

1997-2005, subsidiary of B.I Corporation (Japan)

Founding member of TAUS

Statistical syster Sony, Honda, Subaru, etc.

### Al applied to language processing

#### **DEEP ADAPTIVE MT**

We create neural networks capable of translating text and documents to and from any language. We have generic solutions adapted to the needs of the customer that can be in our cloud, in the customer's cloud or on-premises.

#### **ANONYMIZATION - MASKER**

Artificial intelligence, along with NLP techniques, allows us to create specific applications for the processing of texts and documents, including summarization (summary generation) and anonymization (GDPR neutralization of documents). Pangea Masker can be in our cloud, in the customer's cloud or on-premises.

#### **CATEGORIZATION / ANALYSIS**

When there are hundreds or thousands of documents to be analyzed, we create neural networks that automatically classify, analyze, and extract key information. Automation is essential to squeeze the value out of generated documentation faster than in manual processing.

# Don't miss out and try ECO!

If you want to know how our advanced and user-configurable Al works for Deep Adaptive MT services, Anonymization, Knowledge Discovery and Named Entity Recognition, don't hesitate and try ECO v3!

#### **CLIENTS WHO TRUST PANGEANIC:**

Largest European digital infrastructure contract: iADAATPA

PangeaMT chosen to participate in

DATA for Al: Machine Learning Deep Learning

# Request a FREE Demo

## Guarantee & Quality

+100 languages pairs

**Efficiency**: high-volume translation in record time (1 million pages per day)

**Industry Agnostic** 

**Secure storage**: in the cloud or a private installation

**Integration** with popular APIs (Memsource, MemoQ and SDL)

Engine creation, configuration and cloning for unique domains

#### **Tailor-made Prices**

Subscriptions with prices tailored to customer needs. Choose the plan that best suits your company or speak to an expert that will advise you on which service is best for you.
