Advanced 5G Network Solutions

– Convenient connectivity wherever required –

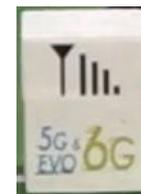

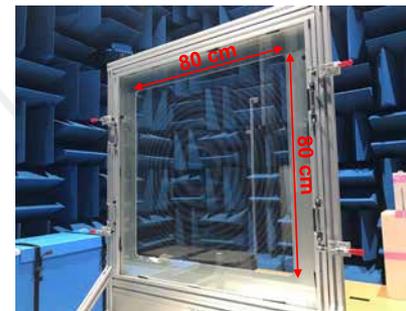

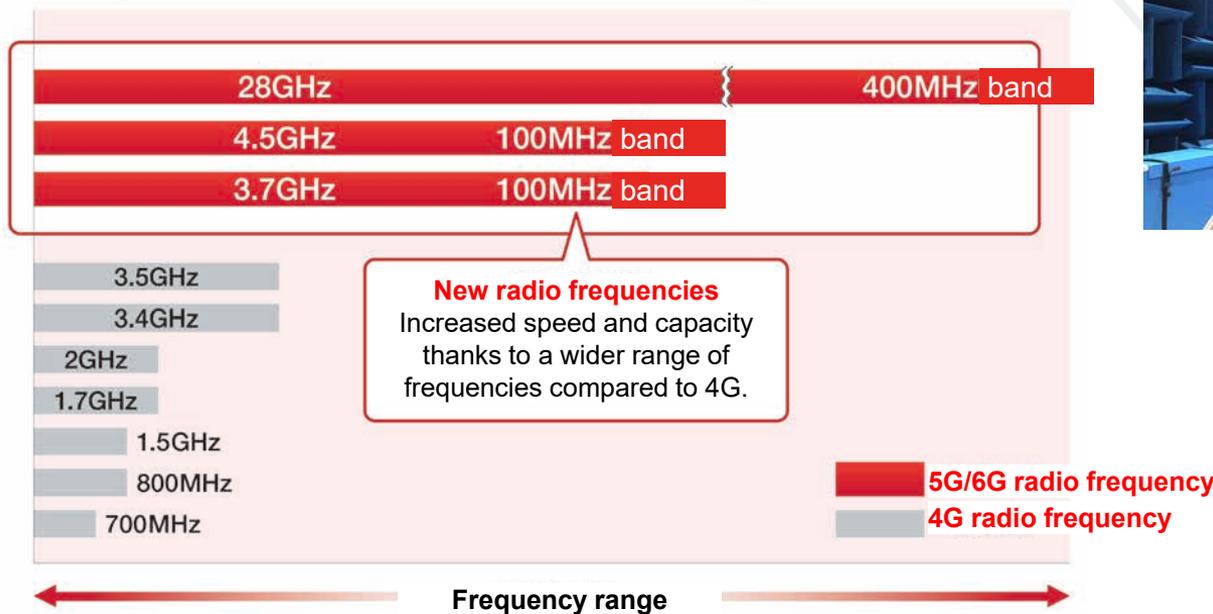

NTT DOCOMO,INC.

5G and 6G

Changing worlds with you.

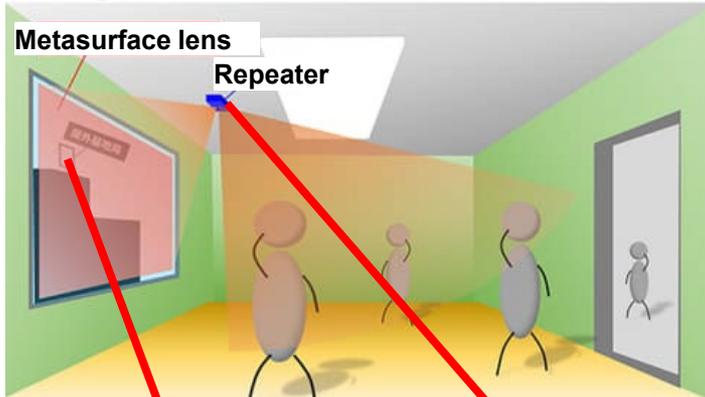

DOCOMO offers network products that maximize the high-speed and high-capacity communication potential of both 5G and 6G.

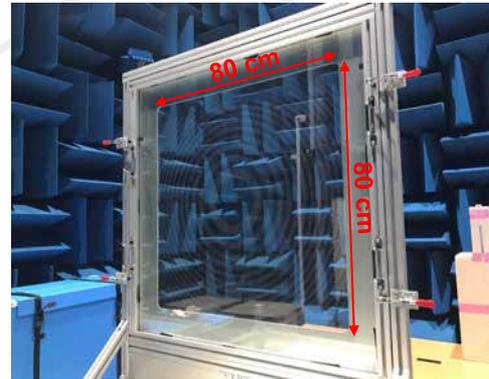

Metasurface lens

Enables high-frequency radio waves from outdoors to reach indoor spaces efficiently

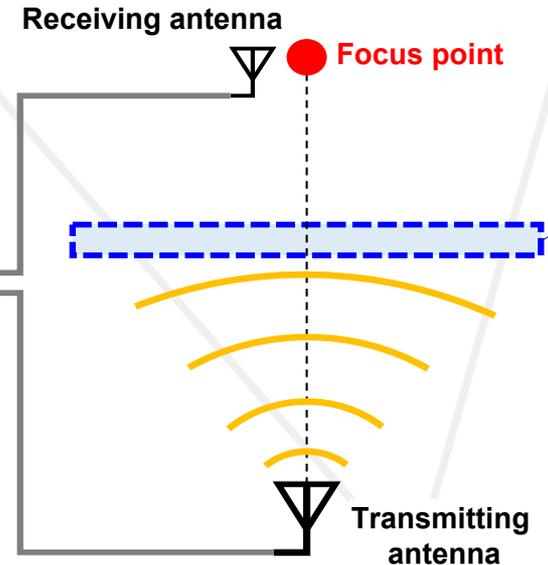

- Metasurface lens**
Guides radio waves to focused locations
- Repeater**
Amplifies radio waves to ensure coverage

Metasurface lens technology turns window surfaces into radio-signal receivers

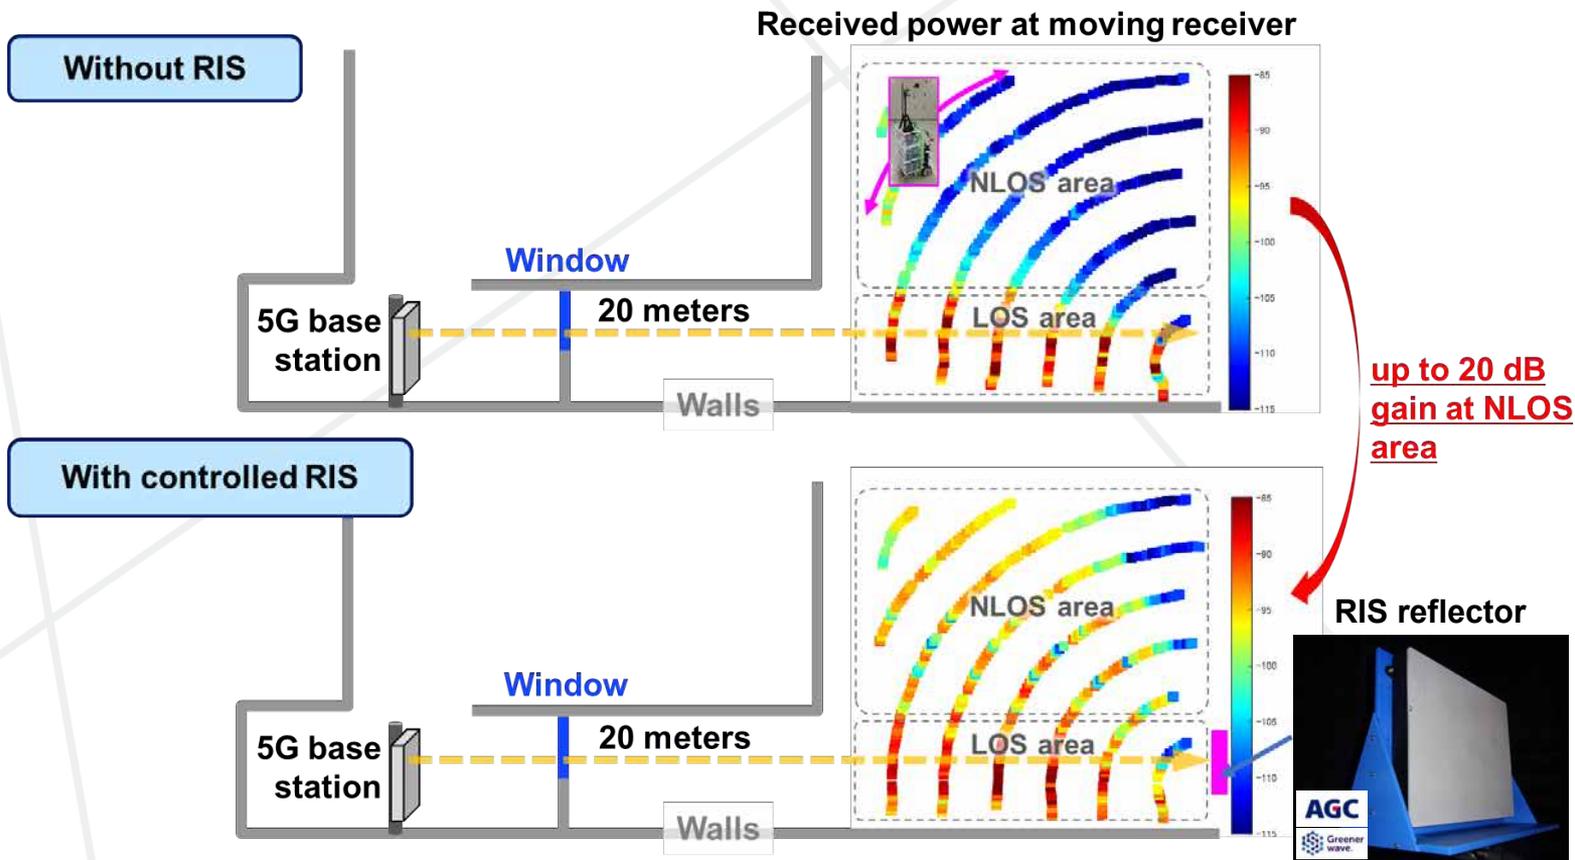

Static metasurface lens

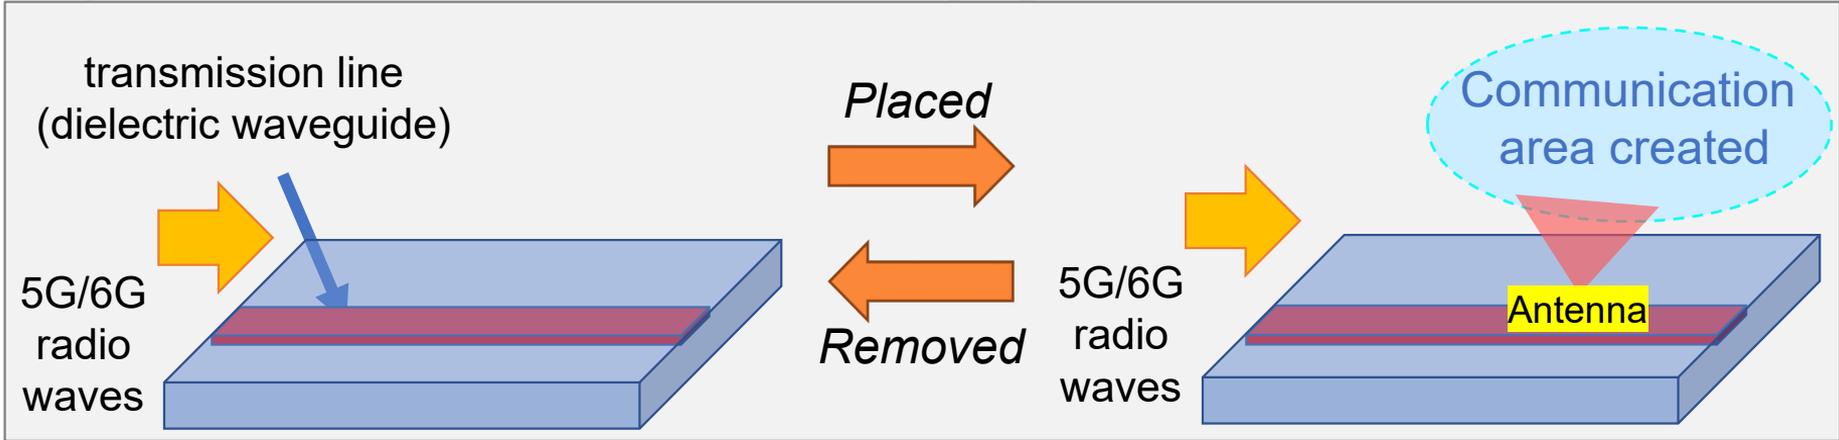

Reconfigurable Intelligent Surface (RIS)

Changing worlds with you.

Drop-n-Prop Antenna

Simple device placed on transmission line to creates mobile cell

The antenna, a small piece of plastic, causes strong radio waves to leak from the cable, creating a local communication area.

The solution is readily deployable because waveguides can be embedded easily in the surfaces of ceilings, walls, counters, etc.

Compact Carry 5G

Changing worlds with you.

Creates temporary 5G areas outdoors quickly and easily

Live streaming at stadiums

Remote assistance at construction sites

Demonstrations at events

Monitoring at factory sites
