Master the ever-expanding **edge**

Up your game on endpoint management

With Celerway, easily mass-configure and mass-update hundreds, if not thousands, of devices. From dashboard views, maps to remote access to each device, Celerway's cloud administration platform Nimbus is packed with powerful features and an intuitive interface. A complete REST API is available for integrating into your existing solutions.

Simplify your network complexity

Need an effective means to simplify a network of 100x endpoints? With Celerway, easily manage consistent policies across all devices for traffic, application, and/or group priorities.

Modernize your endpoint security

The modern era of networking is plagued by ever-increasing cyberthreats. Deliver always-timely, always-on security updates without additional burden to your management or support staff. Offer blazing speeds and secured network connectivity: every tunnel used is encapsulated with WireGuard®, a modern VPN with state-of-the-art cryptography.

Future-proof today's investment

As 5G matures and new features are incrementally rolled out, safeguard your investment by ensuring your endpoints can easily adapt to tomorrow's development. Celerway's future-backed hardware specification and software design ensure your endpoints will not become bottlenecks.

Our **mobile-first** approach powers your network with unrivalled performance & resilience

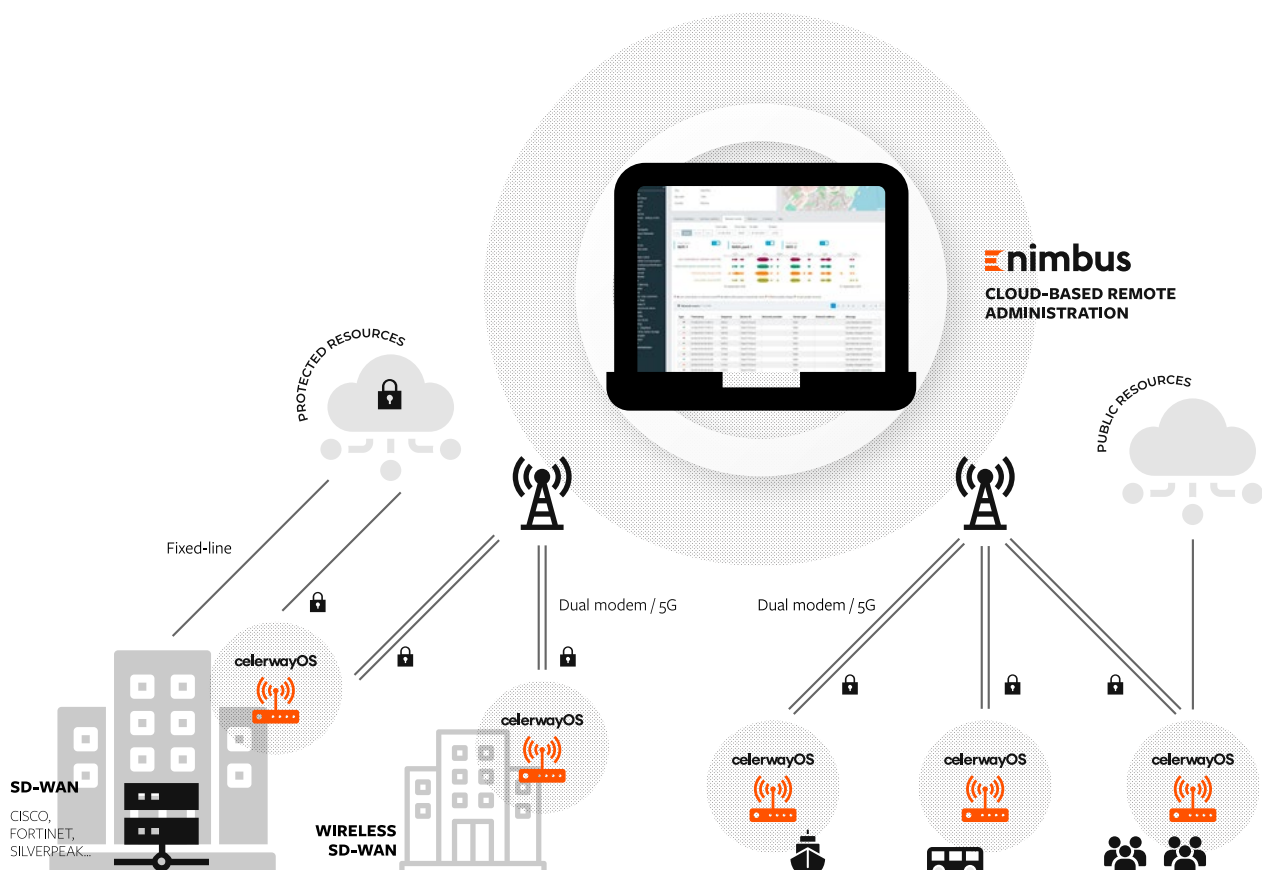

Seamless and secure connectivity

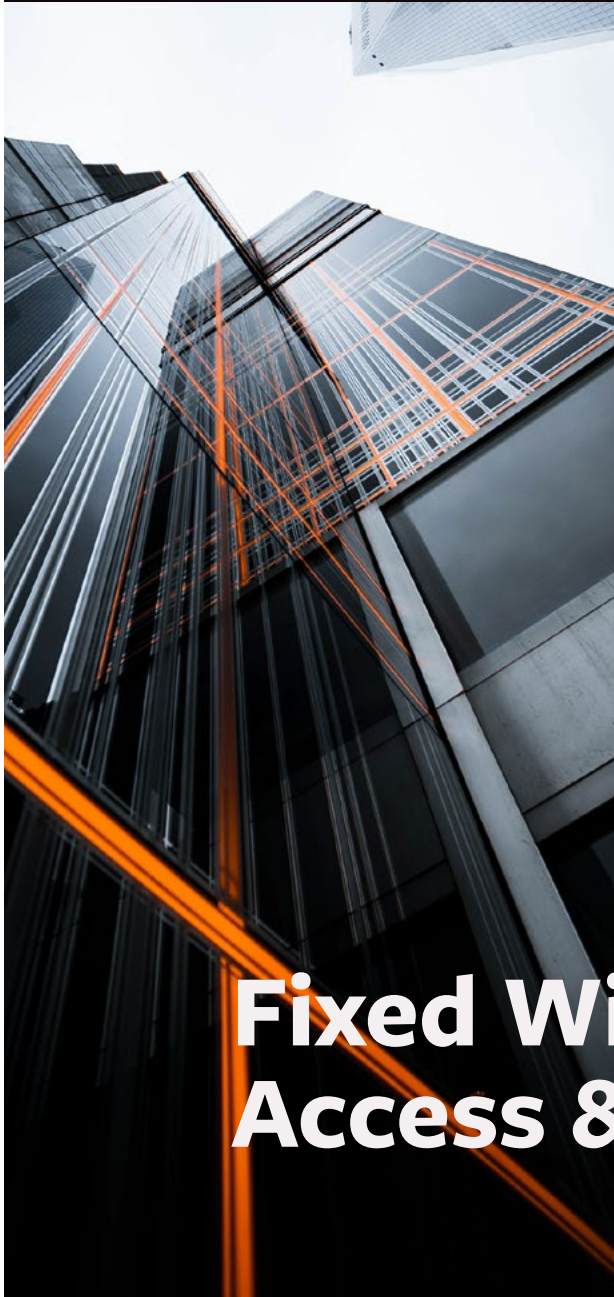

Meet the modern demands for mobility, performance and security. CelerwayOS leverages multiple cellular connections, and when used with Phantom, users experience them as a single uninterrupted and secure connection. Failover interruptions are relics of the past.

Beyond cellular backup

Maximize your network assets. CelerwayOS provides 5G/4G modules so cellular can be a primary alternative.

Configure any combination of cellular-only, cellular-topup, and/or cellular-failover. Topup allows cellular to kick in when fixed (or primary cellular) connection is saturated.

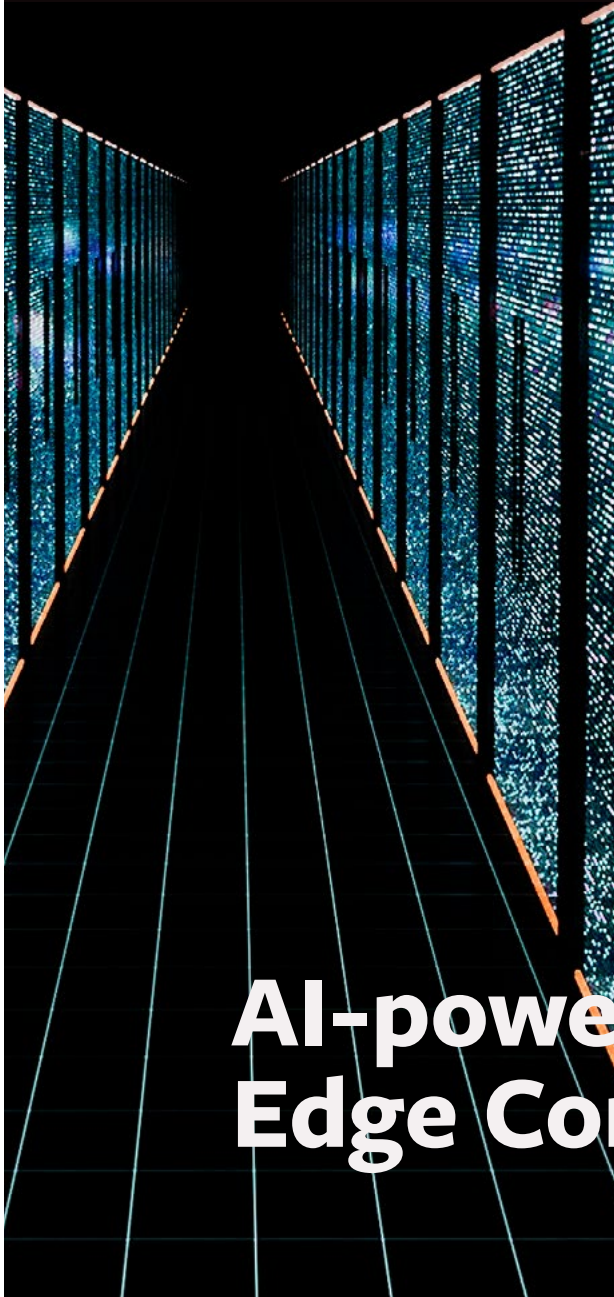

Discover our broad spectrum of **use cases**

Unlock revenue opportunities and deliver the benefits of fixed-line broadband services with Celerway's mobile-first edge platform.

With multiple cellular connections, Celerway Phantom ensures uninterrupted and secure connectivity with unrivalled performance for both FWA & Private 5G use cases.

Take coverage to the maximum with purpose-built, integrated solutions optimized for urban or rural applications.

Fixed Wireless Access & Private 5G

Discover our broad spectrum of [use cases](#)

Get ahead of the Industry Internet of Things (IIOT) revolution.

Celerway's edge platform, with its future-proofed hardware specification and software design, effortlessly powers AI-driven smart devices, sensors, advanced analytics, and ML implementations.

Combining multiple cellular connections, Celerway Phantom delivers the performance and security that industries demand.

AI-powered Edge Computing

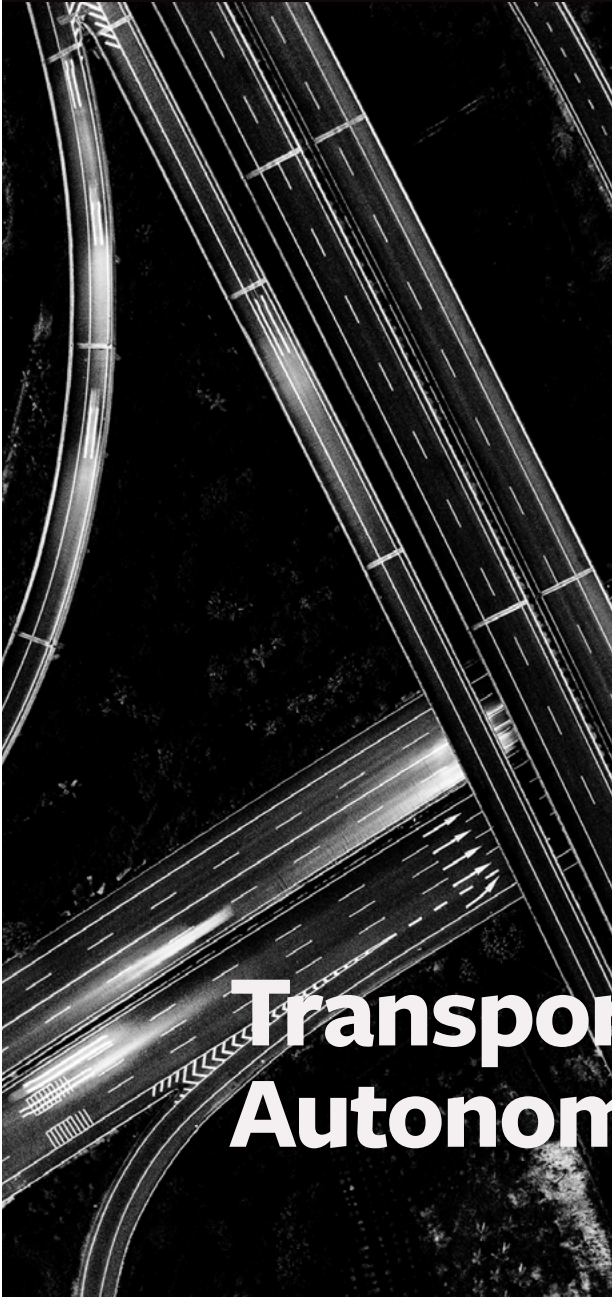

Discover our broad
spectrum of **use cases**

**Offer the professional
difference and deliver
business-grade
mobile connectivity
that the modern
workforce demands.**

Celerway combines multiple cellular
connections with private or public
WiFis to ensure blazing performance
anywhere. With Phantom VPN,
connectivity is seamless and secure.

Battery-powered and palm-sized,
it is the ultimate office on-to-
go for true professionals.

Remote, Field & Nomadic Workforce

Discover our broad
spectrum of **use cases**

**From near-shore
vessels, trucks, buses,
to unmanned vehicles,
and UAVs, deliver the
flawless connectivity
with resilience, security
and network visibility.**

With Celerway Nimbus, manage entire
fleets with ease and mass-update/
configure with just a few clicks.

Choose from integrated
solutions designed for outdoor
and rugged applications.

Transportation & Autonomous Vehicles

The magic here is in how Celerway uses 5G.

Andreas Martin Aanerud, CTO, Qvisten Animation

Celerway has upped the connectivity game massively, offering a combination of speed, uptime, fallback connectivity, and cybersecurity levels we have not seen anywhere before.

Matthew Buley, Co-Founding Director, MIMO Connect

CelerwayOS is lightweight and low overhead, delivering impressive performance on a wide spectrum of hardware specification.

Johnnie Dymock, CEO, Wired Broadcast

Integrating their robust wireless WAN software, we now offer a fully managed service that uses multiple LTE, Wi-Fi, NB-IoT, and satellite networks seamlessly. Our end customers benefit from global and secure business continuity in one convenient and cost-effective package.

Robert Koldys, VP Marketing, Strategy & Business Development, Telecom26 AG
