Subtitles
 Multiple subtitles are available

PIPVIV

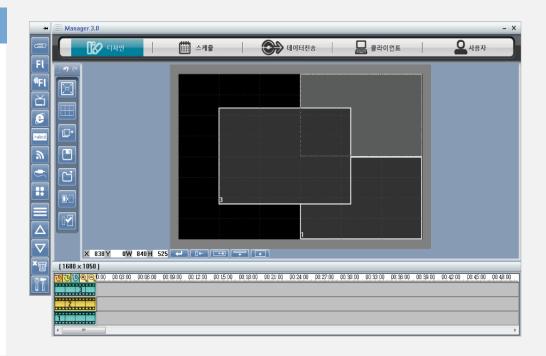

PIPVIV
 Easily add image and video just to drag it.

Digital Signage control solution through network

[CS ver.] Q-Sign 3.0 Software

- Support 15 languages
- Easy installation using Window OS (Installation within 15min)
- · Content design and schedule planning
- Support various applications
- Safe authentication using USB Dongle

Data transfer

- Data transfer and USB transmit
- Immediate / Emergency
- reservation

Client

- Remote power and monitor on/off
- · Monitoring clients status

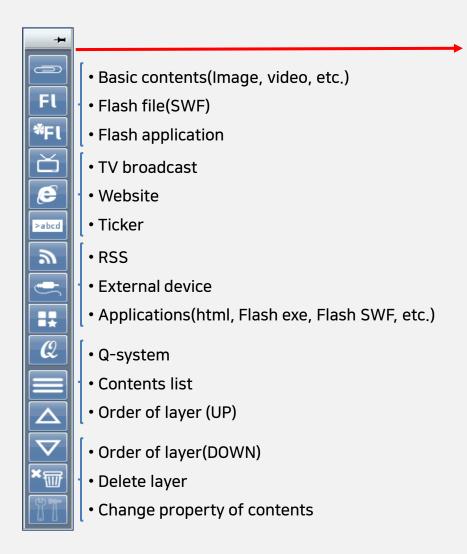

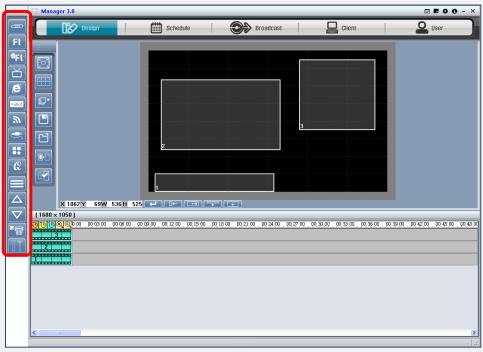

User

- Multi User Registration
- Distribution of User authority

Schedule

- Daily, Weekly, Monthly schedule
- Selectable schedule management

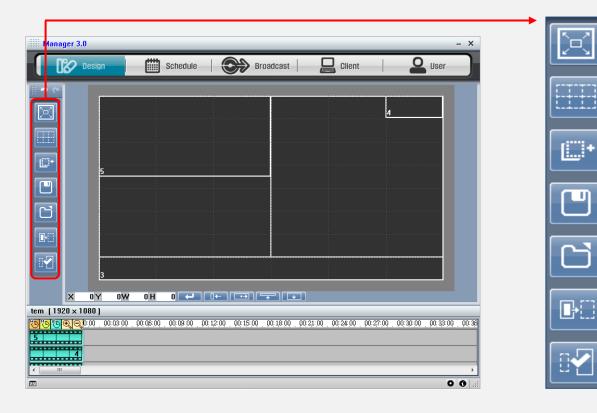

Function list

- · Resolution set depends on display
- · Various screen formation by multi layer
- Unconstrained layout makes maximum 32 divide screens
- Support various image file(jpg, bmp, png, gif etc.) and video file(wmv, avi, mp4, mov, asf etc.)
- Support music file(mp3, wma) and flesh(swf)
- Support TV input(Analog, Digital, S-Video, Composit, Component)
- Support video input(Webcam, TV Tuner, Composit, S-Video, Component)
- Support document file such as Power point(ppt, pptx) and Excel, MS Word, Hangle etc.
- · Support Website
- Support various applications based on Windows OS(Application.exe, Flash.exe, Flash.swf, html etc.)
- Various switch effects for images are selectable
- Support subtitle and RSS, user can choose it's location, background and letter color, size, font, transparency.
- · Daily, Weekly, Monthly schedule management
- Check designed template list is available even during data transfer.
- Support reservation, immediate and USB schedule transmission
- · Emergency and overlap schedule transmission
- Sent schedule, playback time check available through report
- Auto-delete function when client's data get close to hard disk's capacity
- Individual/Group clients control
- Registered clients list and status check
- Remote access to client PC and control through network(play, stop, reboot, on and off)
- · Authority distribution for each user
- · Adding specific applications such as flight schedule, and patrol for contents safety from hacking
- · Lock Key system through USB DONGLE that has Wifi function

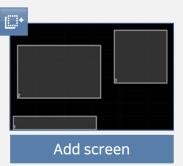

Design - Template design and screen composition

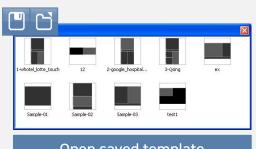

- Set up of display resolution (Support maximum resolution hardware can have)
- Screen Guideline (Help customizing screen size and formation)
- Add Screen (Available set a resolution for each screen)
- · Save the template
- · Open the template
 - Preview in small size screen
 - Preview in full size screen

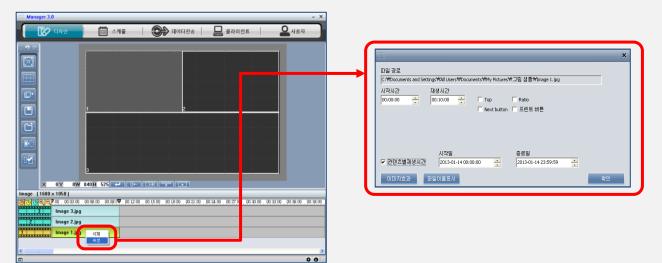

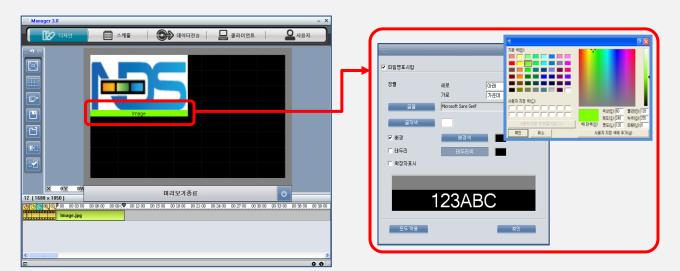

Design – Playback time setting

- ✓ Check playback time for each contents
- √ Start date(year, month, day, time)
- √ End date(year, month, day, time)

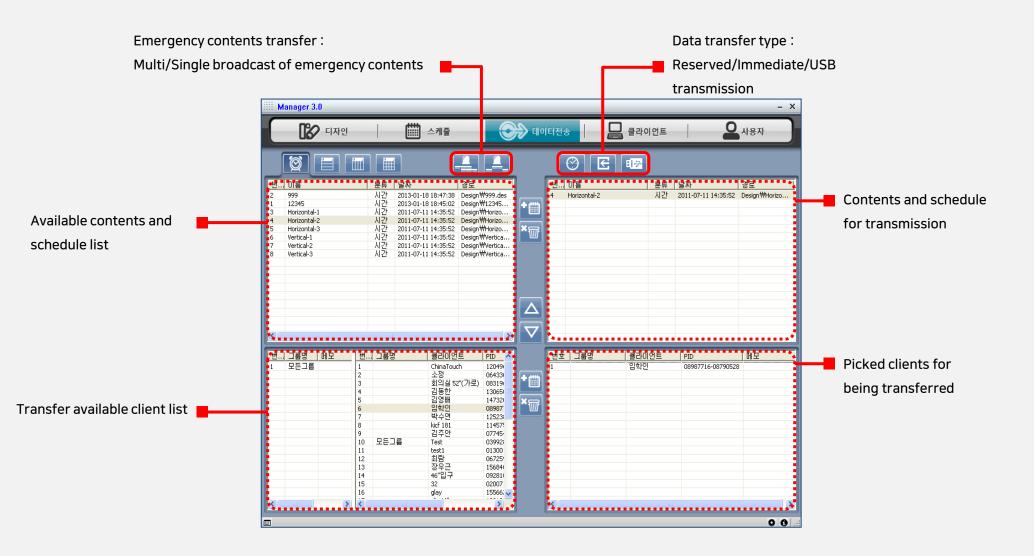

- ✓ Playback image
- √ File name below image
- ✓ Color of word and background customizing

Schedule – Schedule setting for each content

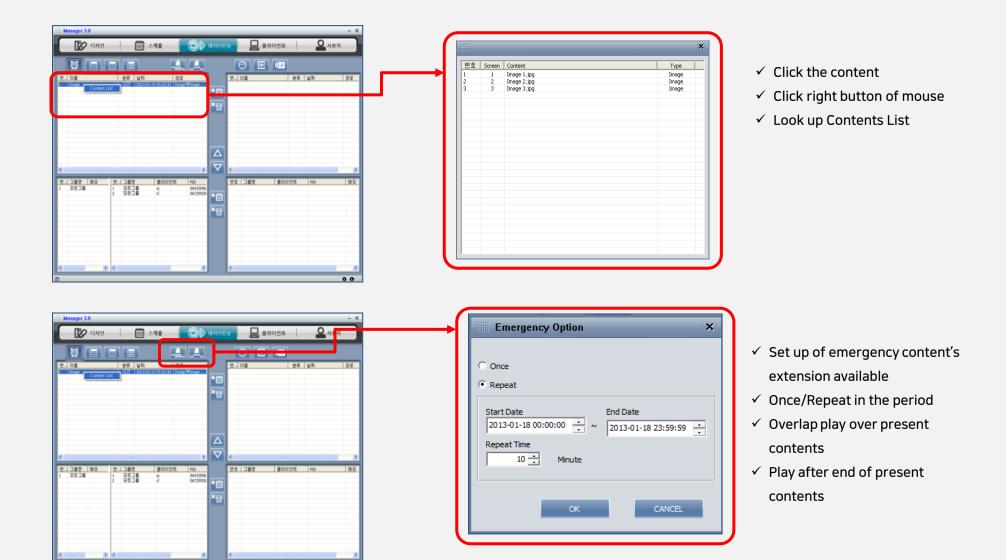

✓ Set up and control your contents by daily, weekly, monthly in scheduler.

Data transfer - Send content through network or USB

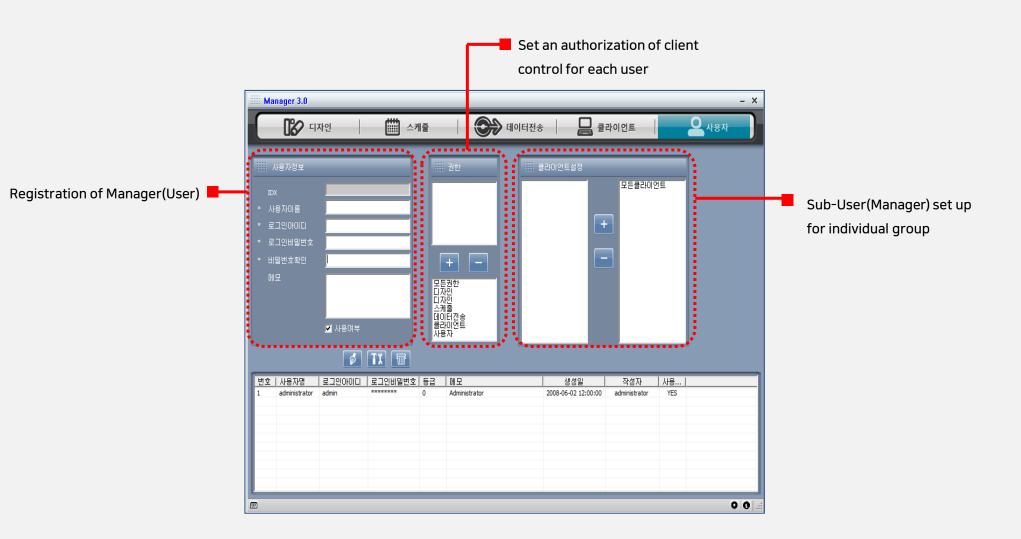

Data transfer – Contents list, Emergency data transmission

Clietn - Content and display management

User – Manager registration

Others

#1 Display image title
Image tab > show file title
Title can be displayed on the image

#2 Conference room App
Add application > Conference
Efficient and Easy way to use
than meeting room system in
Outlook

#3 RSS Encoding
RSS tab > encoding
Choose one of default, ANSI,
UTF8 option

Others

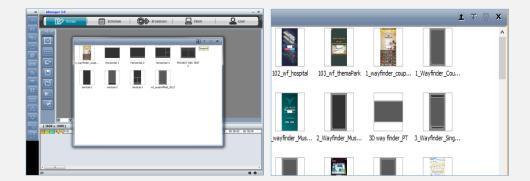

#5 Image in image
Player option > Show 'End button'
You can add image or video during
presentation

#6 Import/Export contents
Open > Import/Export
Easy managing of saved
contents

#7 Transmission type Client list tab

Zip: Better for file capacity

File: Better for file transmission

System Diagram Example

Q-Mobile Manager 1.0

Q-Mobile Manager 1.0

- Developed in Android OS optimization environment
- Better accessibility with new UI design
- Available on over android 3.0 ver.

Why mobile?

- Onsite control of facility
- · Transfer and check the contents onsite
- Flexible response for any problems
- Control it anywhere you want using accessible IP

All main functions of PC ver, are available

Design

Import/Export Design, Add/Delete contents, Order of contents, Playback time

Data Transfer

All/Individual/Select Transfer, Duplicate transmission

Client

Status check Play / Pause / Stop / Re-start Screen On&Off Shut down Show display

Language

Support 4 languages (Korean/English/Chinese/Arabic)

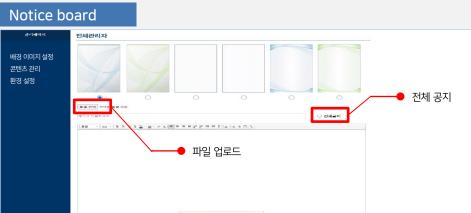

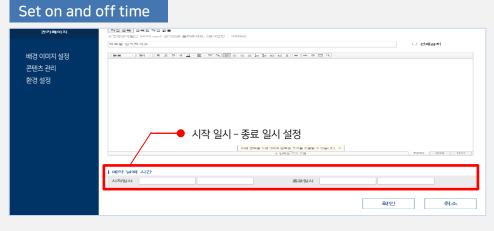

Simple Q-Sign management on a web site

- Easy content editing through online webpage
- ✓ Background and theme editing, Image/Text/Video uploading
- ✓ Set a time for playing content on and off.
- ✓ Notice page edit and delete.
- ✓ Easy content modifying and uploading even for someone who doesn't know CMS software due to user-friendly interface.

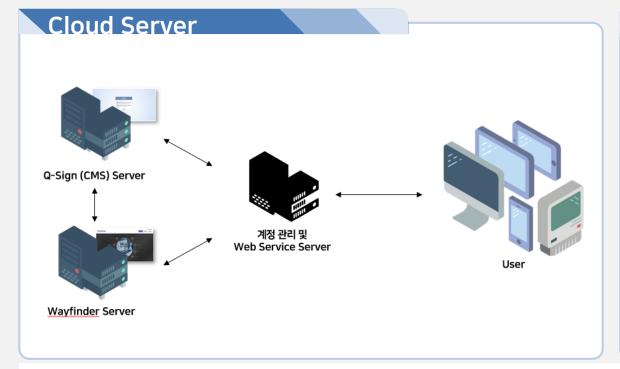

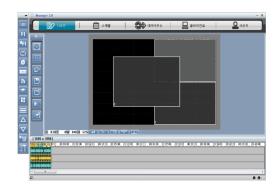

Q-Web 1.0(Cloud version of Q-Sign)

CS Version

- Support 15 languages.
- ▶ Easy installation within 15mins.
- ▶ Content design and schedule transmission.
- Support various application formats.

Schedule

- Daily, Weekly, Monthly schedule
- Selectable schedule management data transfer and USB transmit
- Data transfer
- Immediate/reservation/Emergency Remote power and monitor on/off

Client

- Monitoring clients status

User

- Multi User Registration
- Distribution of User authority

Q-Web 1.0(Cloud version of Q-Sign)

Web based CMS Q-Web 1.0

- ✓ Web based CMS makes you control it anywhere in the world
- ✓ Include main function of CMS(Making, Managing, transmission, Client control, Emergency notice etc.)
- ✓ Efficient managing by distribution of site/client to each manager
- Available in various environment by multi browser support

Developed for effective user environment

- ✓ Simple data flow and network for minimize traffic
- ✓ Only core functions included for minimize system resource usage and hardware overhead
- ✓ Contents will be played stably even data base are downed
- ✓ Automatically restart when client abnormally ends

All main functions of PC ver, are available

Manage Display

Register/Delete/Power control/Screen status/Play status/Check error

Manage Screen

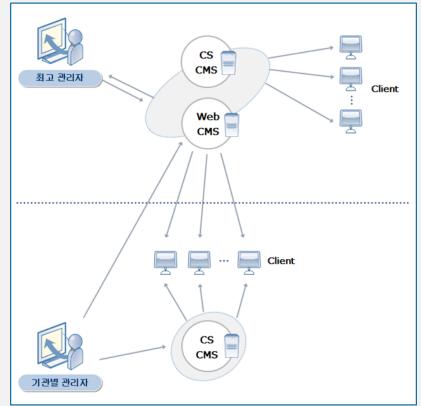

Add/Edit/Delete screen, Add/Edit/Delete/Preview of layout

Manage Schedule

Add/Edit/Delete schedule, Add/Change order/Delete of contents

Manage Contents

Add image/video, Edit registration info, Add/Edit subtitle, Emergency notice
