

Product Description

Weight: **5g** (light like a Nickel)

Size: **2cm** (size of a Penny)

Battery Life: **4 weeks**

Activity Status Analysis

LavvieTAG measures 5 different activities **(walking, grooming, running, zoomies, sleeping/resting)** and analyzes these data to catch any abnormal health signal or early symptoms of disease that are hard for cat owners to find.

Connectivity with PurrSong's IoT Devices

By connecting to other IoT devices made by PurrSong, each device will distinguish individual cat and record a precise & specific data to detect any potential health risks. It works as an identifier especially in multiple-cat households.

Lightest Weight and Longest Battery Life

PurrSong used low power consumption tech on its battery to last for 4 weeks by one time charge for user's convenience while compressing the size and weight considering cat's comfort.

MSRP: \$99

LavvieWater

IoT Water Dispenser

Product Description

Size: 25 * 25 * 12.5cm

Water Intake Care

Collects cat's water intake, duration, and frequency data and users are able to check these water consumption information by monitoring on PurrSong Application.

Inhibit Bacterial Growth

By using 3-layered filter and ceramic lamination, LavvieWater inhibits bacterial growth in drinking water while filtering out dust and fur.

Motorless Design

Unlike other water dispensers, LavvieWater's motor is located underneath a water tank and does not touch the water that cats drink. This motor uses electro-magnet power to rotate a propeller placed inside the tank to circulate the water. Users can clean and wash both tank and propeller easily and safely with its motorless design.

MSRP: \$199
