

E-Management and  
Circulation of Documents,  
Digital Signatures,  
Cases and Workflows

A new concept  
for processing  
day-to-day tasks and  
transitioning into the digital age

**Paperless &  
Inkless**

**Lower cost**

**Faster task  
completion**

**Less working  
hours**

- A state-of-the-art web platform for managing information and workflows, which are organized into cases that are captured and circulated in documents
- An information system that can lead a company or public body to paperless and inkless operation
- A digital infrastructure that comes to complement and integrate other information systems of a company or public body
- A system fully compatible with the European legal framework for the use of digital signatures and data management (GDPR – eIDAS)
