

# 5G Roll-out Accelerator™ Solution

## An Assurance Cloud™ Solution

Launch differentiated 5G-branded services in a fraction of the time and cost, gaining the competitive advantage without compromising on performance or impacting existing customers' experiences

## 5G Roll-out Accelerator™ Solution – The pre-integrated assurance solution for CSPs deploying 5G

MYCOM OSI's 5G Roll-out Accelerator™ Solution gives CSPs the competitive edge in 5G deployment by reducing the cost, time-to-market and operational complexity of assuring 5G service quality while protecting existing revenue streams. Delivered on-demand from the cloud, pre-integrated with most 5G network deployments and bundled with targeted 5G outcomes-based use cases, the 5G Roll-out Accelerator™ Solution eliminates months of deployment time and cost and is proven today at some of the world's largest, most complex Tier-1 CSP deployments.

### Reduces deployment effort with a ready-to-use 5G solution

The solution bundles the most advanced performance management capability into a ready-to-use pre-integrated solution

### Reduces deployment time with a unique SaaS approach

Powered by the multi-award-winning Assurance Cloud™ service assurance SaaS, the solution can be activated in less than one hour

### Improves performance with greater scalability

Leveraging the footprint of the public cloud, the solution automatically scales, for high availability / performance even in extreme conditions

### Allows usage flexibility and business agility

Based on a shared cloud platform, the solution can be extended to a full Assurance Cloud™ deployment as your 5G services evolve

### Reduces TCO without compromise on quality

The solution is specifically designed for 5G network deployments while keeping costs down by avoiding complex customization

#### 5G RAN

New Radio (NR) Planning, Acceptance & Optimization

#### Shared Transport

Shared resource performance management for 5G and pre-5G

#### Shared Core

Shared resource and underlying infrastructure performance management

## 5G Roll-out Accelerator™ Solution – Bundled use cases: simplifying 5G rollout and management

MYCOM OSI created the streamlined, purpose-built 5G Roll-out Accelerator™ Solution with the unique complexities of 5G network and service assurance in mind, while ensuring that 5G services are differentiated for the customer, simple to assure for the operator, and resource-efficient for the network.

### 5G Site Validator™

- Validating that your 5G sites are configured as planned

### 5G Site Auditor™

- Certifying your 5G sites are running as expected

### 5G Performance Monitor™

- Monitoring the ongoing KPI performance of your 5G network

### 5G Dashboard Pack™

- Easy to use but powerful dashboards for at-a-glance visualization of your 5G network

### Cross-Domain Continuity Manager™

- Pre-configured KPIs and alarms for sessions involving handover to pre-5G and resources supporting both 5G and pre-5G services

## The competitive edge in the race for 5G market share

MYCOM OSI's 5G Roll-out Accelerator™ Solution eliminates the bottlenecks of 5G service assurance deployment and integration, enabling faster deployment and simplified network operations, and offering a competitive edge towards greater market share.

## Evolve into advanced 5G service assurance

Designed to address specific service assurance challenges in 5G deployments from day 1, the solution can also be extended into advanced, AI/ML-driven closed-loop automation scenarios alongside evolving business requirements.

## KEY FEATURES

### Speed and agility

- The 5G Roll-out Accelerator™ Solution provides faster 5G TTM by removing complex OSS barriers and leveraging the public cloud
- CSPs can activate or de-activate the fully self-contained 5G Roll-out Accelerator™ Solution in any region on-demand, with no dependencies

### Proven at the world's pioneering Tier 1 5G networks

- Tier 1 operators such as Vodafone, Telenor and Verizon Wireless rely on MYCOM OSI's technology to visualize and manage their 5G networks

### Managing the risk and complexity of 5G roll-outs

- The 5G Roll-out Accelerator™ Solution provides the real-time network visibility needed to ensure outstanding quality of experience without impacting existing customers
- The 5G Roll-out Accelerator™ Solution is pre-integrated with most 5G RAN equipment, and comes with pre-configured reports, dashboards, KPIs to take out the complexity of 5G network assurance

### Bringing service assurance into the public cloud

- Backed by a deep partnership with Amazon Web Services and using its powerful cloud products, the 5G Roll-out Accelerator™ Solution provides a proven on-ramp into the public cloud

## 5G Roll-out Accelerator™ Solution – An Assurance Cloud™ solution

MYCOM OSI's 5G Roll-out Accelerator™ Solution is powered by the Assurance Cloud™. Proven to reduce TCO, accelerate TTM and support increased automation at the world's largest, most complex networks, the Assurance Cloud™ is the world's first fully cloud-native network and service assurance software-as-a-service (SaaS) offering. The 5G Roll-out Accelerator™ Solution enables CSPs to launch and assure differentiated 5G networks and services, with lower TCO and in a fraction of the time compared to traditional service assurance solutions.

### A multi-award-winning Assurance vendor

With over 25 years experience, MYCOM OSI is recognized as the leading service assurance provider.

Get started today with a personal demo and discussion about how the 5G Roll-out Accelerator™ Solution can benefit your business.

### About MYCOM OSI

MYCOM OSI is a leader in Assurance, Automation & Analytics solutions that enable CSPs, Managed Service Providers (MSPs) and Enterprises to manage digital experiences and hybrid networks, launch digital, IoT and 5G services and deliver agility, scale and efficiency with automated digital operations. With over 25 years of proven capabilities and network management services to 8 out of the top 10 global CSPs, MYCOM OSI has designed the world's first Service Assurance Cloud, cutting across domains and catalyzing CSPs on the road to transformation to DSPs.
