

Automating Law Enforcement Liaison

Optimising Operational Efficiency

Taking the strain and operational overhead from Law Enforcement investigation and intelligence liaison

Focus112

Focus112 Legal Compliance and Disclosure Management instigates cell-phone data exploitation for implementing operational efficiency whilst providing key evidence to prosecute.

Focus112 is a proven system for managing requests from Law Enforcement and Public Safety Answering Points. It has been deployed around the world to make the task of investigation and intelligence activities between Law Enforcement Agencies and cell-phone companies as effortless as possible.

Delivering:

- 90% automation of requests
- Reduced risk of non-compliance
- Timely delivery of responses
- Integration with back-end systems
- Automating requests into uniform responses
- Streamlined case management
- Reduced cost per case
- Centralised document management
- Increased revenue capture
- Enhanced reporting for cost efficiency analysis
- Control staffing levels
- Security and audit trail

Focus112 helps to balance the conflicting duties of assisting law enforcement, ensuring customer privacy as well as protecting your organisation. It has been designed to alleviate the pressures associated with sensitive data release in increased dynamic situations.

Focus112 can be stand-alone or an end-to-end management solution. Automating request management processes through strict enforced configurable controls. It receives and logs requests before automatically retrieving the required data and dispatching the response, restricting agencies and agents to only making requests they are legally entitled.

Focus112 connects to live networks and extracts real-time data from back end systems including Ab initio, Oracle, Terradata and SQL. Storing up to 2 petabytes of data to allow quick access to information and fulfil requests.
