

 **ADDEVICE**

Custom Mobile App Development

# Who We Are

**Addevice is a full-cycle mobile app development company**

We create customized and innovative **mobile applications** integrated with the latest technologies.

Addevice provides **mobile apps maintenance** and supports applications through all stages.

Our team consists of **highly experienced developers** specializing in Machine Learning, IoT, Augmented and Virtual Reality.

# Why Addevice

- **10+ years** of experience in mobile app development
- **100%** of developed projects are live
- **90%** of our clients are our long-term partners
- **100%** of successfully delivered projects

# Services We Provide

## **Business Analysis**

---

Business strategy building as the first step of app development.

## **UX/UI Design**

---

Robust app design aligned with business goals and customer expectations.

## **App Development**

---

iOS, Android, and Flutter app development based on the latest technologies.

## **Ongoing Development & Support**

---

Full-service support and maintenance with ongoing development, performance, and security monitoring.

## **Development Team Extension**

---

Remote business analysts, designers, developers, QA engineers, and other professionals for your team.

# How We Work

OUR 7-STEP DEVELOPMENT APPROACH

## **Support**

Technical support and maintenance of a project on all stages

## **Analysis & Planning**

Understanding problems and finding the right solutions

## **Projects Requirements**

Defining technical requirements and the project's timeline

## **Development**

Building of the first product version based on pre-defined requirements.

## **Testing**

Thorough testing of the app and final issues fixing

## **Deployment**

Launch of the product with publication in relevant app stores

## **Profound Interception**

Start the work on a project at any stage - from startups to products already in development.

# Our Areas of **Expertise**

Healthcare

eCommerce

Real Estate

On-Demand Economy
