

# Global 5G Outdoor CPE

## PRODUCT SUMMARY

A versatile outdoor 5G/LTE CPE designed for professional installations (Consumer & Enterprise Markets).

Supporting a wide range of 3GPP Frequency Bands from 600MHz up to 4.2GHz, it is suitable for deployment in the majority of regions globally.

Includes an integrated 4\*4 MIMO OMNI Directional Antenna

Powered via standards compliant Power Over Ethernet (802.3af), it is compatible with third party standards compliant PoE Sources and Consumer/Enterprise Gateways.

Integrated Power Over Ethernet K.21 compliant Lightning Surge Protection available as an option to provide protection without the expensive installation of electrical ground cabling

Remotely manageable (FM, CM, PM, SM) via BBF TR-069, SSH and HTTP/S

Robust IP65 design for longevity supporting a wide operating temperature range and harsh environments.

Additional Installation Tools and Smartphone Applications available to provide efficient installation processes.
