

DaaS Anywhere, On Your Terms

Flexible IT is the future of DaaS, where edge computing and cloud computing converge, allowing virtual desktops to run anywhere or everywhere.

flexxDESKTOP

FlexxDesktop offers the possibility and flexibility to bridge current on-premises infrastructure and the public cloud without any upfront investment. FlexxDesktop brings the advantages of the pay-as-you-go public cloud to on-premises from day one, ensuring optimal user experience while users are migrating to the public cloud. Enterprises can combine virtualization platforms, clouds, and data centers to deliver virtual desktops on-premises and in the public cloud.

FlexxDesktop | Optimizing DaaS for the Enterprise

Converging Cloud & Edge DaaS anywhere and everywhere

- Integration with any cloud
- Integration with Citrix, Microsoft & VMware
- Single pane management for hybrid cloud

Pay-As-You-Go DaaS DaaS on your terms

- No up-front investment
- Combine on-premises with public cloud
- OPEX focused

Better End-User Experience Simplified management

- Seamless transition from any platform to any platform
- Enhanced user experience and security
- Reporting, Monitoring, and Troubleshooting

Flexible IT

allows the enterprise to further its digital transformation strategy but not incur increased costs. We are the future of hybrid work, where edge computing and cloud computing converge to allow virtual desktops to run anywhere or everywhere. FlexxDesktop enables enterprises to adopt DaaS by integrating any cloud, with no up-front costs and simplified management.

FlexxDesktop allows enterprises to migrate existing environments to any cloud with ease at a cost that is OPEX friendly

"Flexible IT allows us to monitor the performance of our DaaS platform more proactively, which helps us to meet our service level agreements and deliver an exceptional desktop service for our customers."
