Markings on the side of the e-mark ensure a reliable positioning on the surfaces you wish to prettify. A notch on the side of the device shows the center line of the imprint.

Design & print in seconds

Design your own imprint in the app (such as texts, fonts, colours, pictures, icons), send the artwork directly to the e-mark create with just one finger tap and print immediately.

Free app

The e-mark create app is available for devices with Android 5.0, iOS 11 or higher. You connect your e-mark via Wifi and send imprints through that.

Print on many surfaces

Such as on paper, cardboard, wood, textiles, cork and more.

Multi-colour printing

Not one, not two, not three colours - print any colour combination in high resolution.

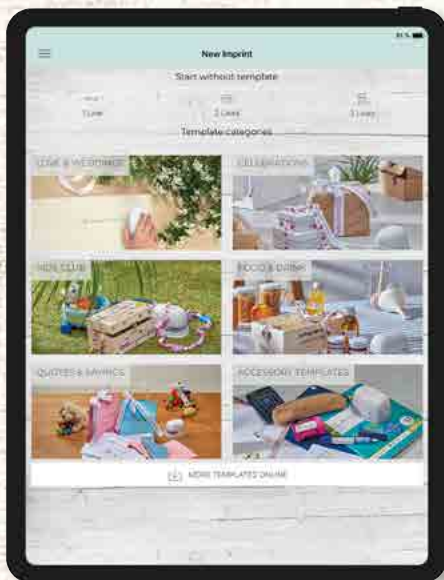

Portable and mobile

Take the e-mark create with you - computer-mouse sized, it easily fits in your bag! Design and send imprints with your mobile phone or tablet and print with the e-mark no matter where you are.

Design it e-mark create app

The e-mark create is operated through the e-mark create app. Design your imprints directly in the app by adding images and texts or find numerous premade templates already in the app for immediate use.

Send it and Print it

Send with just one finger tap via WiFi, generated by the e-mark itself, and print with a simple sideways movement to the right or left. You can also use the special printing modes such as continuous printing (e.g. to print on ribbons or to print patterns) and three line printing. Creating made easy.

COOL!!!

Make it.
