EXPERTYZR™

SERVICE & CERTIFY

HIGH VALUE SECURITY EXPERTISE

Driven by a unique approach called PESc (Protect, Evaluate, Service & Certify), Secure-IC positions itself as a partner to support its clients throughout and beyond the IC design process from security requirements to certified solutions in providing them with best-of-breed, end-to-end cybersecurity solutions for embedded systems and cloud connected objects.

FOR WHOM?

Chipset / Device Vendors

Certification Labs

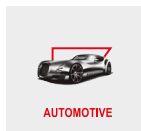

IC Design Houses

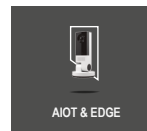

Governmental Agencies

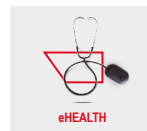

FOR WHICH MARKETS?

AUTOMOTIVE

AIOT & EDGE

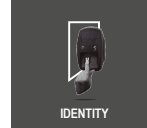

eHEALTH

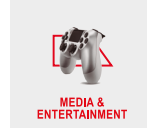

DEFENSE & INDUSTRY

PAYMENTS & TRANSACTIONS

IDENTITY

MEDIA & ENTERTAINMENT

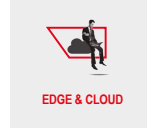

MEMORY & STORAGE

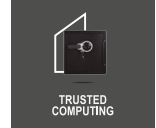

SMART GRID

CONSUMER ELECTRONICS

EDGE & CLOUD

TRUSTED COMPUTING

OUR VISION

ONE DAY, SECURITY WILL BE WORTH MORE THAN DEVICES

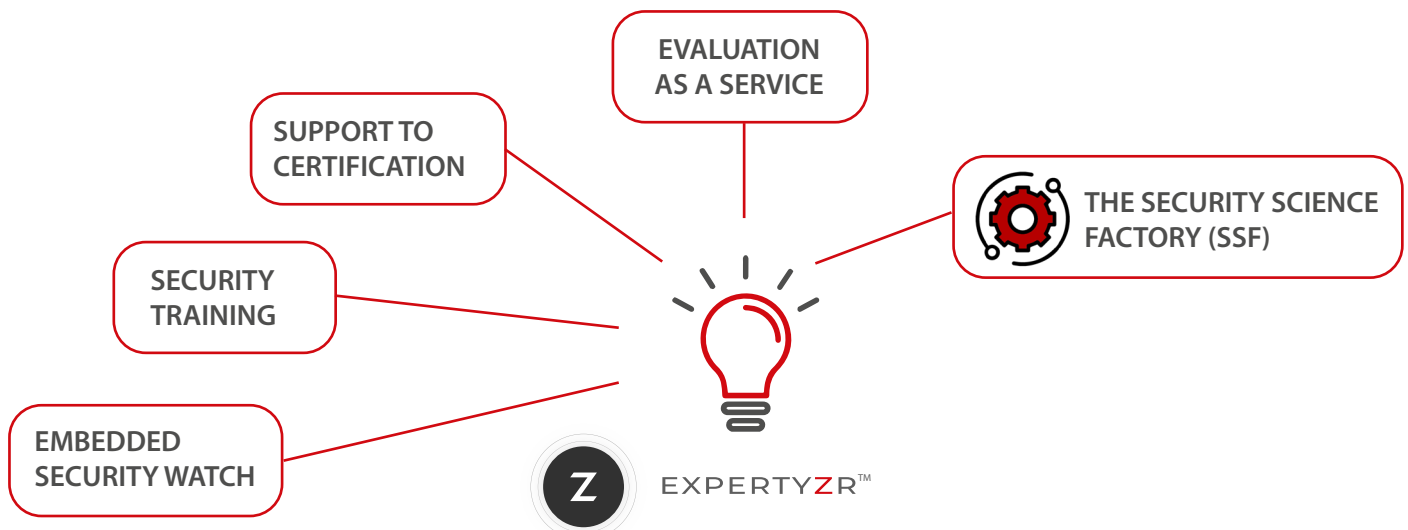

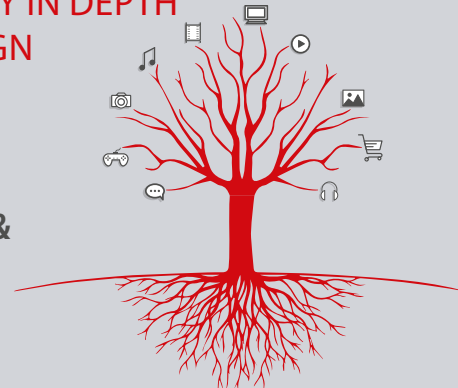

Going forward, there will be more and more interconnected devices or objects in various market verticals, this is what we call the Internet of Things or Internet of Everything. All those objects being interconnected to the cloud, each and every object could be a threat for the whole network. Therefore, the security of the objects or the devices and their lifecycle management are key.

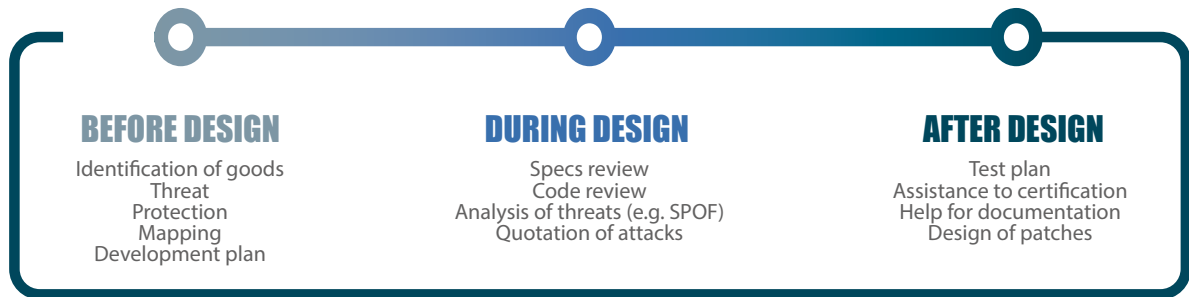

OUR PESc APPROACH

SECURITY IN DEPTH BY DESIGN

- **PROTECT**
- **EVALUATE**
- **SERVICE & CERTIFY**

CONSULTING SERVICES

SECURITY TRAINING

Learn everything you need to know about cryptography, attacks and software and hardware protections with trainings tailored to any level of prior knowledge.

EVALUATION AS A SERVICE

Compliance to any standard certification level.
Software code or real device evaluated (White-Box or Black-Box against Reverse Engineering).
Pre-Quotation & Tailored Design for Security Gap Analysis.

SUPPORT TO CERTIFICATION

Compliance to any standard certification level.
A step by step guidance in the certification process from the roots to certification (CC, FIPS 140, ISO, OSCCA).

EMBEDDED SECURITY WATCH

State of the art synthesis of attacks/countermeasures and on any new security topic.
Independent audit of published attacks and practical feasibility report. Security trend newsletter report.

International
Organization for
Standardization

World Class Standards

IEEE

NORMALISATION

EXPERTYZR™ IS THE METHODOLOGY TO SERVE OUR CLIENTS WITH HIGH-VALUE SECURITY EXPERTISE

THE SECURITY SCIENCE FACTORY

Embedded cybersecurity is an ever-changing domain: new threats are discovered all the time. As a result, protections must be updated as quickly as possible, creating a competition between attackers and designers. In this context, it is paramount to sustain an active research and development activity. That is why, we have created the Security Science Factory (SSF).

The Security Science Factory is Secure-IC's engine to generate security innovations. The SSF gathers our researchers and experts to advance security technologies, in our state-of-the-art laboratories in Rennes, Paris, Singapore and Tokyo.

SSF is at the heart of best-of-breed security solutions. It conducts advanced R&D and projects as well as Thought Leadership activities, published more than 200 scientific papers and registered 40 families of patents, shares knowledge and helps set major security standards.
