

SMARTGOLF

SMART AIX Club

İde@Link

Artificial Intelligence Swing Analysis

Swing analysis with a club equipped with a precise IMU sensor

Diagnosis through AI algorithms and logic

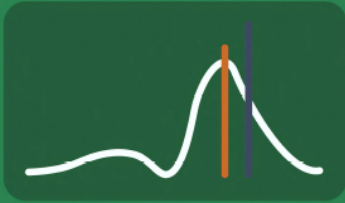

Analyze the entire section of swing form with real-time avatar

Coaching to improve distance and trajectory

SMARTGOLF

Features

Accurate swing
real-time representation

Accumulated display of
ball trajectory and distance

Sophisticated analysis of
speed, tempo and angle

3D avatar based on
real club swing data

Improvement suggestions
based on AI algorithms

Swing

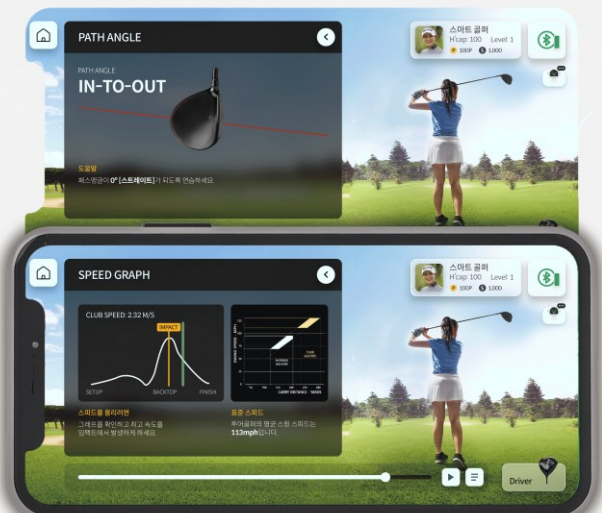

Anytime, anywhere
Convenient
swing practice

Analysis

Speed, Path/Face Angle,
Smash Factor, Trajectory

Analysis of path/ face
angles at the impact

Analysis
on impact speed
during the entire swing

Shows shaft angle difference address and impact

Shows the ball mark on head surface hitting position

Ball trajectory, AI determination

Coaching

Displays the ball trajectory and swing shape

Show cumulative trajectory and coaching

Function

Smart Grip

Smart button
and vibration function
for precise address

Leader Strap

Complement
the short swing trainer
with a 30cm strap

Silicon Head LED

3 LEDs indicate the status

Power
connection

Address
accuracy

Impact
accuracy

Weight Ring

Detachable weight ring
that changes the weight
of the head
