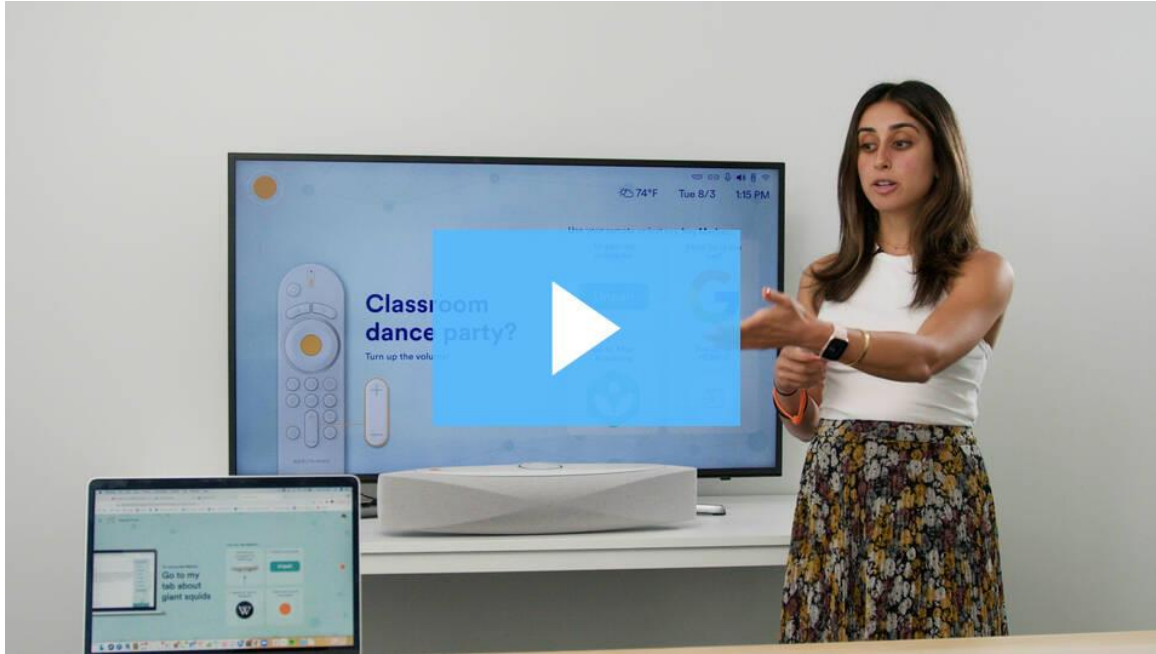

- Explore mobile blockchain's potential to create a globally decentralized web where every user controls their own experiences, with technologist Poppy Crum, Arm Director of Mobile Steve Raphael, and Minima co-founders Hugo Feiler, Paddy Cerri, and Jonathan MacDonald.

Integrating Wearables

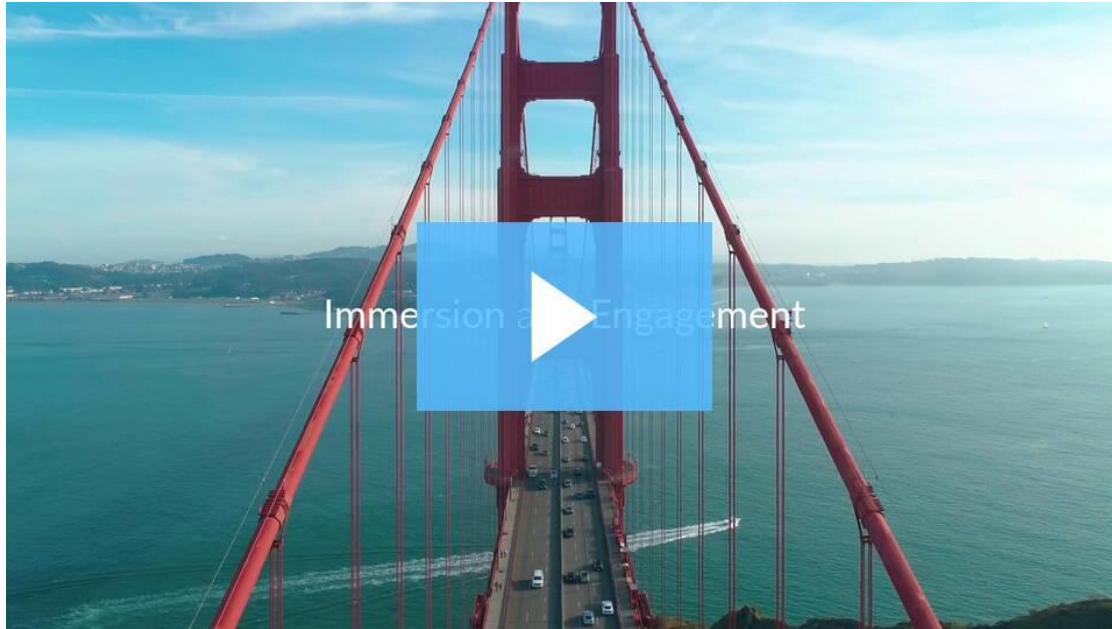

- As the role of smartwatches expands into autonomous machine-learning devices for our wellness, medical, and convenience needs, they are becoming more prevalent among children and seniors. Join Arm insider Martin Bradley, Omate CEO Laurent Le Pen, and technologist Poppy Crum for a look into the future of wearables.

AI and Education

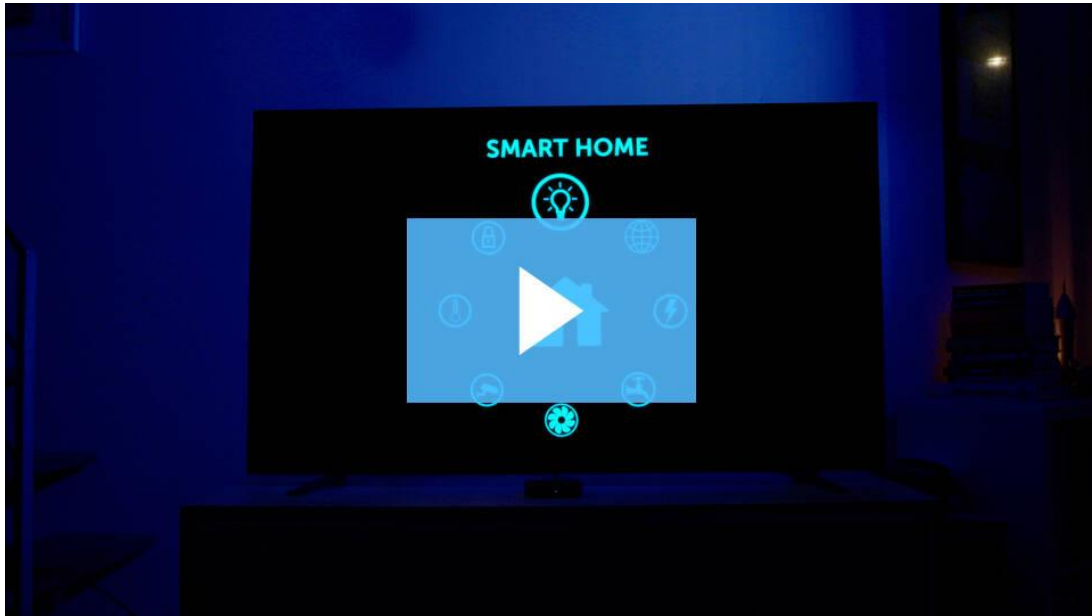

- AI enables edge-device digital assistants to reduce the complexity of classroom devices and applications so teachers can spend more time teaching. New Reality host Poppy Crum, Merlyn Mind CEO Satya Nitta, and Arm insider Michael Lu take a closer look at the future of education.

Immersion and Engagement

- What's next for immersive engagement on screen-based mobile devices? Futurist Poppy Crum, Leia CEO David Fattal, and Arm's Rahoul Varma explore the power of nanotechnology and AI to deliver ultra-realistic 3D experiences.

Expanding Television

- See how television is changing from a simple screen for entertainment to a central dashboard for home technologies, and more, with technologist Poppy Crum, Mediabox CEO James Muir, and Arm insider Andrea Luigi Cantone.
