WalkMe Mobile

Guide, Engage, and Delight Your Mobile Users

WalkMe Mobile is a code-free overlay on mobile applications that empowers agile product management to keep users engaged and happy, without tapping high-value development resources or needing app store approvals.
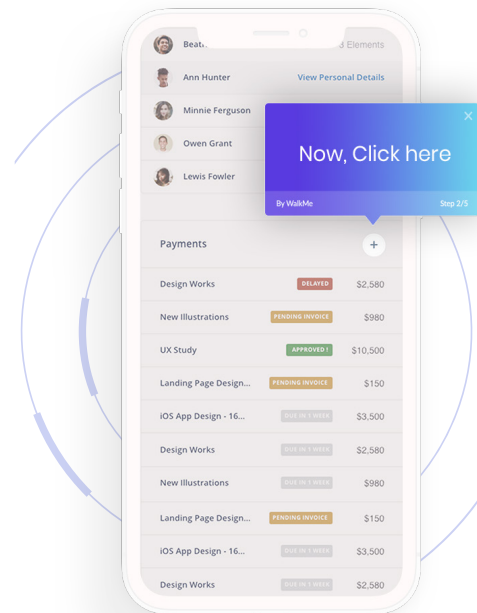

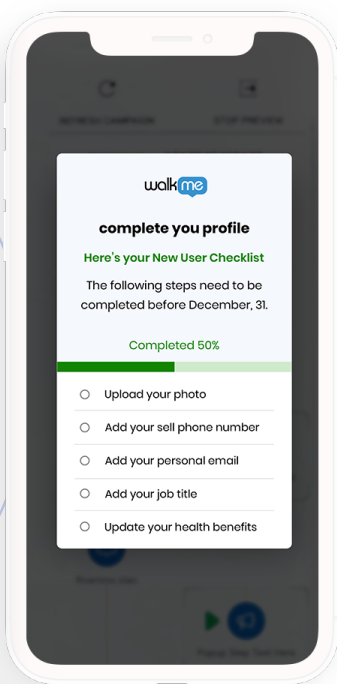

With WalkMe Mobile:

Deliver beautiful code-free UI without development resources or app store approvals

Create personalized experiences for first-time or advanced users

Drive users to rate, update, and upgrade your app with targeted engagement
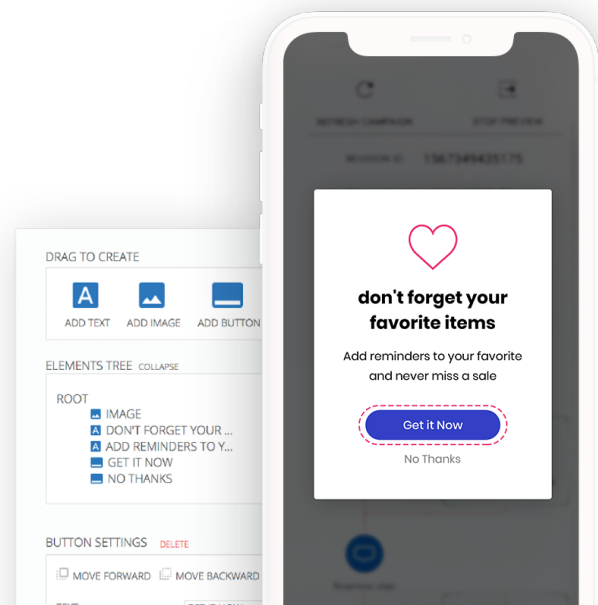

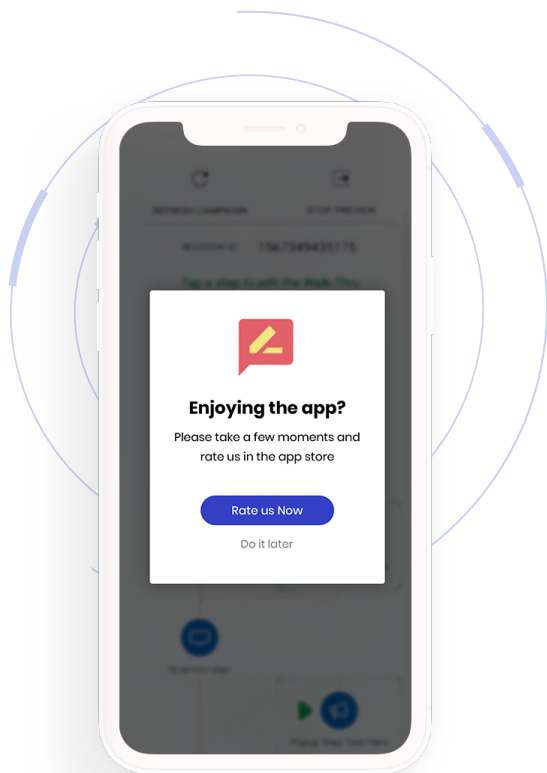

Enhance Onboarding and Adoption

Accelerate your user time-to-value with instant engagement and guidance campaigns using welcome carousels and onboarding task lists. Announce new features with Shoutouts and provide step-by-step guidance with Walkthrus. Remove empty taps and simplify user flows with automation. Ensure your customer's experience is never disrupted, even when they don't have internet connectivity, with WalkMe Offline Mode.

Deploy UI in Real Time

Easily build, preview, and test WalkMe Mobile solutions on your phone or in-app using WalkMe Power Mode. Customize the UI to match your brand using our WYSIWYG editor and deploy in a moment's notice outside of sprint cycles, without app-store approval, and preserve your high-value developers for strategic innovation.
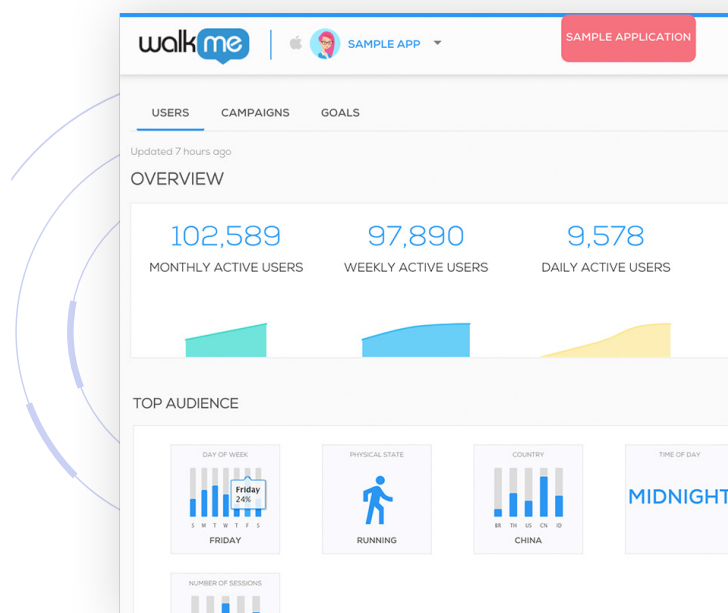

Drive Desired User Behavior

Drive action from the right users at the right time using data triggers and user segmentation. Reduce version fragmentation and maintenance dependencies by prompting outdated app users to update. Attract dormant users with a push notification or email that links-back to your app and instantly engages them with WalkMe content. Increase quality and quantity of app-store ratings from your superusers. Encourage in-app purchases or upgrades when users are most likely.

Track and Monitor Usage

WalkMe Mobile provides powerful analytics and meaningful insights so you understand how your app is being used. Enhance your capabilities by integrating with third party analytics or CRM systems to make data-driven decisions. Stay up-to-date with your users with daily analytics summary emails.

About WalkMe

WalkMe's leading digital adoption platform transforms the user experience by closing the gap between technology and humans. Using insights, guidance, and automation, WalkMe's overlay drives customer adoption of mobile and web products to increase retention, reduce support, and drive revenue growth - without taxing high-value development resources. Founded in 2011, WalkMe is used by more than 2,000 high-growth and enterprise companies globally, including 30% of the Fortune 500.
