# Why BI4Web?

## Make smart and informed decisions

Access to information on-demand, anytime, anywhere and on any device.

## Watch your company's data

Access to any data source in your organization in a efficient way. Find growth and improvement opportunities based on a holistic view of your data.

# Why BI4Web?

## Graphics reveals opportunities

Choose among more than 100 types of graphics; which enhance your strategic vision of the business. Go as further as you need in data visualization, for example from global sales information to specific salesperson data.

## All in one

BI4Web meets all data analytics and reporting necessities of your company. There is no need to go for different software solutions for every need. Start today enjoying the benefits of centralization.

# BI4Web Suite

## 100% web visualization

With BI4Web Viewer, every user can access information from any device with a web browser. Our interface is dynamic and intuitive.

BI4Web Viewer optimizes data analysis and enhances business performance.

Users can interact with data at any level through analytic documents and graphics from a global perspective to detailed information.

# BI4Web Suite

## A solution tailored for your business

With BI4Web, you will have covered every information necessity in your organization.

Build stunning dashboards and keep an eye on your business areas, whether from a general or specific perspective.

Keep tracking of your KPI's with our graphics, identify trends, and base your action plans on reliable data discoveries.

# Solutions

## Analysis of hierarchical structures

Detect hidden patterns in data with BI4Web hierarchical structural components.

Our analytic models are fully interactive, have an optimum usage of visualization space, and allow users to analyze concrete cases among enormous amounts of data.

# Solutions

## Geopolitical analysis

BI4Web´s gallery maps foster a strategic management of your company by associating data from your business activities with geopolitical representations.

You will be able to quantify how your business is performing in specific areas such as sales density for country or region. And even accomplishment of goals by business area.

Besides that, you can upload customized maps or blueprints, for example from your production plant.

# Solutions

## Multidimensional analysis

Set metrics and dimensions as you need and visualize data from different perspectives and at any depth.

## Reporting

Access to an enormous amount of data via our reporting feature and discover what matters for you.

# Licensing

## On-premise

Deploy BI4Web in your private cloud or on your premises. Our enterprise license grants access to unlimited users and the best cost-benefit ratio.

## Cloud

Enjoy BI4Web with easy deployment in our server. Choose as many users as you need for your company.
