

Create professional events with live video

Create your events easily with the only all-in-one solution that includes browser-based video production, corporate streaming platform, and powerful business tools.

The most complete live video platform

Create and stream outstanding content

Create professional live video in any format you need and make your brand stand out using the [Live Studio](#).

Stream the event in your own website, in an exclusive Watchity environment or on your social networks thank to [Multistreaming](#).

Provide a great viewer experience

Allow universal access and high-quality video viewing for all your attendees with the [Event Room](#).

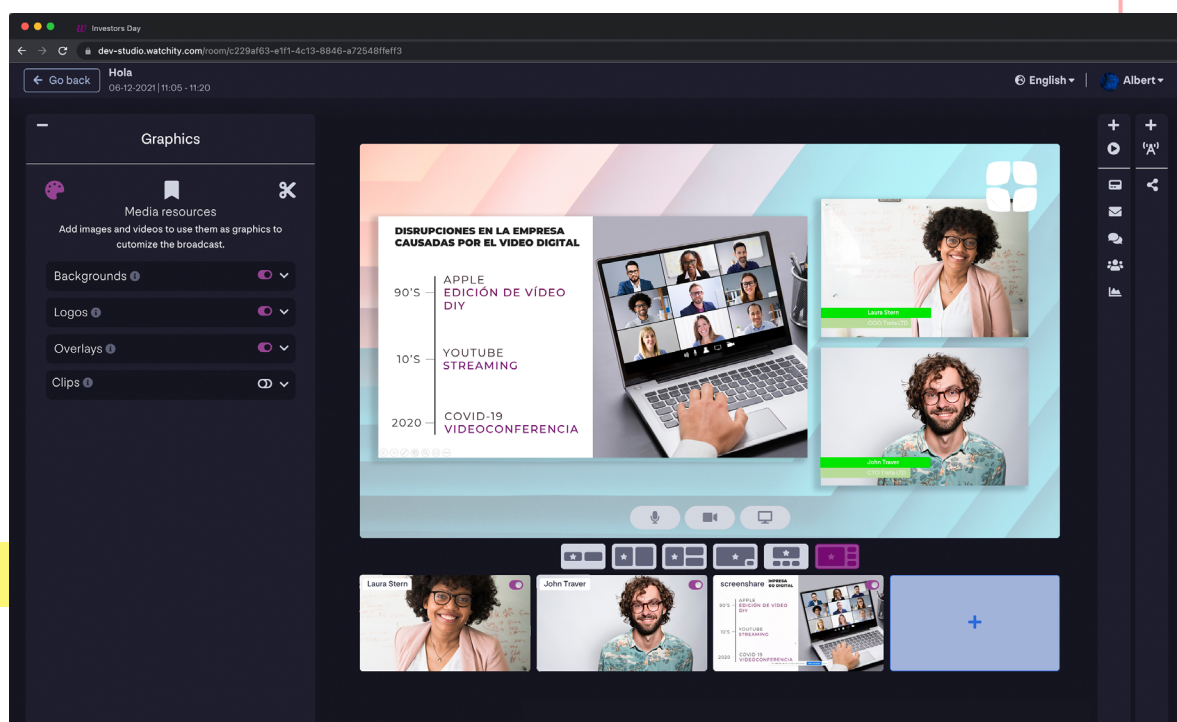

Connect with your viewers and keep them engaged with built-in [Participation and interaction](#) features.

Manage your events from start to finish

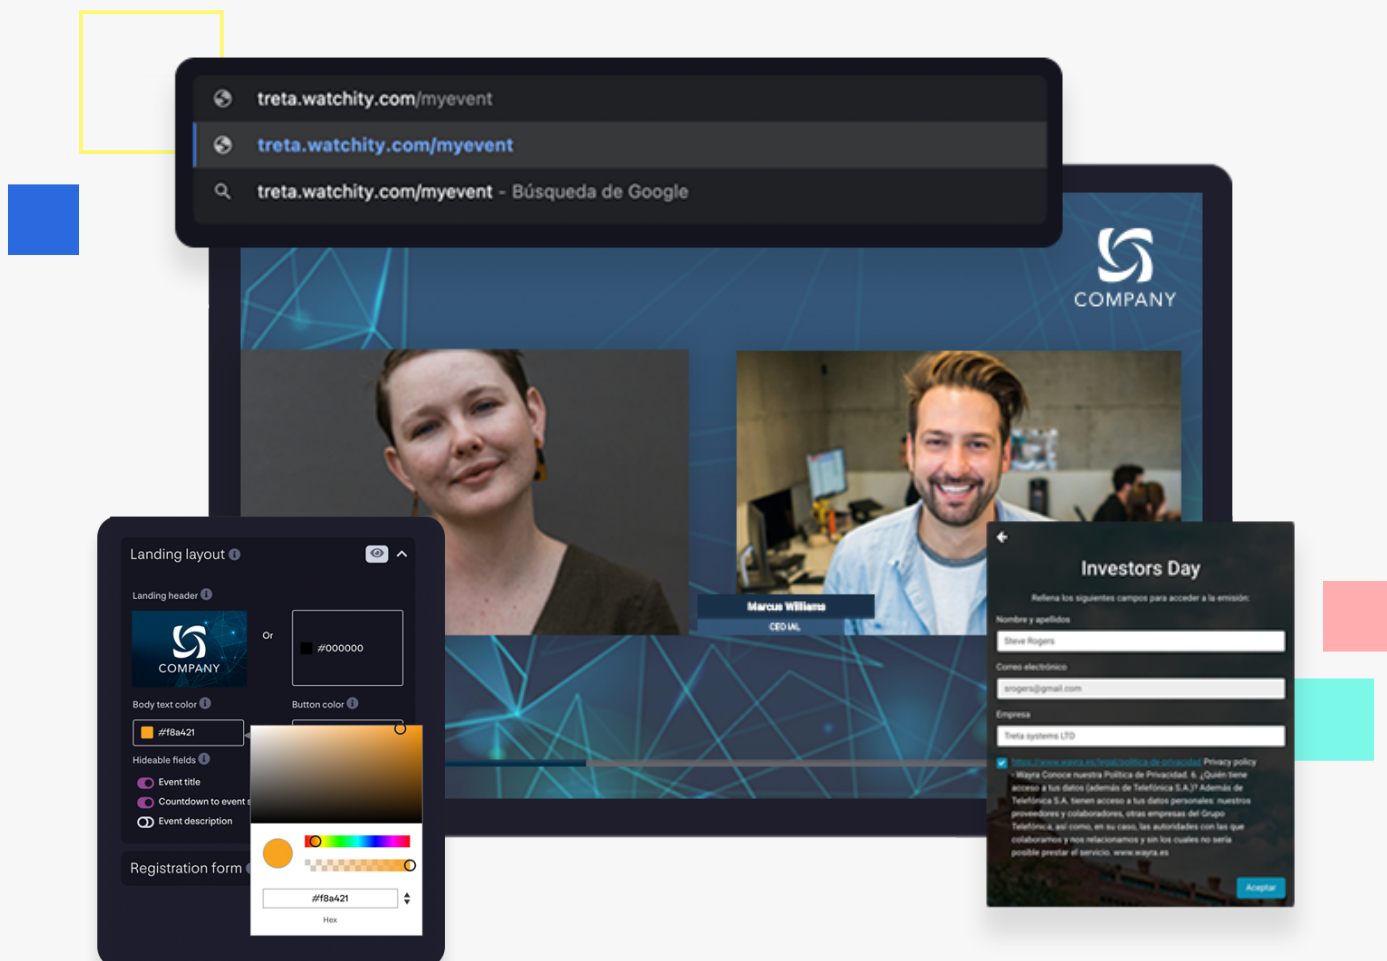

Promote and personalize your event to attract viewers using the [Event Marketing](#) features.

Analyze viewer behavior and make data-driven decisions with attendee and video [Event Analytics](#).

Personalize the experience with the presence of your brand

Use your logo, graphic resources and corporate colors to personalize everything the viewer sees during the event, and create experiences governed by your brand.

A single comprehensive platform for your events

With the versatility of Watchity, any member of your organization will create professional events that captivate audiences, keep them engaged and drive results.
