

5G+ Enabler, **NETCUBE**

Netcube, Inc. is committed to helping vertical industries converge with 5G system, and enabling 5G based new business ecosystem.

**MWC
2022**

NETCUBE

OUR VISION

Netcube is a telecommunication software company based in Seoul, Korea. The company is committed to helping various vertical industries embrace 5G with the convergence of their data network environments, and supporting enterprises, governments, and individual developers to deploy and operate 5G converged service effectively.

While Netcube has participated in various R&D projects supported by the Government, it has proved its capability of enabling 5G LAN and stimulating a creation of 5G converged ecosystem. Netcube's core products include 3GPP Secondary Authentication System and 5G standard based Network Slicing Onboarding Automation System provided as PaaS, IaaS, SaaS as well as on-premise system.

Netcube is cooperating with top tier MNOs, manufacturers and integrators to enhance mobile network ecosystem by transforming 5G NSA into SA, building 5G PNI-NPN(Public Network Integrated-Non Public Network), and designing 5G SNPN(Standalone Non Public Network).

For more than 18 years, Netcube has been specializing in converging 'mobile network' and 'data network' with security, telecommunication, and IT service expertise.

OUR PARTNERS

It all starts with striving for mutual benefits. We are committed to deliver a range of solutions to help its partners by combining our vast experience, technical expertise, and profound knowledge of the latest industry trends. we have partnered with LG Electronics, LG Innotek, Korail, Korea Electric Power Corporation, and World Vision International.

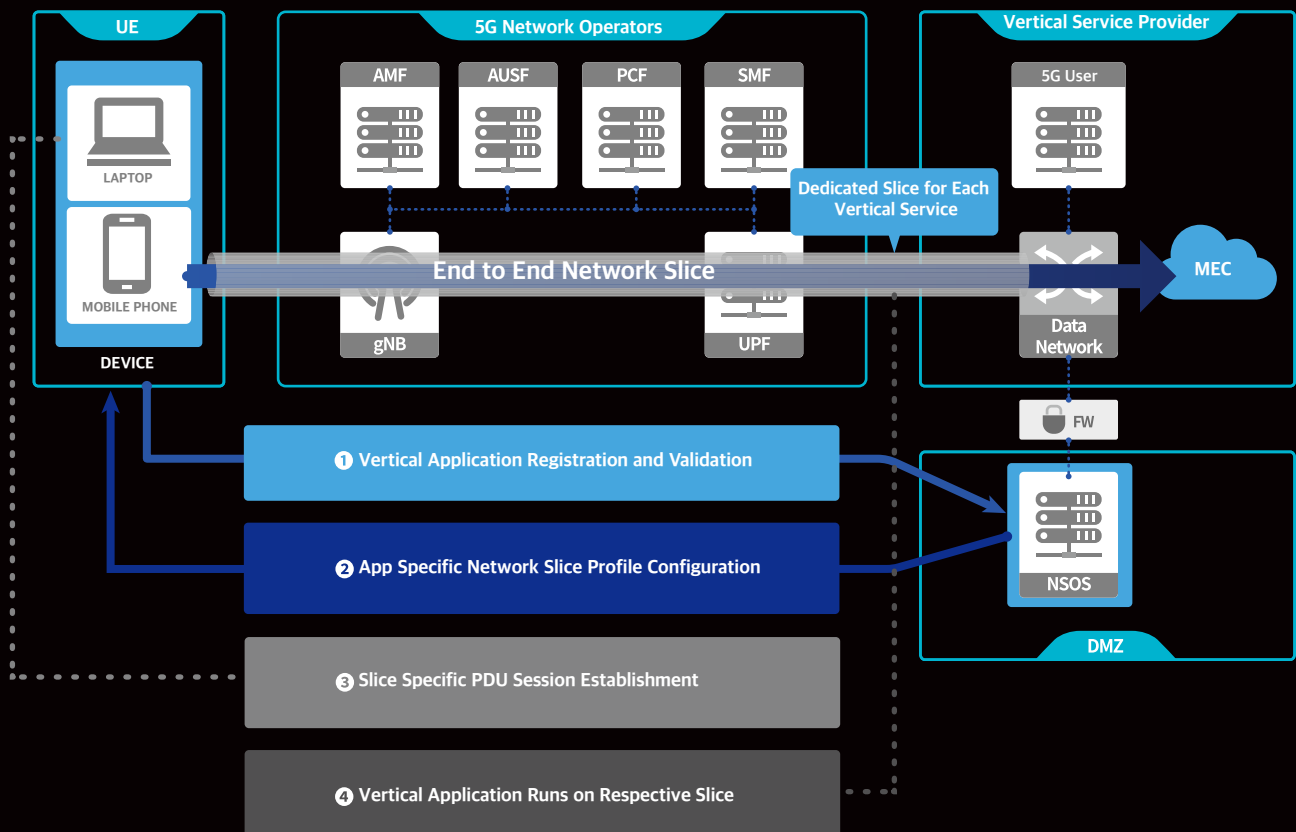

5G Network Slicing Onboarding Automation System

Effectively bonding 5G carriers and Vertical Industries

What is NSOS?

NSOS is a network slicing onboarding system that allows each associated vertical service to allow users on respective network slice automatically.
