

# Charging Engine and Plan Design

The world's most advanced charging system

Unparalleled scalability, hyper-personalization, and shockingly cost-effective, Totogi Charging System applies the power of the public cloud to real-time charging and plan design.

## Webscale performance and real-time plan design

Totogi Charging Engine leaves your old tech, on-premise charger in our dust. The full separation of stateless application logic from the customer database allows auto-scaling to support billions of subscribers. At one million transactions per second and climbing, our unique approach can handle 100% of the world's charging volume. Read our [1M TPS Performance Benchmark](#) whitepaper to learn more.

Totogi Plan Design leverages key elements in the public cloud so you can acquire new subscribers, prevent churn, and crush your competition! We take a completely different approach to plan design – always and automatically scanning the globe, recording all existing rate plans from all CSPs – which you can use to accelerate decisions and increase plan performance. Better intelligence. Better results.

## Benefits:

### ***Shockingly cost effective***

Cloud components bring a big reduction in cost. Totogi is 80% cheaper than private cloud, on-premise systems, and we even offer a FREE TIER for up to 500M transactions per month!

### ***Model uptake to market***

Totogi constantly automatically scans the globe, recording all existing rate plans from all CSPs – you can easily compare plans before you launch to accelerate decisions and increase plan performance. Totogi also forecasts uptake on any given plan as well as the impact to your revenue and margin.

### ***Instant deployment of plans***

With Totogi Plan Design, you can focus on crafting and launching amazing plans that generate revenue. Simply load them up and go. No more missed market opportunities waiting for IT!

Once the team lands on the optimal new plan to launch, it can be created in minutes and rolled out to subscribers instantly. It's that easy – that fast!

### ***Performance, scale and reliability***

Get 10x more scalability and unmatched reliability and resilience with our Graviton2 (ARM)-built charger. The fastest available processors and super-scalable DynamoDB give you high-speed connections to AWS' global data centers, handling entire countries and even continents of subscribers simultaneously.

## ***Get started today***

*Let us show you how Totogi can handle your complex plans and scale better than your existing charger with a free technical tear down.*

## ***Ready to be the world's most advanced telco company?***
