Save time and costs by issuing your own Certificates
with the vinCAsign Certification Authority (CA)

Get Legally-Compliant
Digital Certificates for Your
Transactions

Digital Identities for Users
and Electronic Devices for a
Higher Degree of Security

VINCASIGN® FEATURES

Trust Enhanced Through Qualified Certificates

Create your own qualified certificates and seals, with the highest degree of safety and legal recognition through Vintegris' PKI platform and Certification Authority (CA), vinCAsign, developed in accordance with eIDAS Regulation.

Reduced Costs with Your Own Digital Certificates

By issuing their certificates and handling them through nebulaCERT, organizations can reduce costs significantly. Besides, the certificate management process is automated for greater convenience.

Faster Sales with Your Own Registration Authority

With nebulaSUITE, organizations can become a Registration Authority (RA), to issue, control, manage, and revoke their own certificates for their employees, providers and clients. This allows them to sell their products online with all legal guarantees and close sales faster than before with total autonomy.

Vintegris is a Certification Authority and manufacturer of systems and applications for the issuance, renewal, centralized management and audit of the use of digital certificates; discovery and inventory of personal and service digital certificates; digital signature legally binding; Robust authentication and administrative telematic notifications management .

Its flagship product is nebulaSUITE, the all-in-one solution for digital identity. Vintegris' clients include leading banks, insurance companies, legal, health retail trade, governments and public sector organizations.
