

A man with brown hair and a beard, wearing a black turtleneck and blue jeans, stands in a recording studio. He is holding a large, white, cylindrical DXO Mark microphone. The studio has grey, geometric, pyramid-shaped acoustic panels on the walls and ceiling. In the background, there is a black tripod with various microphones attached to it. The overall lighting is soft and professional.

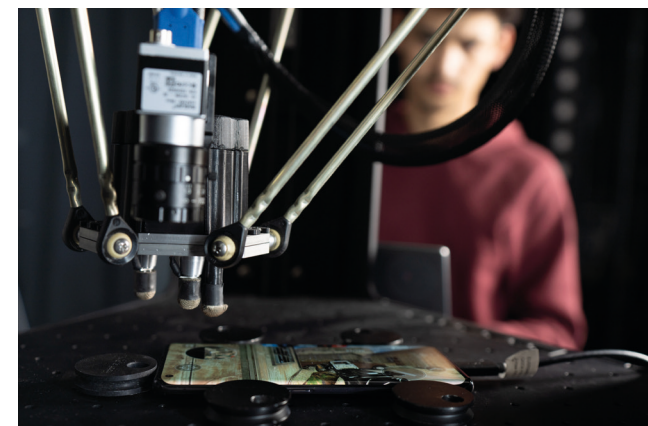

DXO MARK

FOCUSED ON EXCELLENCE

DXOMARK is a French technology company and the international leader in the quality assessment of smartphone cameras, display, audio and battery, and other electronic products such as speakers, video-conferencing equipment, drone, automotive, and security cameras.

As a private and independent company, DXOMARK's mission is to help Original Equipment Manufacturers develop high-quality products for the benefit of the end user.

To guide users in their choice, DXOMARK provides on its website - dxomark.cn & [.com](https://dxomark.com) - the largest database of quality evaluations of products in the form of scores.

DXOMARK, based in Boulogne-Billancourt near Paris, employs 120 people, including over hundred engineers and technicians. These engineers have carried out thousands of tests each year for more than 10 years in the company's 16 state-of-the-art laboratories, which have been developed in-house.

OUR ACTIVITIES

TESTING SERVICES:

Our testing services can be used throughout the product development cycle in each stage such as design, integration, tuning, and manufacturing.

TEST REPORTS:

We have a vast database of smartphones, cameras, speakers that we have tested. Their detailed test reports as well as in-depth market analysis reports that include our test results are available for sale.

LAB SOLUTIONS:

Our lab solutions contain a suite of quality measurement software modules and custom hardware for testing and tuning electronic devices. We provide camera, audio and display lab solutions.

CERTIFICATION:

DXOMARK provides customized certification services. Our engineering teams can design and operate comprehensive customized test protocols for your certification strategy.
